Application guidelines are explained in this document. Please read this document together with the call or framework document of the funding instrument that highlights the eligibility criteria and requirements.

For technical online enquiries, please contact the NRF Support Desk during office hours from 08:00 to 16:30

Telephone: (012) 481-4202

E-mail: Supportdesk@nrf.ac.za
1. Introduction

This Manual provides an overview of the part time doctoral scholarship funding instrument, application funding guidelines and processes. The Manual should be read in conjunction with the funding instrument call or framework document that can be accessed at https://nrfsubmission.nrf.ac.za. It does not, however, constitute a complete set of the policies, procedures or systems used by the NRF.

2. Granting Rules

2.1 Conditions of Study Support Completing Part-Time Doctoral Studies

- An applicant may not concurrently hold this support with another NRF scholarship form any other South African government source; and
- An applicant must currently be registered for a doctoral degree and be in the final year of the research activities (applicants must have completed all fieldwork, experiments, research methodology and analysis and should be in the write up stages of their doctoral dissertation).
- An applicant must be employed at the time of the application.

3. Value of Scholarship

Support for completion of doctoral studies will be made on a pro rata basis not exceeding twelve (12) months. For the 2017 academic year, the value of the bursaries will be a maximum of R10 000 per month for twelve months or R120 000 per annum.

4. Application Process

The NRF issues a call for part time doctoral scholarship applications that is published on the NRF website and is accessible online at https://nrfsubmission.nrf.ac.za. This call does not accept more than one application per applicant. All applications must be duly authorised and approved by the Designated Authority (DA) of the research administration at the institution that submits the application. Applications are automatically submitted electronically to the institutional DA of the submitting institution for validation at the deadline date determined by the institution. Please inquire with your institution regarding their
internal closing dates. The processing of a successful grant application takes approximately five (5) months from the time of submission until the commencement of funding.

5. How to submit Applications

Applications must be completed on the NRF Online Submission System at https://nrfsubmission.nrf.ac.za from Wednesday, 04 May 2016. Applicants are advised to start with their applications early on to prevent IT system overload nearer the closing date.

Step 1: This is an electronic submission system and applicants must be registered on the system in order to create and complete an application. If you previously registered on the NRF Online System (http://nrfonline.nrf.ac.za) before February 2012, your details will have been migrated to the new NRF Online Submission System (https://nrfsubmission.nrf.ac.za). If you experience problems accessing the system with your NRF Online password, click the Reset Password button to reset it. If you are not yet registered on the NRF Online Submission System, you should register to access the application form.
Step 2: Once you have successfully logged onto the NRF Online Submission System, you get to the Landing Page. On the landing page, click on the left menu (tab indicated with blue arrow) to create a new application by clicking on My Applications then Create Application.

Step 3: On the create application screen, select the funding instrument for which you are applying which will open up a new application to complete. Please note this should only be selected once. To continue working on an application, go to My Applications- List of Applications.
**Step 4:** Applicants are urged to complete or update ALL screens of the CV, including the Research Profile and Research Outputs (if applicable), as this information is evaluated during the merit review process.
**Step 5**: All sections marked with a red asterisk are compulsory. Sections without asterisks are not, and you may enter information in these sections only if you have information to enter, such as research outputs. Completed sections will be indicated by a green tick on the main menu, while incomplete sections will be indicated by a yellow cross.

</tbody>
</table>
All compulsory sections will guide you with error messages at the top of the screen. Please follow these messages to help you complete each section correctly.

**Step 6:** Most screens have screen- and application-specific instructions to help you work through the sections. Please read these instructions carefully before completing the sections.

**Step 7:** The Details of Research section- the applicant should follow the instructions and provide a detailed description of the project; the achievements to date versus the initial project proposal; and include the research work that is still outstanding. Also include details of manuscripts under preparation or that are submitted for publication. For more details on what is required under Details of Research, please also see section 6.3, Ranking of Applications: NRF scorecard assessments below.

Applicants must note the importance of giving a detailed work plan which is assessed based on your supervisor’s comment as well as the feasibility of the timelines, the appropriateness of the research to be conducted and the details of activities planned.

The information above is thoroughly assessed by external panel members who are experts in the different disciplines.
Step 8: The attachment section provides specific instructions for uploading attachments to the application. Please print, certify and then scan in all documents at once, save as a PDF file and then upload the section as one document. If you are a student with a disability, you may also upload a medical certificate in support of your disability.
Step 9: Applicants must ensure that they adhere to their institution’s internal closing date for submission of their application to allow for internal institutional screening and review. The internal closing date will be determined by the respective research offices or Post Graduate Office and is usually at least two weeks prior to the NRF’s closing date.

Step 10: The final submit button will only appear when all compulsory sections are complete. If all the compulsory sections are complete and the final submit button does not appear, please select any section, re-save to refresh the application, and you should see the final submit button. Once you have selected final submit, the application will be routed to your hosting institution for validation and later, for consideration by the NRF.

The NRF will reject applications that are late or incomplete, contain insufficient or incorrect detail, or fail to follow instructions. The application must be completed in sufficient detail to allow for a comprehensive review and evaluation process by internal and external reviewers. In addition to the electronic application and required attachments, the NRF may request additional information or documentation to support an application, if required. Failure to supply such information or documentation upon request may result in the rejection of the application.

6. Screening and Review Processes

6.1 Overview of the Screening Process

All applications validated by institutions and submitted to the NRF are screened by the NRF for compliance with the eligibility criteria of the Call for applications, as well as the requirements for completing the NRF Online Submission application. Applications that fail to meet the stipulated requirements will be rejected.

6.2 Overview of the Review Process

The NRF’s peer review policy requires that all applications are subjected to a review process. Applications submitted to this funding instrument will go through a panel review process.
Panel members are selected from the NRF database and other sources, which is updated on a continuous basis. In making the selection of the panel, the expertise and experience of individuals in application adjudication are taken into account. In assessing the application, agreed assessment criteria are applied in the form of a scorecard.

The Panel provides recommendations to the NRF and the final funding decision is made by the NRF taking strategic and policy objectives into consideration. In awarding grants in this funding instrument, the NRF takes into account the recommendations of the peer review panel, the objectives and targets of the funding instrument, and the available funds.

6.3 Ranking of Applications

The purpose of the scoring system is to evaluate applications, based on funding instrument criteria, in order to identify applicants that are most deserving of the limited funds available. All research proposals submitted to the NRF for funding are evaluated according to a number of predetermined criteria. Applications are assessed and ranked on the basis of criteria as listed in the table below. Each area is weighted to indicate its relative importance. Kindly consult the table below for details on the criteria used.
### NRF Scorecard for the Assessment of Study Support for Part-Time Doctoral Scholarship Funding

<table>
<thead>
<tr>
<th>Criterion</th>
<th>Description</th>
<th>% Weighting</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Progress to date</strong></td>
<td>This section refers to a detailed and comprehensive account of progress achieved to date. It also looks at the originality and contribution to new knowledge, interdisciplinary or multidisciplinary aspects; and utilisation of existing knowledge and methodologies.</td>
<td>15</td>
</tr>
</tbody>
</table>
| **Work plan to complete the degree** | Research objectives to match aims of study – reviewers will assess whether the research objectives are clearly stated and whether they are appropriate to meet the aims of the study; are sound but have inconsistencies and can be refined; are appropriate but only partially address the aims of the study; or are not appropriate to meet the aims of the study.  
Research methodology to match research objectives – Reviewers will comment on whether the research methodology is appropriate to meet objectives of study; is sound but has inconsistencies and can be refined; is appropriate but only partially addresses study objectives; or not appropriate to meet objectives of study.  
Students to provide a thorough work plan towards completion of study. They should also give feasible timelines and methodical project activities. | 55          |
| **Supervisor’s support**        | Supervisor’s recommendation for part-time doctoral bursary is important to provide an academic account of the student’s progress in relation the project as well as the proposed project plan. The supervisor is required to endorse the proposed plan for completion as well as submission of the dissertation and manuscripts for publication. | 10          |
7. Application Feedback and Disputes

Once the review and assessment processes have been completed and the recommended funding decision has been approved by the NRF. The NRF will publish a list of successful applications emanating from the call for applications on the NRF website, www.nrf.ac.za; thereafter, successful applicants will receive a letter of award. The application status on the NRF Submissions system will not indicate whether the application has been supported for funding. This funding instrument does not provide feedback to unsuccessful applicants; if your name does not appear on the list you have not been supported.

Should an unsuccessful applicant require feedback, they are requested to follow the process and query via their institutional office. The NRF does not provide feedback to all unsuccessful applicants due to the high volume of applications received across all NRF funding instruments.

Unsuccessful applicants that wish to appeal the funding decision taken must follow the appropriate Appeals Process of the NRF. Appeals will only be considered for this funding instrument within a five (5) month period after the official date of publishing of the results on the NRF website.
8. **Awardee Responsibilities**

8.1 **Reporting**

At the end of the funding period, recipients of the scholarships shall submit a final report indicating the outputs. In addition, each student will be required to provide proof of submission of the thesis and, where applicable, proof of submission of a manuscript to an accredited journal.

8.2 **Managing changes during the project life cycle**

Changes may occur during the project life cycle due to unforeseen and extenuating circumstances. Please note the following on how to manage the award and subsequent changes (planned or unanticipated) should they arise during the project life cycle.

8.2.1 **Change Requests**

8.2.1.1 **Prior Approvals Requests**

Applicants must submit all change requests in writing to the NRF 30 days before the proposed changes occur. The request must have institutional DA endorsement and be submitted to the NRF via the Research Office / Post graduate funding Office for approval prior to the change.

8.2.1.2 **Changes in project scope, supervisor or institution**

Although changes in the research project scope are not anticipated in this completing part-time doctoral support call, other changes may occur in the case of a supervisor. The request for any changes must have institutional DA endorsement and must be submitted to the NRF via the Research Office.
9. Scientific Compliance

9.1 Methodology

The student takes scientific responsibility for the research to be undertaken, including its objectives and the methodology outlined in the project proposal. The student is required to devote the necessary time to the research project in compliance with the work plan for the research proposal approved by the NRF so as to achieve the project's stated aims and objectives.

9.2 Intellectual Property Rights

The intellectual capital generated by NRF funded research must be appropriately protected and exploited for the benefit of South Africa. This condition should not interfere with the Intellectual Property Rights arrangements already made, on condition that the majority of the benefits arising from the intellectual capital accrue to South Africa and its citizens. This condition is aligned with the Intellectual Property Rights Act, which will override this condition of grant.

9.3 Ethics

The student is required to maintain the highest ethical and safety standards in conducting the research, particularly when human and animal subjects are involved. It remains the responsibility of the project leader to comply with all relevant regulations in this regard, including those of the institution at which the research is carried out. An ethical clearance certificate (where applicable) must be submitted to the NRF in respect of successful applications before funding can be released.
