INFORMATION LITERACY

http://www.yvcclibrary.us/Yakima/il.htm
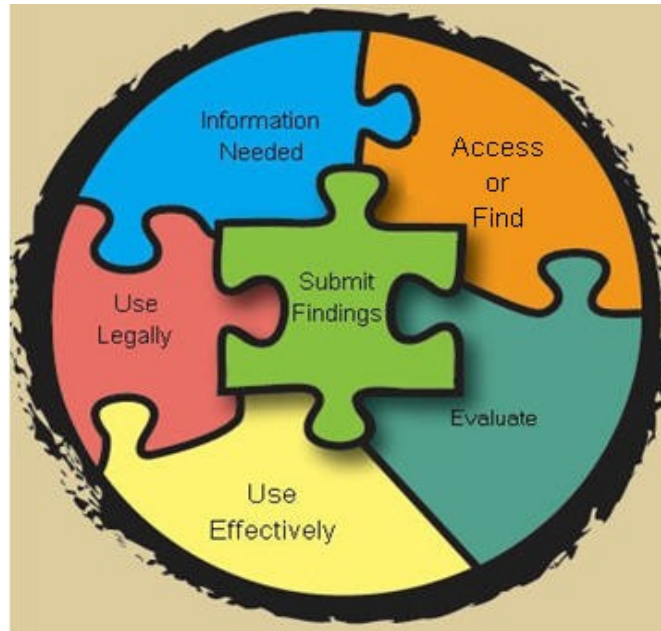

WHAT IS INFORMATION LITERACY

We live in a global world based on knowledge and information. Information Literacy is a tool for a successful life of learning, of creating new ideas and solving problems.

Information Literacy can be defined as the ability to identify information, to access and find it, evaluate it and use it. Not all information is relevant or useful, so skills are needed to evaluate and select useful information. Information should also be used in a legal and ethical manner.
