

## Online Course #STUDENT CHALLENGE

Starts 1<sup>st</sup>  
March

The student challenge is for any students or youth organisations who would like to develop a rainwater harvesting and conservation practice of their choice (selected from the 26 rainwater harvesting and conservation practices on the [www.amanziforfood.co.za](http://www.amanziforfood.co.za) website). The Training of Trainers online course is a great way to learn about the practices.

A short 5 minute video (cell phone video) of **your productive demonstration site** which focuses on a rainwater harvesting and conservation practice must be uploaded onto the Amanzi for Food Facebook Page, tagging @AmanziforFood and using the hashtag #studentchallenge. Applicant must also sign up to be part of the challenge on the [www.amanziforfood.co.za](http://www.amanziforfood.co.za) website.

The #StudentChallenge will start on 1 March 2021 and end on 31 May 2021. This allows for 3 months in which the productive demonstration sites can be developed.

All student groups who upload a video and sign up on the Amanzi for Food website will be considered for the laptop prize. The winners will be announced in June 2021
