¹ It is assumed that Grades 6 and above require IT access by default. Grades 1 to 5 where relevant receive IT access

² The context controls access to many IT services, as defined in the service catalogue. Over time, as roles become better defined, it is expected that these will be refined and become more granular.

³ Implies Internet access. "Yes" means the person is free to register a PC on any "staff" network in any building.

⁴ This refers to broad principles. The following are the site licensing arrangements as at May 2013

⁵ It should be noted that wherever a yes occurs (on Site Licensed Software or Library Electronic Resources), the FTE count used for licensed agreements must include the FTEs for the group. Where relevant this requires additional FTEs being included in the software Licence FTEs

⁶ Limited PC support is defined as “support of a reasonable nature where such support is limited to current IT supported products as well as to a reasonable period of time that capacity allows for, without IT support service being decreased to other areas or groups where such time would usually be focused”.

⁷ In departments such as Information Systems and Computer Science where the software is managed by the department, fourth year students may be treated the same as honours students. Departmental rules and conditions will be followed.
