

Lessons from the Kalahari

Tracking Teachers' Professional Development

Edited by Monica Hendricks and Giuletta Harrison

Lessons from the Kalahari: Tracking Teachers' Professional Development explores how Northern Cape teachers, who were enrolled in a Bachelor of Education (in-service) course, responded to three professional-development modules specialising in mathematics education, English language teaching, and Foundation Phase teaching, respectively. Mainly through fine-grained analyses of their classroom practice, the studies in this volume demonstrate how these teachers grappled with new content knowledge and pedagogical innovations to improve the quality of teaching in their classrooms. The chapters include case studies that range across a variety of pedagogical topics, including mathematics and English teachers' classroom practices,

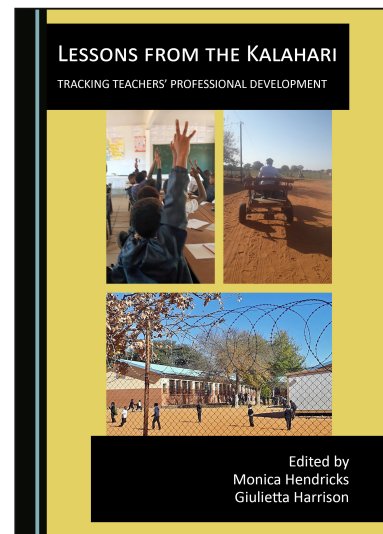

involvement of parents of Foundation Phase learners, and learners' autonomous mathematics learning.

Monica Hendricks is Director of the Institute for the Study of the Englishes of Africa at Rhodes University, South Africa. She teaches and coordinates an under-graduate course for teachers of English as an additional language, mostly in rural schools, and supervises post-graduate research.

Giuletta Harrison was the Director of the Centre for Social Development at Rhodes University, South Africa. She has most recently taken up the post of Executive Director for Africa A+ Schools, which aims to improve the quality of early childhood education in under privileged contexts.

Are you looking for a publisher for your scholarly work?

Cambridge Scholars Publishing is an academic publishing house committed to providing a forward-thinking service that champions original thinking and puts our authors at the heart of everything we do. We have 6,000 titles in our catalogue across a range of subjects; our historic focus has been on the Social Sciences, but we have burgeoning collections in the fields of Health Sciences, Life Sciences and Physical Sciences.

Our international Editorial Advisory Board members, noted for their expertise, have a wealth of collective publishing experience and help to shape the strategy and content of our publications in these fields. We welcome all proposals for our four key subject areas of Health Sciences, Life Sciences, Physical Sciences and Social Sciences that champion original thinking.

We provide a dedicated author service, with no cost to the editor or author, complimentary copies, and a substantial

author discount that can be used on our whole back catalogue. We also offer a generous royalty structure, where authors receive royalties from the very first sale.

In addition, our publishing process is faster than most other publishers, usually being less than six months after final submission without compromising either the quality of the publication or the balance between editorial guidance and the author's control over the integrity of their original argument.

Our publications (published in hardback and also available in e-book format) are marketed worldwide and sold through international booksellers and distributors including Amazon, Blackwell, Baker & Taylor, YBP and Ingram, and are widely purchased by academic libraries. We have an ever expanding portfolio of distribution partnerships in key geographical territories such as the USA, China, India and the Middle East.
