<b>INDEX</b>		<b>101</b>

This guide has been revised and expanded a number of times since the first edition, then called *A Brief Guide for Thesis Writers*, was compiled by Reuben Musiker (Deputy Librarian 1961-1972) in 1970.

This guide includes much of the material contained in the previous editions (often importing whole passages and sections verbatim) and is thus heavily indebted to the work of Musiker, Brown, Scott, Fourie and others. The Editor is grateful for the comments and material supplied by colleagues, particularly the Centre for Postgraduate Studies, Registrar and her Division, the Deans of Faculties, the Research Office, and others. Comments or suggestions for the improvement of this Guide are welcome.

An online version of this guide can be found at: <http://www.ru.ac.za/postgraduategateway/>

## 1

# PREFACE

The purpose of this *Higher Degrees Guide* is to provide a ready reference for Master's and Doctoral candidates and their supervisors and also provide useful information for Honours students. It contains material which is essential reading for postgraduate candidates, as well as, it is hoped, much other useful information. Importantly, the guide sets out the procedures which must be followed by postgraduate candidates in that it brings together the Policy on Supervision, University Rules, the requirements of the Committee of Assessors and various Senate requirements (such as the guidelines for the supervision of higher degrees). Although it is anticipated that this guide will prove to be a sufficiently comprehensive guide to the procedures and rules for higher degrees to meet the needs of candidates and supervisors alike, it must be emphasised that the Senate itself remains the authority on all questions relating to the rules as set out in the University Calendar.

This is a *guide* to higher degree study. It does not purport to cover every aspect of the process of earning a degree. For instance, the professional relationship between a candidate and a supervisor cannot be adequately characterised in a guide such as this. Many candidates come to appreciate their supervisors as mentors and it is not uncommon to find candidates maintaining contact with their supervisors throughout their careers. Furthermore, this document makes no attempt to deal in depth with the actual process of writing a thesis. Since the requirements of different disciplines are varied and there are numerous guides to style and thesis writing unique to each Faculty, it is impossible to cover such material in this guide.

Embarking on your postgraduate journey can be both daunting and exciting. This guide attempts to provide all the key information you will need as you start this journey. Please read through it carefully and discuss any concerns you might have with your supervisors.

There are many complexities to knowledge production, which is what you are busy with as a postgraduate scholar, but you do not need to tackle these complexities on your own. Research has consistently found that those who study within a community of supportive and challenging peers will be more likely to navigate their way through to the graduation stage. You are urged to work closely with your supervisors and to find spaces where you can share your work with others.

The Centre for Postgraduate Studies (CPGS) offers a range of seminars, writing retreats, writing groups, short courses and more to help you along the way and to ensure that you and your supervisors are supported and have ample spaces for development.

Please visit the CPGS website <https://www.ru.ac.za/postgraduategateway/> to find out about all that is on offer.

**Dr Peter Clayton**

Deputy Vice-Chancellor: Research & Development

## 2

# HIGHER DEGREE STUDIES

## 2.1 Higher Degrees at Rhodes University

Depending upon their current qualifications, candidates may register for an appropriate *Master's* degree (which may require the completion of course-work, or a thesis, or both), the degree of *Doctor of Philosophy* (PhD), or a *Senior Doctorate* (e.g. Doctor of Science, "DSc"). The PhD degree is normally obtained by means of research work and the subsequent presentation of a thesis. Senior Doctorates are awarded to scholars of international stature whose published works constitute a distinguished contribution to the advancement of knowledge in their field. Variations to the PhD degree are indicated below:

A PhD candidate in Music and Musicology is required to submit either a thesis or a set of compositions. Where compositions are submitted, they must consist of three original compositions and the candidate must also submit an explanatory statement referring to any important aspects of the scores including, in particular, a description of the form or forms employed and of any contrapuntal, harmonic and orchestrational devices used.

A PhD in Psychotherapy is a course-work programme in two parts. The first part consists of four written papers and a case study, the second of a thesis.

Some Faculties permit PhDs with publications. The requirements vary by Faculty.

## 2.2 *Ad eundem gradum* candidates

Where a candidate has extensive experience and/or is judged to have considerable potential as a researcher, but lacks the formal qualifications normally required for registration for a Master's or Doctorate degree, admission into the degree as an *ad eundem gradum*<sup>1</sup> candidate may be possible. *Ad eundem gradum* candidates should submit a portfolio of satisfactory evidence of their suitability for admission into the degree to the Head of Department. The application is considered by the appropriate Faculty for onward consideration by Senate.

Guidelines for the admission of *ad eundem gradum* students is provided in Appendix A (G.49).

## 2.3 Criteria for the award of a higher degree by thesis

Senate has set the following guidelines for the award of higher degrees by thesis.

### 2.3.1 A thesis for the degree of Master

The primary purposes of Master's Degree<sup>2</sup> are to educate and train researchers who can contribute to the development of knowledge at an advanced level, or prepare graduates for advanced and specialised professional employment. A Master's Degree must have a significant research component.

1 "To the same level".

2 Higher Education Qualifications Sub-Framework. 2013. Notice No. 549, Government Gazette No. 36721. 2 August, Pp. 36-39.

A thesis for the degree of Master must show that the candidate:

- a) is sufficiently acquainted with the appropriate methods and techniques of research;
- b) is sufficiently acquainted with the relevant literature;
- c) has both satisfactorily understood the nature of the problem or topic and assessed the significance of the findings; and
- d) has satisfactorily presented the results of independent research for the award of the degree in a manner which is satisfactory as to literary style and presentation, and free from grammatical and typographical errors.

Furthermore, a thesis for the degree of Master must show that the candidate is able to:

- a) deal with complex issues both systematically and creatively;
- b) make sound judgements using data and information at their disposal and communicate their conclusions clearly to specialist and non-specialist audiences;
- c) demonstrate self-direction and originality in tackling and solving problems;
- d) act autonomously in planning and implementing tasks at a professional or equivalent level; and
- e) continue to advance their knowledge, understanding and skills.

When the award of the degree *with distinction* is under consideration, examiners are asked to look for evidence of real methodological and conceptual skills, clarity of exposition and development of argument, sound judgement, originality of approach, and some contribution to knowledge, and require that the thesis should reflect literary skills appropriate to the subject.

### 2.3.2 A thesis for the degree of Doctor of Philosophy

A Doctoral Degree<sup>3</sup> requires a candidate to undertake research at the most advanced academic levels culminating in the submission, assessment and acceptance of a thesis. Course work may be required as preparation or value addition to the research, but does not contribute to the credit value of the qualification. The defining characteristic of this qualification is that the candidate is required to demonstrate high-level research capability and make a significant and original academic contribution at the frontiers of a discipline or field. The work must be of a quality to satisfy peer review and merit publication. The degree may be earned through pure discipline-based or multidisciplinary research or applied research. This degree requires a minimum of two years' full-time study, usually after completing a Master's Degree. A graduate must be able to supervise and evaluate the research of others in the area of specialisation concerned.

A thesis for the degree of Doctor of Philosophy must show that the candidate:

- a) is sufficiently acquainted with the appropriate methods of research;
- b) is sufficiently acquainted with the relevant literature;
- c) has satisfactorily presented the results of independent research for the award of the degree;
- d) has made a substantial and original contribution to knowledge in the discipline, the substance of which is worthy of publication in a scholarly journal or book. (A Doctoral thesis differs from a Master's thesis particularly in respect to this point).

In addition, the thesis must be satisfactory as to literary style and presentation. A PhD thesis cannot be merely a collection of published papers. Where published papers and other materials are included in the thesis there should be integrating material of a nature that ensures that one coherent document is submitted for examination that meets all the requirements of the PhD as stated above.

There are some variations on the above as indicated in Section 2.1.

---

3 Higher Education Qualifications Sub-Framework. 2013. Notice No. 549, Government Gazette No. 36721. 2 August, Pp. 40-41

## 3

# THE HIGHER DEGREE PROGRAMME

There are a number of steps leading to the attainment of a higher degree.

## 3.1 Requirements for admission

### 3.1.1 Master's degrees

The minimum admission requirement is a relevant Bachelor Honours Degree in a relevant subject or a satisfactory pass in a four-year degree such as BPharm, BFineArt, etc. A "professional" Bachelors Degree with a minimum of 96 credits at level 8 or a Postgraduate Diploma may also be recognised as meeting the minimum entry requirement to a cognate Master's Degree programme. The requirements for candidates for a higher degree in Law are provided in the footnote<sup>4</sup>. Candidates are required to verify the minimum admission requirements to the Department in which they will be applying by consulting the website of the respective department.

A Master's Degree may be earned in either of two ways: (1) by completing a single advanced research project, culminating in the production and acceptance of a thesis or dissertation, or (2) by successfully completing a course work programme requiring a high level of theoretical engagement and intellectual independence and a research project, culminating in the acceptance of a dissertation. In the latter case, a minimum of 60 credits at NQF level 9 must be devoted to conducting and reporting research. In the case of a course work professional master's degree the research or technical project component comprises at least a quarter of the total credits at the NQF level 9<sup>5</sup>.

*Ad eundem gradum* candidates should submit a portfolio of satisfactory evidence of their suitability for admission into the degree to the Head of Department. Please refer to the policy on the recognition of prior learning for more details, available at

[https://www.ru.ac.za/institutionalplanningunit/policies/policiesa-z/and the guidelines provided in Appendix A \(G.49\).](https://www.ru.ac.za/institutionalplanningunit/policies/policiesa-z/and the guidelines provided in Appendix A (G.49).)

### 3.1.2 Doctoral degrees

A candidate wishing to apply for admission to a PhD programme must have: (i) a recognised Master's degree, or (ii) a recognised Honours, or a four-year Bachelor's degree plus at least one year's registration for an approved Master's degree, or (iii) a recognised three-year Bachelor's degree plus at least two years' registration for an approved Master's degree, or (iv) in special

4 Candidates for the higher degree in Law normally have obtained at least 65% aggregate for their final year of LLB. The Law Higher Degrees Committee may deviate from the aggregate requirement in appropriate cases. If applicants do not qualify on aggregate, then the Committee may request the candidate to be interviewed. An LLB dissertation (research essay) may be indicative of a student's capability to do research since the Faculty currently only offers the LLM by thesis. Admission to postgraduate study in Law is furthermore dependent on supervision capacity. See Rule L.16

5 Higher Education Qualifications Sub-Framework. 2013. Notice No. 549, Government Gazette No. 36721. 2 August, Pp.36 & 38.

circumstances, at the discretion of Senate, an approved Bachelor's degree or qualification recognised by the Senate as equivalent.

In practice, most PhD candidates have a Master's degree. However, Senate may, on the recommendation of the Faculty concerned, convert the registration of a candidate for the Master's degree to registration for a PhD degree. Such conversions require the Head of Department and supervisor to be satisfied that the student's completed work is of a standard normally expected of a doctoral student, that the student is capable of completing a doctoral degree and that the project is of a level and scope expected of a PhD study. Applications for conversion should normally be submitted for consideration to the Higher Degrees Committee of all Faculties and, in the Faculty of Science, to a Committee of Assessors chaired by the Dean of Science. Such application should be done between 12 to 18 months after first registration for the Master's degree. **Please note:** The relevant Dean should be consulted for information on specific rules and criteria that may apply to upgrades in their Faculty.

## 3.2 Registration

### 3.2.1 Registration

Candidates for a higher degree should apply for admission to the University towards the end of the academic year before the one in which they intend to register for the first time. Applications are made through the Registrar's division. The online application form for Master's and Doctoral degrees (Appendix B) can be accessed at <http://www.ru.ac.za/postgraduategateway/>

The closing date for new applications is 1 May and registration closes on 1 June of each year. Candidates who miss the closing registration date of 1 June, are deemed to have the next academic year as their year of first registration for the qualification even if they begin their research immediately. Registration between 1 June and before 15 September in the current year would require special permission from the Registrar. A pro-rata amount of the annual fee will be charged for those students registering after 1 June. Students whose applications are finalised after 15 September will only be permitted to register in the following year.

Applications must be supported by the candidate's full academic record and certified copies of all degree certificates. Academic records usually come in the form of an "academic transcript", listing the courses and degrees which you have completed, and the marks obtained. To facilitate the process of producing high quality research, applicants are encouraged to engage with prospective supervisors in discussion before the application forms are completed and submitted. In particular, the topic of research must be clearly defined. Students should also consult the relevant Departmental website to ascertain whether additional submissions are required such as the submission of a preliminary proposal prior to or with the formal application forms. Applicants in the Faculty of Pharmacy should take note of the procedure in the footnote<sup>6</sup>.

Applicants must submit an application form and supporting documentation to the Registrar's division, who in turn, will send the application form and supporting documents to the Head of Department and the Dean for consideration. In the case of an on-line application, the application form and supporting documentation will automatically be sent to the Registrar's division and to the Head of Department for their recommendation to the Dean. If the Head of Department or the relevant Dean is not prepared to accept the applicant, the Registrar will be informed and asked to convey this decision to the applicant. If the Head of Department and Dean are satisfied that the applicant is a suitable candidate for higher degree study, that the proposed research

---

<sup>6</sup> Candidates in the Faculty of Pharmacy should consult the Dean and the Faculty research brochure for further details concerning application and acceptance for higher degrees

topic is viable, and that the Department can provide adequate supervision and facilities, the application will be recommended for approval. The appropriate Faculty Board, in the case of a Master's degree, or the appropriate Faculty Board and Senate, in the case of a Doctoral degree must then approve the candidate's registration and the proposed research topic, and appoint a supervisor(s). The candidate will then be registered for a higher degree. The Registrar will inform the candidate that he or she has been accepted for the degree. Students registering for the first time for postgraduate studies and their supervisors must sign a statement, provided on the application for Master's and Doctoral degrees form, to the effect that they agree and will abide by the principles and rules of the Higher Degrees Guide. Students seeking to undertake postgraduate studies in the Faculties of Science and Pharmacy are expected to have discussed a research project and have the support of a supervisor at Rhodes. As such, an application for postgraduate studies in Science and Pharmacy will be approved and signed by the supervisor and the Head of Department before it is sent to the Dean. The supervisor in these Faculties needs to complete the "prospective supervisor's form", which refers to pages 6 and 7 in the Master's and Doctoral application form as shown in Appendix B.

All full-time, in attendance postgraduate candidates shall normally report in person to their Department on or before 15 February each year.

### 3.2.2 Retrospective registration

Except by permission of Senate, retrospective registration for a higher degree will not be allowed. Senate will only entertain an application for retrospective registration in exceptional circumstances.

### 3.2.3 Commencement of studies

Once candidates have been registered they may commence their studies. Normally this takes effect from the start of a calendar year, but new candidates may start later (if after June, a pro rata amount of the annual fee will be charged). Candidates in the Faculties of Humanities and Commerce are required to submit research proposals within the first year of study, preferably within three to six months of registration, whilst candidates in the Faculty of Education are required to submit research proposals within 18 months of registration for consideration by the relevant Faculty Higher Degrees Committee which recommends acceptance or otherwise to the relevant Faculty Board. Supervisors must attend the Higher Degrees Committee whenever a proposal of one of their students is evaluated.

Candidates who have been registered provisionally in the Faculty of Law for LLM or PhD degrees must submit detailed proposals. The proposals will be scrutinised and approved by the prospective supervisors. Supervisors may require candidates to redraft their proposals until the requisite detail and depth have been required. Candidates are then required to submit research proposals, as soon as possible, normally within the first six months after registration (LLM) or year (PhD) for consideration by the Law Faculty Higher Degrees Committee which will recommend acceptance or otherwise to the Faculty Board. Supervisors should attend the Higher Degrees Committee whenever a proposal of one of their students is evaluated. Candidates registering in the Faculty of Pharmacy should refer to the Faculty specific requirements.

The Faculty of Science does not have a Higher Degrees Committee. Candidates registering in the Faculty of Science are however required to submit their research proposals to their supervisors for approval within three to six months of registration. In addition, candidates are usually required to present this research proposal in the form of a formal departmental seminar.

### 3.2.4 Re-registration

All higher degree candidates are required to re-register each year, before 15 February, until the completion of the degree. Candidates can access the re-registration form (Appendix C), available online at: <http://www.ru.ac.za/postgraduategateway/> before the 15th February each year and

email the completed form to the Registrar ([registrar@ru.ac.za](mailto:registrar@ru.ac.za)). Failure to re-register before 15 February in a given year will result in the cancellation of registration and a candidate's studies deemed to be discontinued. Such a defaulter may be required to re-apply for admission as a candidate for the degree *de novo*.

Candidates who require a student card each year should request these from the Student Bureau. Proof of identity will be required at the time.

In terms of the University policy on supervisory practice (section 3.4) candidates are required to submit an annual progress report, available online at <https://ross.ru.ac.za> to the Registrar by the 15 February each year detailing progress in their research. Since the progress report is completed by both the candidate and the supervisor prior being sent to the Dean, the candidate should submit their report to the supervisor before 15 February to ensure that registration can be timeously done. The request to complete the annual progress report will be emailed to the candidate by the Registrar's division in the second semester each year. The report is required each year and at the end of the supervisory process. Failure to submit the report by 15 February will lead to a late registration that will incur a late registration penalty. The report will be considered by the supervisor and then by the Dean of the relevant Faculty. *Where the Dean is a supervisor the relevant report will be submitted to the DVC for consideration.*

### 3.2.5 Suspension of registration

Should there be *bona fide* reasons for a break in registration for higher degree research; a candidate may apply for a suspension of registration. Registration may only be suspended under exceptional circumstances, and is rarely done retrospectively. An application must be made to the Head of Department and is subject to the HOD's recommendation, that of the Dean, and the approval of the Faculty Board, and the Senate in the case of a PhD. Any obligation to sponsors should be taken into account when considering suspension of registration. Candidates wishing to discontinue or suspend their registration must give notice in writing to the Registrar ([registrar@ru.ac.za](mailto:registrar@ru.ac.za)) before 15 February of each year. Suspension of registration can be applied for, one year in the period of study, by completing the application form (Appendix D) available at <http://www.ru.ac.za/postgraduategateway/>

### 3.2.6 Minimum period of registration for a higher degree

The minimum period that a candidate may be registered for a Master's degree is set out in Rules G.50 and G.53: a full-time Master's candidate may obtain the degree one year after being awarded an Honours degree or a four-year degree such as the BPharm. Part-time Master's candidates must be registered for two years before they can graduate.

The minimum period for which a candidate may be registered for the PhD degree is set out in Rule G.62: this is three years if the candidate holds an Honours degree (or an LLB or BMus), or two years if the candidate holds a Master's degree.

It should be noted, however, that the required registration period does not include any period of suspension of registration. The Registrar will inform each higher degree candidate, on request, of the earliest date at which the candidate may graduate.

### 3.2.7 Maximum period of registration for a higher degree

In terms of Rule G.76.1, candidates are expected to have completed a Master's degree within three years from first registration and a PhD within five years from first registration or six years if their PhD was upgraded from a Master's degree. Given these timelines, Senate may suspend or cancel the registration of a candidate if they are not satisfied that an extension is warranted. Consequently, candidates should apply to Senate for the extension of their registration period. It is thus important that milestones should be agreed on and progress monitored by the supervisor.

### 3.3 The formal research proposal

A research proposal should be typed in one-and-a-half spacing on A4 paper and in 12-point font size. All proposals should be presented with a front page indicating the following:

- a) Name of the candidate and the student number.
- b) The degree for which the proposal is being submitted.
- c) The Department in which the candidate will be carrying out the research and the subject or specific field in which research is to be carried out, unless this is implied by the name of the Department.
- d) The title of the thesis or the field of research.
- e) The type of thesis (whether a full thesis or thesis in partial fulfilment of the requirements for the degree).
- f) The name(s) of the supervisor(s).
- g) The estimated date of submission.

The length and format of the proposal differs between Faculties and postgraduate candidates should consult their Faculty guidelines.

#### 3.3.1 Submission of the research proposal to Faculty Higher Degrees Committees

In the Faculties of Humanities, Commerce, Education, Pharmacy and Law a research proposal is considered initially by the Higher Degrees Committee (HDC) of the Faculty, and then recommended for approval by the relevant Faculty Board (for Master's degrees) and Senate (for a PhD). Before submission to the Faculty HDC, candidates must obtain the endorsed recommendation and/or approval of their research proposal from the supervisor (s) and the Head of the relevant Department (or Departmental HDC) and consult the Rhodes University Research Ethics website at <http://www.ru.ac.za/researchgateway/ethics> on when and how ethical clearance should be obtained.

#### 3.3.2 Dispute resolution mechanism in respect of proposal submission to Faculty Higher Degrees Committee

The oversight role of the Faculties of Humanities, Commerce, Education, Pharmacy and Law HDC is to make recommendations to the relevant Faculty Boards regarding students' intended research. This role is intended to protect the integrity of the research project and university's academic reputation.

As indicated in the previous section, prior to the submission of a proposal for consideration by the Faculty HDC, the candidate must obtain approval for the proposal from his or her supervisor(s) and the Head of the relevant Department (or Departmental HDC). In the event where the supervisor(s) and/or Head of the relevant Department or departmental HDC refuse to endorse the student's research proposal for submission to the Faculty HDC, the student and/or his or her supervisor, may approach the Dean of the Faculty with a request to place the proposal before the Faculty HDC for its consideration. Upon receiving such a request, the Dean of the Faculty must consult with the Head of the relevant Department and the supervisor(s) as to the reason for not endorsing the proposal and attempt to facilitate an agreement between the parties to the process to be followed in respect of the proposal. The Dean may involve the Director of Postgraduate Studies in the mediation process. In the event where the Dean is unable to facilitate a mutually acceptable process agreement between the parties within two weeks of receiving the request, the Dean may place the proposal before the Faculty HDC for consideration at its next meeting.

#### 3.3.3 Referencing Websites

Candidates who make use of resources on the Internet must cite the bibliographic reference along with the URL or website address and the date the item was accessed. Candidates should

keep in mind that should they be required to provide evidence of any content taken from the internet they would have to do so for a period of five years after submission of the thesis. In the case of clinical research and health related research the period is at least 15 years. It is thus recommended that candidates immediately save a screen-shot of the website onto a word document or a print PDF copy of website at the time of access for storage for the required period.

---

**In the case of online articles, candidates should reference the “permanent link” or DOI which is visible on the screen at the time of access as this is a reliable link back to the article**

---

### 3.3.4 Research Ethics

The Rhodes University Ethical Standards Committee is registered with the National Health Research Ethics Council (Registration Number REC-241114-045) and permitted to review research proposals according to the National Health Act No. 61 of 2003. This Committee shall ensure that all research activities involving humans or animals are performed responsibly and meet the highest ethical standards. As such any research in which humans or animals are involved must have prior clearance from either the Rhodes University Human Ethical Standards Committee or the Rhodes University Animal Ethical Standards Committee. Candidates must access the Rhodes University Ethical Standards website at <http://www.ru.ac.za/researchgateway/ethics/> on when and how ethical clearance should be obtained.

Two important aspects should be noted:

- a) Data, that is not publically available, may not be collected prior to the approval from Rhodes University Ethical Standard Committee.
- b) Data for non-clinical and non-public health research projects should be kept for a period of no less than 5 years or at least 2 years post-publication, otherwise this is 15 years post publication.

## 3.4 Supervision

Senate appoints at least one, and occasionally more than one supervisor, for each postgraduate candidate. If more than one supervisor is appointed, one of the supervisors will be designated as the principal supervisor. Because approaches to supervision differ from Department to Department and from individual to individual, candidates and their supervisors should discuss the question of supervision early on in the project. Senate has, however, set out the University's general policy in matters relating to the supervision of postgraduate candidates which can be found at: <http://www.ru.ac.za/institutionalplanningunit/policies/policiesa-z/>

The Policy on Supervision in Higher Degrees by Research, attached as Appendix E, sets out details in this regard and needs to be carefully read by supervisors and candidates. These guidelines may be supplemented by more detailed guidance issued by individual Faculties or Departments.

Sections 3.4.1 and 3.4.2 of this document also provide guidelines of the general responsibilities expected of supervisors and candidates respectively.

### 3.4.1 The responsibilities of the supervisor

Before the project begins it is the responsibility of the supervisor:

- a) to discuss with the candidate the responsibilities of supervisor and candidate as set out in this document
- b) to become familiar with the administrative regulations pertaining to Higher Degrees and with the *Higher Degrees Guide* and to direct the candidate accordingly;

- c) to become acquainted with support services available at the University such as the library and to ensure that the candidate is aware of such services and makes use of them where appropriate;
- d) to choose candidates carefully with regard to the abilities of the candidate, the facilities and expertise available in the Department, and with a realistic assessment of the time which the supervisor will be able to devote to the supervision of the project;
- e) to assist the candidate where possible to obtain financial support for the research project;
- f) to inform the candidate of any areas in which the supervision may be lacking in the expertise necessary for proper supervision and to recommend co-supervision where appropriate;
- g) to inform the candidate, before the research begins, of any known risks involved in the project, e.g. possible unavailability of data;
- h) where appropriate, to clearly indicate to candidates what may be expected of them in terms of field trips, use of hazardous chemicals, etc.
- i) where appropriate, to indicate to candidates that they may be required to sign confidentiality agreements; and
- j) to bring to the candidate's attention the implications of plagiarism and refer candidates to the Common Faculty Policy and Procedures on Plagiarism, which is available at the following link: <https://www.ru.ac.za/institutionalplanningunit/policies/policiesa-z/>

During the course of the project it is the responsibility of the supervisor:

- a) to negotiate with the candidate mutually acceptable arrangements regarding the sequence of tasks to be undertaken, target dates, submission of work for scrutiny and to set up a schedule of meetings between supervisor and candidate;
- b) to give guidance in the formulation of the research proposal, to ensure that the candidate is conversant with the relevant research methods and techniques and, where necessary, to help the candidate to acquire the relevant research skills;
- c) to ensure that the research conducted by the candidate complies with commonly accepted ethical standards for research in the discipline;
- d) to be available for guidance and discussion and to be prompt and comprehensive in response to stages of work completed, in accordance with mutually agreed arrangements in terms of (a) above;
- e) to motivate and encourage the candidate and to endeavour to maintain a positive attitude to the research and the candidate;
- f) to alert the candidate to the academic requirements, the standard of language required, and any special conventions necessary in the presentation of a thesis;
- g) to ensure at all times that the candidate is aware of inadequate or sub-standard work in order to avoid misdirection and wasted effort. This responsibility would include alerting the candidate to substandard linguistic ability;
- h) to advise on the organisation and style of the thesis, alerting the candidate to issues of academic integrity and plagiarism. The responsibility of the supervisor does not extend to the correcting of grammar, spelling and punctuation throughout the thesis;
- i) to provide the opportunity for the candidate's work to be critically assessed by others with expertise in the field of study (for example, the research proposal should be presented, in seminar form, to the candidate's peers and interested academic staff and the supervisor should encourage the candidate to present papers at conferences and, where appropriate, to submit articles to relevant journals while their work is in progress);
- j) to bring cases of conflict between the supervisor and the candidate to the attention of the Head of Department or, where the supervisor is the Head of Department, to the Dean of the Faculty;

- k) to keep accurate records of the supervision process. The method(s) of recording this process should be arrived at by mutual consent;
- l) to remind the candidate to submit an annual progress report to the Registrar;
- m) to ensure, as far as the supervisor is able, that the thesis will meet the standards likely to be required by the external examiners.

At the conclusion of the project it is the responsibility of the supervisor:

- a) to impress on the candidate the need to check drafts of the thesis for possible errors and instances of possible plagiarism before the thesis is copied and bound. Candidates are encouraged to use text-matching software provided by the university in order to avoid inadvertent instances of plagiarism. (Poorly presented work reflects adversely on the candidate, the supervisor, the Department and the University);
- b) to approve the abstract of the thesis in terms of Rule G.69.4.;
- c) to nominate external examiners. The nomination is approved by the Dean of the Faculty and serve at Faculty Board meetings;
- d) to submit a report if required to the Registrar on the manner in which the research was conducted. In cases where the supervisor does not approve the submission of the thesis, the supervisor is required to submit a report;
- e) in the case of Doctoral candidates, to decide whether it is necessary to make any additional statement on the project or candidate to the Committee of Assessors (Where ongoing interaction is known to have occurred between the candidate and an external examiner nominated by the supervisor, this must be reported to the COA);
- f) to act critically as an internal examiner, when required (this will be required only under exceptional circumstances);
- g) to take careful note of the reports of external examiners so that future research and supervision can be improved.

### 3.4.2 The responsibilities of the candidate

Before the project begins it is the responsibility of the candidate:

- a) to be fully informed about the degree requirements and procedures at Rhodes University;
- b) to discuss with the supervisor the responsibilities of supervisor and candidate as set out in this document;
- c) to prepare thoroughly for the research project;
- d) to ensure that the proposed research project will not duplicate previous research;
- e) to arrange financial support for the project, where appropriate, and pay the required admission and registration fees;
- f) to make the necessary plans around personal, work and financial responsibilities to enable smooth progress;
- g) to be satisfied that the supervisor is capable of performing the supervision at the required level;
- h) to suggest to the supervisor that a co-supervisor be appointed where the candidate deems it necessary;
- i) to sign confidentiality agreements where appropriate to the project concerned; and
- j) to be fully informed about the Common Faculty Policy and Procedures on Plagiarism.

During the course of the project it is the responsibility of the candidate:

- a) to maintain a professional attitude to, and relationship with, the supervisor(s), sponsors and any other members of the research group;

- b) to negotiate with the supervisor mutually acceptable arrangements regarding the sequence of tasks to be undertaken, target dates, submission of work for scrutiny and the schedule of meetings between supervisor and candidate;
- c) to not expect the supervisor to be available without an appointment or prior arrangement;
- d) to be fully prepared for such supervisory meeting (e.g. leaving or emailing written material such as thesis chapters with the supervisor well in advance of meetings to discuss such material);
- e) to take the initiative in making and maintaining contact with the supervisor and in bringing to the supervisor's attention any research related problems which the candidate may be experiencing;
- f) to make positive suggestions to the supervisor about the next stage of the work;
- g) to become familiar with the relevant literature in the field;
- h) to be aware that while the responsibility for the research rests ultimately with the candidate who must ensure that there is conformity with the University regulations, the advice of the supervisor concerning ethical issues within the research design and procedure, and the use of special apparatus and materials, should not be ignored;
- i) to record and report observations honestly and to examine experimental approaches critically;
- j) to acknowledge accurately all sources of information used and assistance received and to ensure that all material complies with the Common Faculty Policy and Procedures on Plagiarism (see (d) below);
- k) to consult with the Head of Department if the candidate has a complaint about the adequacy of supervision or about any other matters affecting research (where the supervisor is the Head of Department, the candidate should consult with the Dean of Faculty);
- l) to keep accurate records of the supervisory process by a method arrived at by the mutual consent with the principal supervisor;
- m) to submit an annual progress report to the Registrar; and
- n) to register timeously every year and to pay the fees on time.

At the conclusion of the project it is the responsibility of the candidate:

- a) to follow the procedures laid down for preparation, submission and examination of the thesis;
- b) to take responsibility for stylistic presentation of the thesis, including grammar, spelling and punctuation. The supervisor should not be expected to check grammar, spelling, typographical errors, corrections of references, etc;
- c) to acknowledge accurately all sources of information used and information received;
- d) to check the thesis with text-matching software in order to avoid inadvertent instances of plagiarism.

### 3.5 The thesis

It is impossible, in a brief guide, to cover the actual writing of a thesis. There are diverse requirements for different disciplines and there are many guides (of varying quality) to the writing process. The supervisor and library references should be consulted for guidance. The Centre for Postgraduate Studies provides support to candidates regarding the writing and research process and provides support to supervisors in this regard through the *Strengthening Postgraduate Supervision* course.

### 3.5.1 Format and arrangement of contents

Candidates are required to make their own arrangements in respect of word processing facilities for preparing their theses.

Even though the University does not lay down any regulation regarding format, it is recommended that the A4 page size should be used and that the text should be prepared using one-and-a-half line spacing. Faculties and departments within Faculties may have their own preferred practice of the format and how the contents in a thesis should be arranged and this should be ascertained by the postgraduate candidate well in advance of preparation of the final version. It is thus essential that candidates discuss the format of their thesis with their supervisor(s) and that they consult recent theses submitted in their Department at the beginning of their research process. If the thesis is set out in a way which differs from the arrangement outlined below the rules should be carefully checked (for example, the placing of the abstract immediately after the title page is required).

An ORCID ID number must be included on the front page of the thesis below the candidate's name. An ORCID ID number will provide the candidate with a unique ID as a Rhodes University academic/ researcher so that you and your research activities are connected to one unique online research identity. Should you require assistance in obtaining an ORCID number, contact the Scholarly Communication Librarian at the Rhodes Library.

A thesis normally consists of the following components:

(a) Preliminaries

Title-page

The recommended form is as follows:

Title of the thesis.

A statement that the work is submitted in fulfilment/partial fulfilment (in the case of half theses) of the requirements for the appropriate degree of Rhodes University.

Full name of the candidate.

ORCID ID number

Month and year in which the thesis is submitted.

*(Examples of a title page are provided in Appendix F)*

Abstract

Every thesis must be accompanied by a double-spaced typewritten abstract in English of typically one page or normally not more than 350 words. In addition to the abstract written in the language of the thesis, candidates are invited to include an abstract translated into their home language if they choose to do so. If the thesis is in a language other than English, it must in addition be accompanied by an abstract in the language of the thesis. Neither references nor illustrative materials such as tables, graphs or charts should be included in the abstract. The abstract must be approved by the supervisor(s) of the thesis and on acceptance of the thesis will be submitted to the University's digital repository for publication and distribution.

The abstract **must** be placed immediately after the title page.

Table of contents

List of tables, figures, illustrations, plates.

Preface. This may include acknowledgements, if desired, and if acceptable to the candidate's department.

(b) Text

Introductory chapter

The text, appropriately divided into chapters, sections, and/or parts

Conclusion

(c) Reference materials

Appendices

References

Index

If a thesis is published as a book after its acceptance by the University, an index will almost certainly be necessary, but a candidate will rarely need to provide one at the examination stage.

### 3.5.2 Numbering of pages

It is usual to number the preliminary pages with lower-case Roman numerals (i, ii, iii, etc.), counting the abstract as the first page. The rest of the thesis should be numbered in one sequence of Arabic numerals (1, 2, 3, etc.).

### 3.5.3 Length of a Master's degree thesis

Except in exceptional circumstances approved by the Senate, the normal upper limit for Master's degree theses and the Master of Education degree by research is 50 000 words of text (approximately 150 A4 pages of one-and-a-half spaced typing excluding footnotes, illustrative material, reference list and appendices).

### 3.5.4 Length of a Doctoral degree thesis

The guideline for the upper length of a PhD thesis (excluding, footnotes, illustrative material, reference list and appendices) is 80 000 to 100 000 words. Candidates are cautioned against exceeding this length without careful consideration in consultation with their supervisor(s) on how the length might be viewed by their examiners.

### 3.5.5 Style guides, footnotes/endnotes and reference list

A candidate *must* follow a consistent and recognised style for the layout, footnotes/endnotes, referencing method and reference list. Departments may require candidates to adopt the style of a particular professional journal or to conform to the practice laid down by the department. All thesis writers should ascertain such requirements at the start of their research project to avoid unnecessary revision of work.

If a candidate's department does not specify a preferred style, the candidate should adopt an appropriate style from professional journals or guides to thesis writing.

Candidates who require assistance with aspects of thesis writing or production should consult their supervisor(s), Heads of Department or the Librarians.

## 3.6 Policies and Procedures for cases of plagiarism

In establishing this policy for Rhodes University, the faculties recognise that plagiarism by students in the preparation of assignments, practical reports and research projects is a longstanding problem. This problem is one that has in recent times been exacerbated both by the ease of access to information from the Internet and by a lack of understanding on the part of our incoming

7 Extract from the University's Common Faculty Policy and Procedures on Plagiarism, page 3.

students about how to use the works of others in an academic context. At Rhodes University, a university which measures itself against the highest international standards of academic and professional practice, we need a clear statement regarding what is and is not acceptable, which serves as a common policy across all faculties. " *Plagiarism*, in an academic, university context, may be defined as taking and using the ideas, writings, works or inventions of another, from any textual or internet-based source, as if they were one's own. This definition covers a wide range of misdemeanours such as: using the direct words of another without using quotation marks (even if the passage is referenced); the unacknowledged copying of a sentence or two of text; copying more extensive blocks of text; the syndication of a single piece of work by more than one student (unless the assignment task is a legitimate group assignment); the borrowing and using of another person's assignment (with or without their knowledge and permission); stealing an entire essay from another student or from the Internet; or infringing copyright." <sup>7</sup>

Please refer to the Common Faculty Policy and Procedures on Plagiarism for a breakdown of the policies and procedures for dealing with cases of plagiarism at the postgraduate level. An online version of this Policy and Procedures can be found at the following link:

<http://www.ru.ac.za/institutionalplanningunit/policies/policiesa-z/>

## 3.7 Submission and examination

### 3.7.1 Submission forms and examination process

A thesis may be submitted at any time during the year, but candidates must indicate their intention to submit a thesis by completing the online "Intention to submit" form (Appendix G) at least two months prior to submission for Master's and for Doctoral theses. This online form is available at: <https://ross.ru.ac.za/> Candidates who intend to submit a thesis for examination for consideration of the award of the degree at an April graduation ceremony must submit their thesis to the Registrar not later than the final date for thesis submission indicated in the academic calendar, or 1 July in the case of the MBA.

If a candidate cannot meet the annual deadline for submission, the University may be unable to have the examination completed in time for the next set of graduation ceremonies, which normally takes place in April each year.

It is the responsibility of candidates to decide when they are ready to submit their theses for examination (subject, of course, to the rule concerning the period of registration). In general, a candidate will be expected to submit the thesis only when their supervisor(s) agrees to its submission, but the University will not insist on the approval of the supervisor before accepting submission of the thesis for examination. The "Exam entry and supervisor's statement form" should be completed in which it is indicated whether the thesis was submitted with or without the approval of the supervisor (Appendix H), the online form is available at: <http://www.ru.ac.za/postgraduategateway/> It must be noted, however, that a thesis may be submitted for examination only once, though in certain circumstances the examiners may invite a candidate to revise and re-submit the thesis. The candidate is also responsible for completing the "Declaration form of own work" (Appendix I) when submitting the thesis for external examination. These forms are available at: <http://www.ru.ac.za/postgraduategateway/>. The declaration form of own work should not be bound into the thesis itself. Further details about the declaration form of own work is given in section 3.7.3.

At the time of submission for external examination, any pro-rata fees due (see section 5.1) will be debited to the candidate's account. The candidate's student fee account must be settled in full before the examination result can be released.

Every attempt is made to complete the examination process in as short a time as possible and in time for the next set of graduation ceremonies. However, the primary consideration is an entirely

fair yet comprehensive examination of the thesis, with emphasis on the maintenance of high standards. For this reason, the most appropriate and best examiners are chosen. So, while the University seeks to have the examination completed as quickly as possible, time is not an overriding consideration. The University is also unable to guarantee that the examiners will submit their reports by the recommended date. Examiner's reports should be received two weeks prior to the published deadline of when the final electronic Library copy is required for the student to graduate in that year. Should examiner's reports arrive after this deadline, they would be held by the Registrar's Division until after Graduation.

The Registrar will record the outcome of the examination and inform both the Supervisor and the candidate of the final decision of the examination of the thesis. It must be stressed that the University does not undertake to reach a decision on the award of a degree by any specific date.

Interference in the examination process in any way could invalidate the entire examination and the award of the degree. The nomination of examiners will not be disclosed to candidates. Only when a decision has been made about the award of the degree, will the names of the examiners be made known to candidates, and then only if the outcome is a positive one and provided the examiners have given their consent. The names of the examiners will not be released if the outcome is negative. Similarly, after a decision has been made, all or part of an examiner's report may be made known to candidates only if the examiner agrees to this.

It should be noted that there are specific rules for submission and the examination of the Master of Fine Arts. The relevant postgraduate candidates should consult with their supervisors and the guidelines of the Department of Fine Art.

### 3.7.2 Number of copies submitted for external examination

The number of copies required by the University for examination depends on the number of examiners appointed. For Master's theses at least two examiners are appointed and Senate requires that at least three examiners be appointed for a PhD. Normally three paper copies will be required for a Master's degree and four for a PhD. The Registrar's division will advise the candidate of the number of copies required. Should paper copies be required they should be suitably bound. Ring binding is the norm. There may also be a possibility of only submitting electronic copies. The Registrar's division will advise accordingly at the time when submission is required. Should the electronic copy of the thesis be required, it should preferably be submitted on a CD to the Registrar's division.

### 3.7.3 Declaration of originality

A thesis must be accompanied by a declaration on the part of the candidate as to the extent to which it represents their own work. Candidates are also required to submit a statement certifying that the thesis has not been submitted for a degree at any other university. A standard form for this purpose will be issued when candidates inform the Registrar that a thesis is to be submitted for examination. This form should be completed and returned when the thesis is submitted for examination. It should not be bound into the thesis itself. The declaration form of own work (Appendix I) is available at: <http://www.ru.ac.za/postgraduategateway/>

### 3.7.4 Final thesis submission requirements

Upon completion of the examination procedure, the library requires an electronic version (in PDF format) of the final corrected thesis for depositing in the University's digital repository. Depending on Faculty or Departmental requirements, you may be requested to submit additional bound print copies. These copies should only be produced once all corrections have been made and approved as agreed upon by the Faculty Board or the Committee of Assessors. To submit your final version complete the "Thesis Final Submission" form (Appendix J) which is available at:

<http://www.ru.ac.za/postgraduategateway/> The Thesis Final Submission form must be signed by the principal supervisor and/or Head of Department, stating that the electronic version of the thesis is a full and final version of the thesis. The PDF version of the thesis should:

- consist of a single file containing all the pages in correct order, including all annexures.
- not be encrypted or password protected.
- be the final corrected version of the thesis as submitted for degree purposes. Supervisors are encouraged to store a copy of the final version for at least a period of one-year, in the event that it is required.
- be submitted on a USB, CD or DVD with the candidate's details indicated on the cover.
- be submitted with the Final thesis submission form completed in full and signed by all parties.

The electronic copy (on USB, CD or DVD) of the final corrected thesis in PDF format, and "Final thesis submission forms" be secured in an A5 size envelope, with a copy of the title page affixed to the front of the envelope, should be submitted to the Registrar's division by a date published each year in order to graduate that year.

### 3.7.5 Copyright

All authors in South Africa, including writers of theses, are bound and protected by the Copyright Act 98 of 1978, which may be consulted in the University Library. In terms of this Act, the copyright of the thesis is vested in the writer.

However, according to Rules G.58 and G.71 if the thesis has not been published in a manner satisfactory to the Senate, the University shall have the right to make copies of the thesis from time to time for deposit in other universities or research libraries. The University may also make additional copies of it, in whole or in part, for the purposes of research. The University may, for any reason, either at the request of the candidate or on its own initiative, waive its rights. The conditions of access to a thesis are clearly indicated on the Thesis Final Submission form, which includes the following options: unrestricted open access; restricted/limited access for a maximum of two years or full embargo of the entire thesis for an agreed period.

## 3.8 Publication

One of the guidelines for the candidates is that the thesis should show that the candidate has made a significant and original academic contribution at the frontiers of a discipline or field. The work must be of a quality to satisfy peer review and merit publication<sup>8</sup> in a scholarly journal or book.

The University encourages the publication of work done for higher degrees, both at the Master's and Doctoral levels (with the supervisor as joint author, where appropriate). There is little point in doing research unless the findings of the research are communicated to other workers in the field for their information and assessment. Every attempt should thus be made to publish as much of the thesis material as possible.

Some theses may be suitable for publication in full as books. More often, papers will have to be prepared from suitably edited sections of the thesis. Where papers are submitted for publication in journals, every attempt should be made to have the papers published in recognised and accredited journals on the Department of Higher Education and Training (DHET) list of approved South African Journals, ISI Web of Science database, Science Citation Index Expanded, Social

---

8 Higher Education Qualifications Sub-Framework. 2013. Notice No. 549, Government Gazette No. 36721. 2 August, Pp. 40-41.

Science Index, Scopus, Scielo, the Norwegian Journal list, and the International Bibliography of Social Sciences (IBSS). A list of accredited journals may be found at the following link:

<http://www.ru.ac.za/research/research/publicationguidelines/>

It is the responsibility of the supervisor to encourage publication and work is often published jointly under the names of the candidate and the supervisor. In most departments it is accepted that if the research is not published by the candidate within a reasonable period the supervisor is entitled to publish the data and be cited as the first author.

A Doctoral thesis, accepted by the University and subsequently published in whatever form, must bear the inscription: "Thesis approved for the degree of Doctor of Philosophy of Rhodes University", or "Thesis approved in partial fulfilment of the degree of Doctor of Philosophy of Rhodes University", as the case may be. Similarly, an example of the inscription for a Master's thesis would be: "Thesis approved for the Master of Arts degree of Rhodes University".

Besides publication the University expects candidates to present papers at conferences. Postgraduate candidates should consult their supervisors in this regard. It is preferable that DHET accredited conferences are considered if the paper is published in conference proceedings.

### 3.9 Graduation

Graduation ceremonies normally take place during the short vacation in April each year. (The title 'Dr' and the letters MA, MSc, PhD, etc, may only be used after graduation either *in praesentia* or *in absentia*.)

Full particulars about graduation, including academic dress, are forwarded to successful candidates from February through March, following the letter from the Registrar announcing approval of the award of the degree. All enquiries about graduation should be directed to the Registrar's division.

To be permitted to graduate at the next ceremony candidates should have completed their corrections and have submitted the corrected (library) electronic copy of their thesis by a date published by the Registrar. The final submission date is usually 2 weeks prior to graduation. Submitting after this deadline means that the candidate would graduate the following year.

---

8 Higher Education Qualifications Sub-Framework. 2013. Notice No. 549, Government Gazette No. 36721. 2 August, Pp. 40-41.

# 4 RESEARCH RESOURCES AVAILABLE

Research is impossible without access to information. Rhodes University offers three primary ways of doing so: through use of the Library, through the provision of computing facilities available to candidates and through the Centre for Postgraduate Studies.

## 4.1 Centre for Postgraduate Studies

The Centre for Postgraduate Studies (CPGS) has been established to strengthen quality, throughput and access to postgraduate studies.

It provides additional support to postgraduate scholars in areas of research design, academic writing, and in other areas of postgraduate life and scholarship. Annually the CPGS offers a series of enrichment seminars and workshops on issues relevant to postgraduate scholars, including academic writing courses, writing retreats, writing groups and short courses. Please visit the CPGS website <https://www.ru.ac.za/postgraduategateway/> to find out about all that is on offer. All postgraduate scholars at RU are free to attend the courses and the programmes on offer by the CPGS.

The CPGS will attempt to assist all postgraduate scholars and supervisors with issues related to postgraduate study though this may entail them directing queries elsewhere. The CPGS does not deal with registration, examination and graduation related matters for postgraduates, as these are dealt with by the Registrar's division. Additionally, the CPGS does not deal with supervision or discipline specific academic matters as these are dealt with by Departments and Faculties. Scholarships are dealt with by the Research Office.

## 4.2 The Library

The Rhodes library has the largest and most extensive library collection in the Eastern Cape and subscribes to many electronic collections.

The library has full-text access to a large number of electronic journals via subscriptions and various databases, and it makes use of a wealth of evaluated resources which are available on the Internet.

For a comprehensive list of its resources and a detailed description of the services which the library offers, visit their homepage at: <http://www.ru.ac.za/library/>

Off-campus access is available to authorized Rhodes users, provided they have registered at the Library for the current year. For off-campus access, you will need to provide your Rhodes borrower barcode NUMBER, which is the 8-digit number that appears on the reverse side of your Rhodes Library / Student / Staff card, and PIN to access these resources. (Set up a PIN under the Catalogue Option: [My Library Record](#) on OPAC). If any problems are experienced, contact the Faculty librarians or telephone (046) 603-8463. It is important to note that the candidate's name and

student number should be quoted when seeking assistance. Some databases may be accessed on-campus only due to publisher licensing restrictions.

Prospective postgraduate candidates are required to register before they are entitled to Library privileges.

### 4.3 Information Technology

The Information Technology Division is responsible for providing and supporting the University's Internet connection, internal network, and central resources such as email, file and print services, learning management systems, computer labs, etc. It also provides computer resources and user support to all departments and researchers at the University.

The University is connected to the South African National Research Network (SANReN), a Department of Science and Technology (DST) initiative to provide high-speed Internet access to research and education sites. All staff and students are able to access the Internet at no additional charge, subject to usage quotas.

There are a number of public computer laboratories on campus from which students can access the network, several of which are open 24 hours a day. The Library also has extensive computing resources available to students, with some reserved specifically for postgraduate use.

The Student Network service provides a way for both undergraduate and postgraduate students to connect their privately-owned devices (computers, laptops, phones, etc) to the University's network and to the Internet. It is available in all residences rooms, selected private flat complexes close to campus, and at wireless hotspots throughout the campus. The service also provides access to eduroam, a world-wide wireless roaming service for research and education.

In addition, with the consent of their department, postgraduate students may register their personal devices for use in their department, a privilege that is not generally afforded to undergraduates.

## 5

# FINANCIAL MATTERS

## 5.1 The costs involved

There is an annual fee for a higher degree which includes the cost of examination. These fees change annually. The current fee information may be obtained from the Student Fees webpage available at: <http://www.ru.ac.za/studentfeesandfinancialaid/>

Candidates must pay the annual registration fee each year until the completion of the degree *even if they make no call on a supervisor's time in any particular year.*

Master's and Doctoral candidates must pay the initial fee to register. Details are available in the Student Fees booklet at <http://www.ru.ac.za/studentfeesandfinancialaid/> Candidates who wish to make payment arrangements should contact the Student Fees Office at [studentfees@ru.ac.za](mailto:studentfees@ru.ac.za). Please also note that the re-registration of returning Master's and Doctoral candidates can only be processed if there is no outstanding balance on the fees account from the previous year. A late registration fee will be charged from 15 February.

Returning candidates, in good research standing, who are experiencing financial challenges are encouraged to meet with the Finance Division Fees Office in order to explore and discuss options with will enable registration.

If, in their final year, Master's and Doctoral candidates fail to make the deadline for the submission of the thesis, a pro-rata amount of the annual registration fee is charged, provided the thesis is handed in before the end of June the following year. (For example, if a Doctoral thesis is handed in during March the registration fee for the year will be a quarter of the annual registration fee.) If the thesis is handed in after 1 July the full annual registration fee is payable. **It must be noted that this paragraph relates to financial penalties only: if the official deadline for submission is not met, there is a strong possibility that the thesis may not be examined in time for graduation at the following round of graduation ceremonies.**

## 5.2 Funding for Master's and Doctoral degrees

Rhodes University has set up several scholarship programmes in order to attract excellent students and researchers to further their studies at postgraduate level. The Atlantic Philantropies, Allan Gray Senior Scholarships, Henderson Scholarships and the Rhodes University Postgraduate Scholarships are the cornerstone of this programme. Scholarships from the the Andrew Mellon Foundation Scholarships are linked to research projects led by staff.

Smaller bursaries are on offer and are on a merit and/or financial need basis. Students can also apply for a study loan or Rhodes University Council loan. Sureties are required for the loans and 'needs tests' are required. These loans are available to those students who are registering full-time and would normally not be able to study if it were not for the assistance of these loans to assist with their tuition costs.

Further funding for postgraduate study is made available through external organisations such as: National Research Foundation, Water Research Council, Medical Research Council and other funding bodies by way of individual bursaries or project linked bursaries.

Information on funding opportunities can be obtained from: <http://www.ru.ac.za/research/postgraduates/funding/> and enquires can be directed to [pgfunding@ru.ac.za](mailto:pgfunding@ru.ac.za).

## 6

# THE EXAMINATION OF A MASTER'S DEGREE THESIS

The examination procedure for a Master's degree differs from that for a Doctoral degree. This section sets out the procedure for Master's degrees, and, so far as students are concerned, is given for information only. Candidates are not in any way involved with the examination process. The guidelines for the examination of Master's degrees are provided in Appendices K and L.

## 6.1 Role of Supervisors, Heads of Departments and Deans

### 6.1.1 Role of supervisor

Supervisors are required to:

- a) Provide the Head of Department with the names and details of potential examiners of the thesis. This should be done prior to the candidate submitting the thesis for examination and within 3 weeks of the Registrar's Division's call for the nomination of examiners.
- b) Indicate whether or not they approve of the submission of the thesis for examination.
- c) If required, to participate in consultative discussions with the HoD, Dean and Deputy Vice-Chancellor: Research and Development in respect of the outcome of the examination of the thesis.
- d) Disclose the outcome of the examination of the thesis to the candidate having received such outcome from the Registrar's Division. The Registrar's Division will also inform the candidate of the outcome; this will be done after the supervisor has been informed and following elapse of the prescribed period of time.

Supervisors must not:

- a) Discuss the names of possible examiners with candidates. Supervisors use their discretion as to whether or not they discuss with candidates, without naming any particular examiner, possible examiners' scholarship, *inter alia*, area of scholarship or preferred research methodology or area of fieldwork.
- b) Disclose the names of the examiners to candidates.
- c) Send electronic copies of the thesis under examination to the examiners (this is done by the Registrar's Division).
- d) Discuss the thesis under examination with the examiners.
- e) Query the progress of the examination of the thesis with the examiners. This is the responsibility of the Registrar's Division.
- f) Request or receive examiner reports. If reports are received by supervisors, such reports must be submitted immediately to the Registrar's Division and the examiner informed that all communications regarding the examination of the thesis should be with the Registrar's Division.
- g) Initiate discussions about or contest the outcome of the examination of the thesis unless within the consultative discussions with the HoD, Dean and Deputy Vice-Chancellor: Research and Development.

### 6.1.2 Role of Heads of Department

Heads of Departments are required to:

- a) Make recommendations to the Dean on the examiners of the thesis. This should be done prior to the candidate submitting the thesis for examination and within 3 weeks of the Registrar's Division's call for the nomination of examiners.
- b) Collate the reports of the examiners and make a recommendation to the Dean in respect of the outcome of the examination of the thesis.
- c) If required, to participate in consultative discussions with the supervisor, Dean and Deputy Vice-Chancellor: Research and Development in respect of the outcome of the examination of the thesis.

Heads of Departments must not:

- a) Discuss the names of possible examiners with candidates.
- b) Disclose the names of the examiners to candidates.
- c) Send electronic copies of the thesis under examination to the examiners (this is done by the Registrar's Division).
- d) Discuss the thesis under examination with the examiners.
- e) Query the progress of the examination of the thesis with the examiners. This is the responsibility of the Registrar's Division.
- f) Request or receive examiner reports. If reports are received by Heads of Departments, such reports must be submitted immediately to the Registrar's Division and the examiner informed that all communications regarding the examination of the thesis should be with the Registrar's Division.
- g) Disclose the outcome of the examination of the thesis to the candidate. This is the responsibility of the Registrar's Division.

### 6.1.3 Role of Deans

Deans are required to:

- a) Discuss the appointment of examiners with supervisors/Heads of Departments, should supervisors/Heads of Departments so request. In many cases, supervisors/Heads of Departments need to exercise judgement in the appointment of examiners, for example, the extent of spread of examiners, the extent of conflict between a potential examiner and the student/supervisor, the extent of previous collaborative experience. In such instances, full disclosure is recommended, as is discussion with the Dean.
- b) Approve the examiners of the thesis.
- c) Make a decision in respect of the outcome of the examination of the thesis which may involve discussion with the Deputy Vice-Chancellor: Research and Development, the examiners, as well as consultative discussions with the supervisor and Head of Department. In extreme cases, the Dean and Deputy Vice-Chancellor: Research and Development are required to request the Vice-Chancellor to make a final decision in respect of the outcome of the examination of the thesis.

Deans must not:

- a) Discuss the names of possible examiners with candidates.
- b) Disclose the names of the examiners to candidates.
- c) Send electronic copies of the thesis under examination to the examiners (this is done by the Registrar's Division).

- d) Query the progress of the examination of the thesis with the examiners. This is the responsibility of the Registrar's Division.
- e) Request or receive examiner reports. If reports are received by Deans, such reports must be submitted immediately to the Registrar's Division.
- f) Disclose the outcome of the examination of the thesis to the candidate. This is the responsibility of the Registrar's Division.

#### 6.1.4 Role of the Registrar's Division

The Registrar's Division is required to:

- a) Following receipt of intimation of submission of a thesis for examination, call for the nomination of examiners and follow up (with the supervisor, Head of Department and Dean) on any unheeded calls.
- b) Ensure that examiners are formally appointed by the relevant faculty.
- c) On receipt of the thesis, despatch the thesis and ensure that the thesis is received by the examiners.
- d) Following elapse of the prescribed period of time for the examination of the thesis, ensure that all reports are received, and follow up on any outstanding examiners' reports.
- e) Following receipt of all the examiners' reports, send a collated set of reports to the Head of Department (or the Dean if the Head of Department is the Supervisor) for recommendation and decision, and follow up (with the Head of Department, Dean) on any outstanding decisions. Note that should the thesis have been submitted without the approval of the supervisor, that the Dean or the Dean's nominee be so informed and sent a copy of the supervisor's report.
- f) The Registrar's Division will inform the candidate of the outcome of the examination process after the supervisor has been informed and following elapse of the prescribed period of time.
- g) Receive and process the final e-copy of the thesis.
- h) Advise the examiners of the outcome of the examination process.

## 6.2 Appointment of examiners

### 6.2.1 Full theses

In all cases the most appropriate examiners should be chosen, and with particular care when the thesis is multidisciplinary, or has some local applicability. The nomination and appointment of external examiners may not be disclosed to candidate. The online form for the appointment of external examiners is available at: <https://ross.ru.ac.za/>

Examiners of a master's thesis must themselves be in possession of at least a Master's degree or equivalent. (Learning equivalence in this context is exceptional and requires strong motivation. In the event that a proposed examiner is not in possession of a relevant Master's degree, a detailed motivation must accompany the nomination.)

The different examiners for a particular thesis should normally themselves have graduated from different institutions.

Repeated use of the same examiner should normally be avoided.

Examiners should not be used for longer than three consecutive years without a motivation from the Head of Department.

Two examiners, external to the University, are appointed by the Faculty Board for each candidate. Normally two examiners from the same institution should not be appointed; at least one of the

examiners should be a member of academic or research staff at a University or recognised research institute and, preferably and where appropriate, at least one should be from outside South Africa or have demonstrated an international research standing.

The supervisor(s) shall be excluded from examining.

Previous postgraduate students and members of staff of Rhodes University should not be appointed as examiners within three years of having graduated from or within three years of having left the staff of Rhodes University.

Normally examiners should not have had any previous collaborative research or supervisory interaction with the candidate in the context of the study being examined. Where such interaction is known to have occurred between the candidate and an examiner, this must be reported to the Dean of the Faculty who shall determine whether or not the examiner should be appointed in that particular instance.

Examiners who are in a current or past close relationship of a family, personal, business, or serious conflict nature with either the candidate or supervisor(s), are automatically excluded. Where there is any doubt about such a relationship precluding the eligibility of an examiner, this should be reported to the Dean.

Examiners should have no communication with the candidate, relating to the thesis or examination thereof, until the process is complete, that is, at the time the final decision is made, and the candidate has been officially informed of the outcome.

#### 6.2.2 Half theses

In the case of a Master's degree undertaken by coursework and half thesis, normally two examiners, external to the University, are appointed by the Faculty Board for each candidate. In some Faculties one of the examiners may be internal to the University. Other conditions relating to the appointment of examiners for full theses are as above.

#### 6.2.3 Confidentiality of examiners

From the outset of the examination process, the examiners will be informed that their identity and reports will normally be revealed to the candidate at the end of the examining process, that is, at the time the final decision is conveyed to the candidate. The examiner may request otherwise, and the Dean in consultation with the Vice-Chancellor, may agree to withhold the identity of the examiner and/or the whole or part of the report with good cause.

### 6.3 Supervisor's report

At the time of submission of a thesis, the supervisor is required to indicate whether the thesis has been submitted with his/her approval. If the supervisor does not approve the submission of the thesis, the supervisor is required to submit a report to the Registrar, at the time of the thesis submission. This report is intended to document the circumstances of the submission, the reason(s) for declining approval for submission, and to protect the reputations of the supervisor and the institution. It will be used as detailed in 6.5, but will not normally be made available to the examiners, and certainly not before they have submitted their independent reports on the thesis. If required, at the end of the examination process, the examiners may be informed whether the thesis was submitted with or without the approval of the supervisor. This will normally be done in a case where the thesis has been critiqued in some significant way by an examiner or examiners.

## 6.4 Recommendations open to examiners

The recommendations open to examiners include:

- a) Acceptance of the thesis and award of the degree, with or without distinction to the candidate, and that no corrections need to be made to the thesis.
- b) The candidate be awarded the degree, but minor corrections (e.g. spelling, typing, references) should be made to the satisfaction of the supervisor and/or Head of Department).
- c) The candidate should be awarded the degree after identified changes have been made to the satisfaction of the supervisor and/or Head of Department.
- d) Although the thesis does not meet the required standard, the candidate should be invited to do further work if necessary, revise and resubmit the thesis for re-examination by the examiners.
- e) The candidate should submit to an oral or written examination on the subject of his or her thesis and/or on the whole field of study which it covers.
- d) The degree should not be awarded to the candidate.

In addition, examiners will be asked for a formal report on the thesis which should be sufficiently detailed to allow the Dean to reach an informed judgement.

## 6.5 Collation of examiners' reports

Normally the Head of Department will collate the examiners' reports and the supervisor's report (if applicable), and make a formal recommendation to the Dean on the result of the examination without consultation with the supervisor. Where the Head of Department is directly involved (as a supervisor and/or examiner), the Dean (or the Deputy Dean if the Dean is directly involved), or the Deputy Vice-Chancellor: Research & Development, or a senior member of the department nominated by the Dean (normally in that order of selection) will perform this task, so ensuring that the responsibility does not fall to someone who has acted as supervisor or examiner. The recommendation will be forwarded to the Dean or Deputy Dean of the Faculty. In a case where the thesis has been submitted without the approval of the supervisor, the Registrar will also alert the Dean or Dean's nominee to this fact, and furnish him/her in confidence with a copy of the supervisor's report.

## 6.6 Procedure to be followed by the Dean (or Deputy Dean)

### 6.6.1 Following unanimous agreement by the examiners

#### 6.6.1.1 Thesis not referred back to the candidate

If there is unanimity amongst the examiners and no reason to refer the thesis back to the candidate for revision, the Dean (or Deputy Dean if the Dean is the supervisor) of the Faculty may accept the recommendations and approve the award of the degree, with or without distinction (see 6.7), on behalf of the Faculty Board. Such decisions shall be submitted to the next meeting of the Faculty Board for noting. The Registrar then immediately informs the successful candidate and the supervisor of the approval of the award of the degree.

#### 6.6.1.2 Thesis referred back to the candidate for minor correction and/or revision

If there is unanimity amongst the examiners that the degree should be awarded and no reason to refer the thesis back to the candidate for major revision, but some minor correction or revision has been suggested, the Dean (or Deputy Dean if the Dean is the supervisor) of the Faculty may accept the recommendations, subject to the candidate considering the examiners' suggestions and making the appropriate changes to the satisfaction of one of the following: (a) the supervisor;

(b) the supervisor and/or Head of Department; (c) the Head of the Department; (d) the examiners. (The most frequent recommendation is that corrections be made to the satisfaction of the both the supervisor and the Head of Department.)

After being assured that the appropriate changes have been made, the Dean or Deputy Dean shall approve the award of the degree, with or without distinction (see 6.7), on behalf of the Faculty Board. Such decisions shall be submitted to the next meeting of the Faculty Board for noting. The Registrar shall then immediately inform the successful candidate and the supervisor of the approval of the award of the degree.

#### 6.6.1.3 Thesis referred back to candidates for major revision

If the examiners indicate that the degree should not be awarded and that it be referred back to the candidate for major revisions, the Dean (or Deputy Dean if the Dean is the supervisor) of the Faculty will advise the Registrar accordingly. The Registrar will send letters clearly indicating that revisions are required to the candidate, the Head of Department and the supervisor.

The candidate may be required to re-register for the duration of the process (a pro rata fee will be charged where appropriate). Once completed, the original examiners may be required to re-examine the thesis after revision.

#### 6.6.1.4 Thesis Rejected (failed)

In cases where the examiners recommend rejection of the thesis, General Rule 59.1 states that an application to resubmit a Master's thesis which has been rejected (failed) shall not be allowed, but that Senate may, on the advice of the examiners, invite a candidate to re-submit a thesis in a revised or extended form. Candidates taking up the offer to resubmit need to inform the Registrar in writing of their anticipated date of handing in the revised thesis and complete the relevant forms afresh.

### 6.6.2. Following a lack of agreement amongst examiners

If there is lack of agreement among the examiners, the Dean (or Deputy Dean if the Dean is the supervisor) and the Head of Department shall determine whether or not the degree should be awarded or whether further negotiation with the examiners is necessary. If the Dean and the Head of Department agree that further negotiations are not necessary, the Dean shall recommend the award or the rejection of the degree in terms of the procedures outlined in 6.6.1. Should the Dean and the Head of Department fail to agree, the Dean (or Deputy Dean if the Dean is the Supervisor), and the Deputy Vice-Chancellor: Research & Development shall determine whether or not the degree should be awarded or whether further negotiation with the examiners is necessary. If the Dean and the Deputy Vice-Chancellor: Research & Development agree that further negotiations are not necessary, the Dean shall recommend the award or rejection of the degree in terms of the procedures outlined in 6.6.1. Should the Dean and the Deputy Vice-Chancellor: Research & Development fail to agree, an arbiter may be appointed by the Faculty Board, or by the Dean or Deputy Dean acting on behalf of the Faculty Board. The arbiter shall receive a copy of the original thesis and of all the reports, and shall be required to make a recommendation as to whether or not the degree should be awarded. The Dean or Deputy Dean shall make the final decision, which normally shall follow the arbiter's recommendation. In the event of the Dean or Deputy Dean declining to follow the arbiter's decision, the matter shall be referred to the Vice-Chancellor, whose decision shall be final.

## 6.7 Award of the degree with distinction

### 6.7.1 Specific criteria for the award of a distinction

The University reserves the award of a distinction for work of outstanding merit, while recognising that the Master's degree represents not more than one or two years' full-time research, and is, in many instances, the first research experience of the candidate. When recommending a distinction, examiners are asked to look for evidence of real methodological and conceptual skills, clarity in exposition and development of argument, sound judgment, originality of approach and some contribution to knowledge, but not necessarily to expect total coverage of a major problem or a substantial breakthrough in a new area. The thesis must also reflect literary skills appropriate to the subject.

### 6.7.2 Procedure for the award of a distinction

If all examiners agree that the degree be awarded with distinction, the recommendation forwarded to the Dean or Deputy Dean (see section 6.5) shall be accepted accordingly. Normally if one examiner objects to the award of a distinction, no distinction will be considered. However, where one examiner recommends a distinction and the other indicates that he or she would not object to a distinction being awarded, the Dean (or Deputy Dean if the Dean is the Supervisor) shall, after consultation with the Head of Department determine whether or not the degree should be awarded with distinction or whether further negotiation with the examiners is necessary to reach consensus. If the Dean and the Head of Department agree that further negotiations are not necessary, the Dean shall recommend the award of the degree with or without the distinction, as per their agreement. Should the Dean and the Head of Department fail to agree, an arbiter shall be appointed by the Faculty Board, or by the Dean or Deputy Dean acting on behalf of the Faculty Board. The arbiter shall receive a copy of the thesis and of all the reports, and shall be required to make a recommendation as to whether or not the degree should be awarded with distinction. The Dean or Deputy Dean shall make the final decision, which normally shall follow the arbiter's recommendation. In the event of the Dean declining to follow the arbiter's decision, the matter shall be referred to the Vice-Chancellor, whose decision shall be final.

For a distinction to be awarded for the degree, in the case of degree by course work and half theses, the candidate should have obtained a sub-minimum of 70% for both the course work, and the half thesis. The combined mark should be 75% or more.

### 6.7.3 Revised thesis

A Master's degree will normally not be awarded with distinction to a candidate whose thesis has been re-examined after revision.

## 6.8 Corrections to thesis

Corrections, whether as a condition for the award of the degree or a re-submission for re-examination, should be completed within a period not exceeding six months from the date of the letter communicating the outcome of the examination to be regarded as being part of the examination period. Any corrections taking longer than six months require the candidate to be re-registered for the degree.

## 6.9 Submission of final copy of thesis

Once the examination process is complete and the degree awarded, the candidate must submit one electronic copy (on USB, CD or DVD) in PDF format of the final thesis (that is, the examined

thesis with any such corrections having been made to it as recommended by the examiners and as approved by the (a) the supervisor or (b) the supervisor and Head of Department or (c) the Head of Department or (d) the examiners) to the Registrar by a date published each year in order to graduate that year.

The electronic copy will be deposited in the University's digital repository to enable world-wide access. Failure to submit a revised copy of the thesis by the date published means that the candidate would graduate the following year. The number of copies of the revised thesis required by the Department in each Faculty should be clarified with the supervisor.

## 6.10 Subsequent Procedures

The Registrar shall advise the examiners of the outcome and, where the Vice-Chancellor decides this should be done, the reasons for the decision.

## 7

# THE EXAMINATION OF DOCTORAL THESIS

The guidelines for examiners for the degree of Doctor of Philosophy are provided in Appendix M.

## 7.1 Role of Supervisors, Heads of Departments and Deans

### 7.1.1 Role of supervisors

Supervisors are required to:

- a) Provide the Head of Department with the names and details of potential examiners of the thesis. This should be done prior to the student submitting the thesis for examination and within 3 weeks of the Registrar's Division's call for the nomination of examiners.
- b) Indicate whether or not they approve of the submission of the thesis for examination.
- c) Attend meetings of the Committee of Assessors, if invited.
- d) Disclose the outcome of the examination of the thesis to the candidate having received such outcome from the Registrar's Division. The Registrar's Division will also inform the candidate of the outcome; this will be done after the supervisor has been informed and following elapse of the prescribed period of time.

Supervisors must not:

- a) Discuss the names of possible examiners with candidates. Supervisors use their discretion as to whether or not they discuss with candidates, without naming any particular examiner, possible examiners' scholarship, *inter alia*, area of scholarship or preferred research methodology or area of fieldwork.
- b) Disclose the names of the examiners to candidates.
- c) Send electronic copies of the thesis under examination to the examiners (this is done by the Registrar's Division).
- d) Discuss the thesis under examination with the examiners.
- e) Query the progress of the examination of the thesis with the examiners. This is the responsibility of the Registrar's Division.
- f) Request or receive examiner reports. If reports are received by supervisors, such reports must be submitted immediately to the Registrar's Division and the examiner informed that all communications regarding the examination of the thesis should be with the Registrar's Division.
- g) Initiate discussions about or contest the outcome of the examination of the thesis unless as part of discussions of the Committee of Assessors, if invited to attend.

### 7.1.2 Role of Heads of Departments

Heads of Departments are required to:

- a) Make recommendations to the Dean on the examiners of the thesis. This should be done prior to the student submitting the thesis for examination and within 3 weeks of the Registrar

Division's call for the nomination of examiners.

- b) As a member of the Committee of Assessors, participate in the discussions of the Committee.

Heads of Departments must not:

- a) Discuss the names of possible examiners with candidates.
- b) Disclose the names of the examiners to candidates.
- c) Send electronic copies of the thesis under examination to the examiners (this is done by the Registrar's Division).
- d) Discuss the thesis under examination with the examiners.
- e) Query the progress of the examination of the thesis with the examiners. This is the responsibility of the Registrar's Division.
- f) Disclose the outcome of the examination of the thesis to the candidate. This is the responsibility of the Registrar's Division.

### 7.1.3 Role of Deans

Deans are required to:

- a) Discuss the appointment of examiners with supervisors/Heads of Departments, should supervisors/Heads of Departments so request. In many cases, supervisors/Heads of Departments need to exercise judgement in the appointment of examiners, for example, the extent of spread of examiners, the extent of conflict between a potential examiner and the student/supervisor, the extent of previous collaborative experience. In such instances, full disclosure is recommended, as is discussion with the Dean.
- b) Recommend for approval the examiners of the thesis.
- c) Constitute and, if necessary, convene a meeting of the Committee of Assessors.
- d) Chair the meeting of the Committee of Assessors and report to the Registrar and Vice-Chancellor on the outcome of the examination of the thesis as determined by the Committee of Assessors.
- e) As Chair of the Committee of Assessors, provide final approval for any changes made to the thesis.

Deans must not:

- a) Discuss the names of possible examiners with candidates.
- b) Disclose the names of the examiners to candidates.
- c) Send electronic copies of the thesis under examination to the examiners (this is done by the Registrar's Division).
- d) Query the progress of the examination of the thesis with the examiners. This is the responsibility of the Registrar's Division.
- e) Request or receive examiner reports. If reports are received by Deans, such reports must be submitted immediately to the Registrar's Division.
- f) Disclose the outcome of the examination of the thesis to the candidate. This is the responsibility of the Registrar's Division.

### 7.1.4 Role of the Registrar's Division

The Registrar's Division is required to:

- a) Following receipt of intimation of submission of a thesis for examination, call for the nomination of examiners and follow up (with the supervisor, Head of Department and Dean) on any unheeded calls.

- b) Ensure that examiners are formally appointed by the relevant faculty/Senate.
- c) On receipt of the thesis, despatch the thesis and ensure that the thesis is received by the examiners.
- d) Following elapse of the prescribed period of time for the examination of the thesis, ensure that all reports are received, and follow up on any outstanding examiners' reports.
- e) Following receipt of all the examiners' reports, send a collated set of reports to the Dean or the Dean's nominee for recommendation by the Committee of Assessors. Note that should the thesis have been submitted without the approval of the supervisor, that the Dean or the Dean's nominee be so informed and sent a copy of the supervisor's report.
- f) Await the final decision of the Vice-Chancellor, and follow up (with the Dean) on any outstanding decisions.
- g) The Registrar's Division will inform the candidate of the outcome of the examination process after the supervisor has been informed and following elapse of the prescribed period of time.
- h) Receive and process the final e-copy of the thesis.
- i) Advise the examiners of the outcome of the examination process.

## 7.2 Appointment of examiners

- a) The Registrar will call for the nomination of at least three examiners, external to the University, for approval by the Senate.

In all cases the most appropriate examiners should be chosen, and with particular care when the thesis is multidisciplinary, or has some local applicability. The nomination of examiners should not be disclosed to the candidate.

Normally two examiners from the same institution should not be appointed; at least two of the examiners should be members of academic or research staff at a University or recognised research institute and, preferably and where appropriate, at least two should be from outside South Africa or have demonstrated an international research standing. Preferably there should be a spread in the selection of examiners over a three year period in a particular department i.e. it is preferable that supervisors do not use the same examiners within a three year period unless with the permission of the Dean.

Examiners of a doctoral thesis must themselves be in possession of a doctoral degree or equivalent. In the event that a proposed examiner is not in possession of a doctoral degree, a detailed motivation must accompany the nomination for the use of that specific examiner. Examiners for a particular thesis should normally have received their doctoral degree from different institutions.

Supervisors shall be excluded from examining.

Previous postgraduate students and members of staff of Rhodes University should not be appointed as examiners within three years of having graduated from or within three years of having left the staff of Rhodes University.

Normally examiners should not have had any previous collaborative research or supervisory interaction with the candidate in the context of the study being examined. Where such interaction is known to have occurred between the candidate and an examiner, this must be reported to the Registrar who, together with Dean of the Faculty, shall determine whether or not the examiner should be appointed in that particular instance.

Examiners who are in a current or past close relationship of a family, personal, business, or serious conflict nature with either the candidate or supervisor(s), are automatically excluded. Where there is any doubt about such a relationship precluding the eligibility of an examiner, this should be reported to the Dean.

Examiners should have no communication with the candidate, relating to the thesis or examination thereof, until the process is complete and the candidate has been officially informed of the outcome.

- b) The Registrar will submit the names of examiners to the appropriate Faculty and to Senate Executive and Senate for approval.
- c) When examiners are invited to act they will be informed that if they accept the invitation any contact with other examiners or the Head of Department must take place only through the Registrar.
- d) In the event that an examiner is unable to act, the Registrar will require further nominations from the supervisor, for consideration by the Head of Department and Dean and for approval by the appropriate faculty, Senate Executive and Senate.

#### 7.2.1 Confidentiality of examiners

From the outset of the examination process, the examiners will be informed that their identity and/or reports will normally be revealed to the candidate at the end of the examining process. The examiner may request otherwise, and the Chair of the COA in consultation with the Vice-Chancellor, may agree to withhold the identity of the examiner and/or the whole or part of the report for good cause.

### 7.3 Supervisor's report

At the time of submission of a thesis, the supervisor is required to indicate whether the thesis has been submitted with his/her approval. If the supervisor does not approve the submission of the thesis, the supervisor is required to submit a report to the Registrar, at the time of the thesis submission. This report is intended to document the circumstances of the submission, the reason(s) for declining approval for submission, and to protect the reputations of the supervisor and the institution. It will be used as detailed in 7.5, but will not normally be made available to the examiners, and certainly not before they have submitted their independent reports on the thesis. If required, at the end of the examination process, the examiners may be informed whether the thesis was submitted with or without the approval of the supervisor. This will normally be done in a case where the thesis has been critiqued in some significant way by an examiner or examiners.

### 7.4 Report form for examiners

Examiners will be asked for a recommendation on the thesis by indicating one of the following:

- a) that the candidate be awarded the degree and no corrections need be made to the thesis;
- b) that the candidate should be awarded the degree after minor corrections and/or specified changes have been made to the satisfaction of the supervisor and/or Head of Department;
- c) although the thesis does not meet the required standard, the candidate should be invited to do further work if necessary, revise and resubmit the thesis for re-examination by the examiners;
- d) the degree should not be awarded to the candidate.

In addition, examiners will be asked for a formal report on the thesis which should be sufficiently detailed to allow the COA to reach an informed judgement.

## 7.5 Committee of assessors and procedure on receipt of examiners' reports

The Dean of the relevant Faculty shall approve a Committee of Assessors (COA) for each candidate immediately after the external examiner reports have been submitted.

The COA shall consist of:

- i) The relevant Dean (or nominee of the Dean) who shall chair the COA.
- ii) Two or three chosen by the Dean from a permanent group of core members. These permanent members should be academic staff from the relevant Faculty normally with proven experience as supervisors and examiners at the PhD level, and are to be elected by each Faculty normally for three-year, renewable terms of office. In the case of the Faculty of Science and the Faculty of Commerce, the members of the COA are not permanent and are drawn from different departments that can be considered to be cognate to the department from that of the thesis being examined. COA members should normally have proven experience as supervisors and examiners at the PhD level.
- iii) The Head of Department (HOD), or if the HOD is a core member, a nominee of the HOD.
- iv) If required, one or two members with experience in the subject area of the thesis.

The supervisor may be present for discussion in portions of meetings, and may participate in the discussion, if required, but shall not be a voting member of the COA. Before the final decision of the COA is made, supervisors must recuse themselves from the meeting.

When all the examiners' reports have been received, the Registrar will collate and send them to the relevant Dean or Dean's nominee who shall forward the reports to the COA for their recommendation. In a case where the thesis has been submitted without the approval of the supervisor, the Registrar will also alert the Dean or Dean's nominee to this fact, and furnish him/her in confidence with a copy of the supervisor's report.

A formal meeting of the COA must be constituted if there is any major disagreement by the members of the COA in terms of these recommendations.

The COA should report to the Registrar and Vice-Chancellor within two weeks of receipt of the examiners' reports. The report must list one of the following recommendations:

- a) the degree be awarded;
- b) the degree be awarded but that minor corrections be made to the thesis. Those corrections should not delay the award of the degree;
- c) the candidate should be awarded the degree subject to completing any specified changes to the thesis, to the satisfaction of the relevant supervisor and/or Head of Department with the final approval by the Chair of the COA;
- d) although the thesis does not meet the required standard, the candidate should be invited to do further work if necessary, revise and resubmit for re-examination by the examiners; (it must be pointed out to the candidate that this may be done only once);
- e) the degree should not be awarded to the candidate.

In the event of major disagreement between the examiners, the Chair of the COA should explore the possibility of reaching consensus, if necessary by sending all the unnamed examiners' reports to each examiner for further consideration. If consensus appears unlikely, the COA may recommend one or more of the following procedures, but when the examiners disagree and at least one

examiner recommends (d) or (e), the COA shall recommend one or more of the following procedures:

- a) the appointment of a fourth examiner, who would be invited in the usual manner to examine the original thesis;
- b) the appointment of an external assessor who would read the thesis and all the (unnamed) examiners' reports and would report on the thesis;
- c) the candidate should submit to an examination on the subject of their thesis and on the whole field of study which it covers;
- d) that the thesis be revised and re-examined by the dissenting examiner(s);
- e) the degree not be awarded.

In a case where the thesis has been submitted without the approval of the supervisor, and a supervisor's report has been prepared as outlined in section 7.3, a formal meeting of the COA must be constituted unless all examiners are unanimous that the degree be awarded, and recommend either option (a) or (b). The chair of the COA should not circulate the supervisor's report prior to the meeting of the COA, or reveal that the thesis was submitted without the approval of the supervisor until such time as the COA has had an opportunity to reach an initial consensus or a clear deadlock on the appropriate way forward for the thesis. As an additional step, the chair of the COA will circulate the supervisor's report, and give the COA an opportunity to revise its view in the light of the report, since the report will possibly contain insights into how the examination process might have been influenced by the disagreement between the supervisor and candidate about the quality or substance of the thesis.

The report of the COA should be sufficiently comprehensive to convey to the Vice-Chancellor the reasons for the recommendation of the COA and, where the examiners disagree, or submission of the thesis has been without the approval of the supervisor, shall include a formal record of the COA meeting.

The report, together with the examiners' reports must be submitted by the Registrar to the Vice-Chancellor for approval on behalf of Senate or put to a meeting of Senate for its consideration.

Neither the result nor the names of examiners should be given to candidates until Senate has taken a final decision. Examiners' names and their detailed reports, edited where appropriate, may be revealed where applicable to candidates. Candidates, who are required to make minor corrections to their thesis, must do so prior to submission of the final e-copy in PDF format to the Registrar's division.

## 7.6 Procedures for dealing with corrections

A letter clearly indicating that revisions are required will be sent to the candidate by the Registrar. Copies will be sent to the Head of Department or Head of Department and supervisor depending on who is required to approve the corrections.

The person appointed by the COA to supervise corrections will liaise with the candidate to indicate which corrections or amendments to the thesis are necessary.

In the case of (c) recommendations by the COA:

- c) **Award of degree subject to minor corrections and/or specified changes**  
Relevant sections of the examiners' reports should be extracted by the person/s appointed to supervise such corrections. When these corrections have been satisfactorily completed, the appointed person/s certifies this to the Chair of the COA and thence to the Vice-Chancellor who will then approve the award of the degree on behalf of Senate. Only at this stage may examiners' names be revealed, as noted above.

d) Thesis to be revised and resubmitted

By extracting relevant sections of the examiners' reports, the appointed person/s should convey to the candidate the nature of the revisions required. As the dissenting examiner(s) will normally be re-examining the revised thesis, it is essential that anonymity of examiners be preserved.

If the COA recommendation requires either major changes, or revision and re-submission, the COA may recommend that the candidate be requested to supply the COA (and Senate at the time of re-submission) with a statement indicating the candidate's response to each of the examiners suggestions item by item. Reasons for not accepting a suggestion should be given. The request to supply such a statement does not detract from the prime importance of the candidate answering the external examiners' criticisms with the altered thesis. The statement is for the use of the COA and may be sent to an examiner at the discretion of the Vice-Chancellor.

## 7.7 Corrections to thesis

Corrections, whether as a condition for the award of the degree or a re-submission for re-examination, should be completed within a period not exceeding six months from the date of the letter communicating the outcome of the examination to be regarded as being part of the examination period. Any corrections taking longer than six months requires the candidate to be re-registered.

## 7.8 Submission of final copy of thesis

Once the examination process is complete and the degree awarded, the candidate must submit one electronic copy (on USB, CD or DVD), in PDF format, of the final thesis (that is, the examined thesis with any such corrections having been made to it as recommended by the examiners and as approved by the (a) the supervisor or (b) the supervisor and Head of Department or (c) the Head of Department or (d) the examiners) to the Registrar by a date published each year in order to graduate that year. The electronic copy will be deposited in the University's digital repository to enable world-wide access. Failure to submit a revised copy of the thesis by the date published means that the candidate would graduate the following year. The number of copies of the revised thesis required by the Department in each Faculty should be clarified with the supervisor.

## 7.9 Subsequent procedures

The Registrar shall advise the examiners of the outcome and, where the Vice-Chancellor decides that this should be done, the reasons for the decision as well.

## 8

## WHAT NEXT?

## 8.1 Postdoctoral studies

On successfully completing a Doctoral degree, researchers may wish to broaden their research experience by spending a year or more as a Postdoctoral Fellow at Rhodes University or elsewhere. There are many opportunities to do this and supervisors can often arrange such a position through their professional contacts. Contact the Research Office for details of the grants available and access the application for post doctoral studies at:

<http://www.ru.ac.za/postgraduategateway/postdoctoralfellowships/>

## 8.2 Senior Doctorates

A senior doctorate from Rhodes University may be awarded to a scholar of international<sup>9</sup> stature whose published works constitute a distinguished contribution to the advancement of knowledge in a field falling within the scope of the studies represented in the University. Such distinguished contribution will normally have resulted in the candidate having established a long-held and substantial international reputation in the field.

Candidates for a senior doctorate at Rhodes should hold a degree from Rhodes, or have served on the academic staff at Rhodes for a significant period. In exceptional circumstances the Senate may invite other persons to register for a senior doctorate but in such cases the request to Senate must be initiated by an academic department at Rhodes and should not originate from the candidate.

Prospective candidates or academic departments should refer to the Rules for senior doctorates (G.77 - G.80: reproduced below) and follow the administrative guidelines which follow:

1. The HoD should communicate with the Registrar in the first instance.
  - 1.1 In the case of an individual, the person should submit his/her curriculum vitae; a list of the published works (or other material) that would be submitted for examination and a statement detailing how and in what respects the works constitute a distinguished contribution to the advancement of knowledge in the field.
 

In certain disciplines the published works may include multi-authored publications. Where this is the case candidates are expected to indicate their role in the publications.

    - 1.1.1 The Registrar must submit the material referred to above to the relevant Head of Department at Rhodes who, after consultation within the Department, should decide whether or not to recommend to the Faculty Board the acceptance of the work for examination.
    - 1.1.2 If the Head of Department's recommendation is favourable, the Registrar will place the matter on the agenda of the next Faculty Board together with a full motivation from the Head of Department. If the recommendation is not favourable the Registrar must inform the candidate that the University declines to accept the works for examination.

<sup>9</sup> International stature or an international reputation implies an acknowledged reputation among the leading scholars within the global context of the broad field of study represented and not just in the South African context.

- 1.2 In the case of a Department wanting to invite a person to submit published works for examination the Head of Department must submit a recommendation to the Faculty Board, via the Registrar, supported by a full motivation.
2. The Faculty Board must recommend approval or otherwise to the Senate.
3. If the Senate approves, the Registrar must invite the candidate or nominee to register by:
  - 3.1 signing a registration form;
  - 3.2 paying the prescribed fee;
  - 3.3 submitting up to six copies of published works accompanied by an original first "chapter" which introduces the works and places them in context within the field as well as a final "chapter" that draws the work together;
  - 3.4 a declaration that none of the works has been submitted for a degree at any other university.

If the Senate does not approve the Registrar must inform the candidate (but not a nominee) that the University declines to accept the works for examination.

4. On receipt of a registration form the Registrar must call for the nomination of at least three, but usually four, examiners and follow the same approval process as that for PhD examiners.
5. The examiners must be asked to write a report indicating whether or not in their considered opinion the material submitted for examination demonstrates that the candidate has made a distinguished contribution to the advancement of knowledge in that field, and that the candidate has a substantial international reputation in the field.
6. The Registrar must forward the reports to the Dean who must convene the Faculty Committee of Assessors. The COA must make a recommendation on the award of the degree to the Vice-Chancellor who will award the degree, if appropriate, on behalf of Senate. The Registrar must report the award to Senate.

# A APPENDIX

## General rules

The conditions under which the University grants degrees, diplomas and certificates are laid down in the Rhodes University Statute, the Higher Education Act (No 101, 1997) and these rules are framed in terms of Section 32 of the Higher Education Act (No 101, 1997) as amended.

The following general rules pertaining to admission and registration are extracted from the 2019 Calendar of the University.

### G.1

A candidate for a degree, diploma or certificate in any Faculty must comply with the conditions and meet the selection criteria set out in the University's admissions policy. The Council has the right to refuse admission to any student should it consider it to be in the interests of the University to do so.

### G.2

Students are required, on admission, to register by signing the official registration form. Students must also pay the prescribed tuition fee. They must renew their registration and pay the prescribed fee annually as long as they continue to be students of the University; provided that students may be refused permission to renew their registration for any year of study if they fail to satisfy the prescribed minimum requirements of study. (See Rule G.7.)

### G.4

The Senate may refuse to admit any student to a post-graduate course of study in any subject if the standard of proficiency which the student has previously attained is not, in the opinion of the Senate, sufficiently high.

## *Ad Eundem Gradum Students*

### G.49

Persons who have graduated at another university, or who are able to give satisfactory evidence of their suitability for admission into the degree, may be admitted as students to courses of special study and research at the University. Such persons may, on completion of such courses, be admitted to a degree of Master or Doctor; provided that they before being so admitted:

- 49.1 have paid such fees as may be prescribed;
- 49.2 have completed the work for the degree, as a registered student of the University, for the prescribed period of the degree;
- 49.3 have attended at the University such courses as may be prescribed;
- 49.4 have undertaken research upon a subject approved by the Senate;
- 49.5 have presented a satisfactory report, dissertation or thesis upon the research undertaken; and
- 49.6 have complied with such further conditions as may be prescribed by the Senate.

## Degree of Master (All Faculties)

### G.50

Subject to the provisions of Rule G.49 candidates shall not be admitted to the degree of Master in the Faculty of Humanities (except the degree of Master of Music and Master of Fine Art), or of Science,

or of Commerce, until at least two years after admission to the degree of Bachelor or one year after admission to the degree of Bachelor with Honours in such Faculty, or, in the case of the degrees of Master of Education by thesis, Master of Fine Art, Master of Laws and Master of Music, until at least one year after admission to the degree of Bachelor. Special entry criteria for the degree of Master of Education by coursework and thesis are listed in the Faculty of Education Rules. Except with the permission of Senate a candidate for the degree of Master of Education by coursework and thesis will be allowed a maximum of three years' registration in which to fulfil all requirements for the degree.

- 50.1 Candidates for Master's degrees should register at the beginning of the academic year. New applicants may register up to 1 May.
- 50.2 Normally only students holding an honours degree will be accepted as candidates for the degrees of MA, MSc, MCom, or MSocSc. Students holding an ordinary degree will be accepted only in exceptional cases.
- 50.3 Only students who have been admitted to the degree of Bachelor of Laws and who have attained a sufficiently high academic standard will be admitted as candidates for the degree of Master of Laws.
- 50.4 Only students who have been admitted to the degree of Bachelor of Pharmacy and who have attained a sufficiently high academic standard will be admitted as candidates for the Master's degrees in the Faculty of Pharmacy.
- 50.5 Candidates who have obtained the BPharm degree may not present their thesis for a Master's degree until at least 18 months after the date of registration for the MSc or MPharm degree.

#### G.51

No persons shall be admitted as candidates for the degree of Master unless they have obtained the approval of the Board of the Faculty, on the recommendation of the Head of the Department concerned.

#### G.52

Candidates for the degree shall be registered for and attend an approved course of study or research at the University for the period prescribed in Rule G.50: provided that the Senate may exempt candidates from such attendance or part thereof, and may instead require them to perform such work as it may prescribe during that period.

- 52.1 When a candidate's subject of research has been approved, such approval will remain in force so long as the annual registration fee is paid.

#### G.53

The Faculty shall appoint a supervisor, or supervisors, to advise a candidate. At least one of the supervisors so appointed must be a member of staff. For the purpose of this Rule, members of associated institutes who are also members of a faculty of the University are regarded as members of staff. Candidates may be permitted to register in an associated Research Institute without requiring a co-supervisor in a related academic department, but the research proposal must be approved by the Dean after considering a recommendation from a member of a cognate department. At least one of the supervisors for such candidates must be a member of the relevant Faculty Board.

- 53.1 The Senate has decided that candidates for the degree of Master who are exempted from attendance under Rule G.52 will be required to report in person to their supervisors from time to time as directed by the latter, and that the time in which such a candidate may qualify for the award of the degree will be extended by one year (i.e. they must be registered candidates for the degree for at least two years); provided that Senate may waive the additional year in the case of candidates who are conducting full-time research under approved conditions.

#### G.54

Senate may, on the recommendation of the Board of the Faculty concerned, convert the registration of a candidate for the Master's degree by thesis to registration for the PhD degree if they consider that the work is of a standard normally expected of a doctoral student.

#### G.55

At least two months before the candidates present their theses, they shall give notice in writing to the Registrar of their intention to do so.

- 55.1 Candidates must submit their theses no later than the date published in the Calendar Diary in the year preceding that in which they hope to graduate.

#### G.56

The Senate may prescribe the form in which a thesis shall be submitted, and the number of copies required.

- 56.1 Such copies, when submitted, shall become the property of the University.
- 56.2 The Senate requires that three suitably bound copies of the thesis be presented for examination. Additional copies may be required depending on the number of examiners. The Registrar will inform the student of the exact number of copies required.
- 56.3 After the examination process has been completed, the candidate is required to submit an electronic version of the final corrected thesis in PDF format for deposit in the University's digital repository, together with the Final Thesis Submission Form signed by the candidate and supervisor to the Registrar's Division. Candidates and supervisors who would like a digital holding period of between 1 and 2 years before deposit in the digital repository, or a full embargo of the thesis, must request this in the Final Thesis Submission Form. The Library offers assistance and training to post-graduate students for PDF conversion.

#### G.57

A thesis shall be accompanied by a declaration on the part of the candidates as to the extent to which it represents their own work. This declaration must be approved by the supervisor.

#### G.58

If, at the date of its presentation, the thesis has not been published in a manner satisfactory to the Senate, the University shall have the right to make copies of the thesis from time to time, for deposit in other universities or research libraries, and to make additional copies of it, in whole or in part from time to time, for the purposes of research. The University may, for any reason, either at the request of the candidate or on its own initiative, waive its rights.

#### G.59

Subject to any exceptions approved by the Senate, candidates may not present themselves for the examination for the degree more than twice in the same subject.

- 59.1 An application to re-submit a thesis which has been rejected shall not be entertained, but the Senate may, on the advice of the examiners invite a candidate to re-submit a thesis in a revised or extended form.

#### G.60

The degree may be awarded with distinction.

#### G.61

In the case of a candidate for the degree of Master of Music, the word "thesis" includes a set of musical compositions in such form as may be prescribed by the Senate.

## Degree of Doctor of Philosophy (All Faculties)

### G.62

Subject to the provisions of Rule G.49 a candidate shall not be admitted to the degree of Doctor of Philosophy until at least three years after admission to the degree of Bachelor with Honours (in any Faculty), or of Bachelor of Laws, or of Bachelor of Education, or of Bachelor of Music, or until at least two years after admission to the degree of Master.

### G.63

Candidates for the degree of Doctor of Philosophy in any Faculty shall be registered for and attend an approved course of special study or research at the University for the period prescribed in Rule G.62; provided that the Senate may exempt candidates from such attendance or part thereof, and may instead require them to perform such work as it may prescribe during that period.

**63.1** Candidates for Doctor's degrees should register at the beginning of the academic year. New applicants may register up to 1 May.

### G.64

Before registration, candidates for the degree shall obtain the approval of the Senate to the subject of special study or research which they propose to pursue.

**64.1** When a candidate's subject of research has been approved, such approval will remain in force so long as the annual registration fee is paid.

### G.65

The Senate shall appoint a supervisor or supervisors to advise a candidate. At least one of the supervisors so appointed must be a member of staff. For the purposes of the Rule, members of associated institutes who are also members of a Faculty of the University are regarded as members of staff. Candidates may be permitted to register in an associated Research Institute without requiring a co-supervisor in a related academic department, but the research proposal must be approved by the Dean after considering a recommendation from a member of a cognate department. At least one of the supervisors for such candidates must be a member of the relevant Faculty Board.

**65.1** The candidate shall work in such association with the supervisor as the Senate may direct.

### G.66

Candidates shall submit a thesis on the results of their study which shows evidence of originality and independent research.

### G.67

At least two months before candidates present their theses, they shall give notice in writing to the Registrar of their intention to do so.

**67.1** Candidates must submit their theses no later than the date published in the Calendar Diary in the year preceding that in which they hope to graduate.

### G.68

The Senate shall appoint at least three examiners for each thesis. In exceptional circumstances one examiner may be internal to the University.

### G.69

The Senate may prescribe the form in which a thesis shall be submitted, and the number of copies required.

- 69.1 Such copies, when submitted shall become the property of the University.
- 69.2 The Senate requires that for a full thesis, four suitably bound copies of the thesis be presented for examination. Additional copies may be required depending on the number of examiners. The Registrar will inform the student of the exact number of copies needed.
- 69.3 After the examination process has been completed, the candidate is required to submit an electronic version of the final corrected thesis in PDF format for deposit in the University's digital repository, together with the Final Thesis Submission Form signed by the candidate and supervisor to the Registrar's Division. Candidates and supervisors who would like a digital holding period of between 1 and 2 years before deposit in the digital repository, or a full embargo of the thesis, must request this in the Final Thesis Submission Form. The Library offers assistance and training to post-graduate students for PDF conversion.
- 69.4 Every thesis must be accompanied by a double spaced typewritten abstract in English of not more than 350 words. In addition, if the thesis is in a language other than English, it must be accompanied by an abstract in the language of the thesis. No illustrative materials such as tables, graphs or charts should be included. The abstract must be approved by the supervisor of the thesis and will, in the case of successful doctoral candidates, be submitted to University Microfilms International for publication and distribution. The abstract must be bound together with the thesis and be placed immediately after the title page.

#### G.70

Candidates shall submit a declaration, satisfactory to the Senate, stating to what extent the thesis is their original work, and certifying that it has not been submitted for a degree at any other university.

#### G.71

If, at the date of the presentation, the thesis has not been published in a manner satisfactory to the Senate, the University shall have the right to make copies of the thesis from time to time, for deposit in other universities or research libraries, make additional copies of it, in whole or in part from time to time and distribute the content in whatever format it deems fit, for the purposes of research. The University may, for any reason, either at the request of the candidate or on its own initiative, waive its rights.

#### G.72

Candidates may be required by the Senate, if the examiners so recommend, to submit to a written or oral examination on the subject of their thesis and on the whole field of study which it covers.

#### G.73

An application to re-submit a thesis which has been rejected shall not be entertained, but the Senate may, on the advice of the examiners, invite a candidate to re-submit a thesis in a revised or extended form.

#### G.74

A thesis accepted by the University, and subsequently published in whatever form, shall bear the inscription: "Thesis approved for the degree of Doctor of Philosophy of Rhodes University", or "Thesis approved in partial fulfilment of Doctor of Philosophy of Rhodes University", as the case may be.

#### G.75

In the case of a candidate for the degree of Doctor of Philosophy in Music, the word "thesis" includes a set of musical compositions in such form as may be prescribed by the Senate.

## General Rules for Higher Degrees

### G.76

Senate may suspend or cancel the registration of any candidates whose progress it considers to be unsatisfactory.

- 76.1 If candidates have not completed their Master's degree within three years from first registration or their PhD degree within five years from first registration or six years if their PhD was upgraded from a Master's degree, their candidacy will lapse unless the Senate is satisfied that an extension is warranted.

## Guidelines for Senior Doctorates

### G.77

When applicants indicate their wish to submit work for a Senior Doctorate, the Board of the Faculty, on the recommendation of the Head of Department, supported by a full motivation, will consider recommending to Senate the acceptance of the work for examination.

### G.78

If Senate approves the acceptance of work for a Senior Doctorate, the candidate must submit for the approval of the Senate, six copies of published work dealing with some subject falling within the scope of the studies represented in the University, or, in the case of the degree of Doctor of Music, a set of musical compositions, in such form as may be prescribed by the Senate. Normally the published work should be presented either conventionally bound, or in electronic form (in PDF format) on suitably indexed CD-ROM disks together with an explanatory synopsis. Such work shall constitute a distinguished contribution to the advancement of knowledge in that field.

- 78.1 Copies so submitted shall become the property of the University.

### G.79

The Senate shall appoint at least three examiners for each candidate. In exceptional circumstances one examiner may be internal to the University.

### G.80

Every work submitted for the degree must be accompanied by a declaration on the part of the candidate, satisfactory to the Senate, to the effect that it has not been submitted for a degree at any other university.

*Candidates for a Senior Doctorate should communicate with the Registrar, in the first instance.*

## Breaches of Rules

### G.81

Subject to the provisions of the Higher Education Act and the Rhodes University Statute, the Senate may *ex post facto* condone any breach of the rules governing a curriculum, if it is satisfied that:

- 81.1 the students concerned are not themselves responsible for the breach of rules;
- 81.2 if the breach is not condoned the students concerned would be put to undue hardship; and
- 81.3 the rule broken is not of fundamental importance.

## CHECK LIST

### Have you enclosed the following with your application form?

1. Have you enclosed your academic transcript?
2. Have you signed the declaration on the last page of the applications?
3. If you have not previously attended an English Medium University, please contact our offices to request information with regards to the English proficiency requirements or provide any certificates of English Proficiency that you currently have.

#### PLEASE NOTE:

All postgraduate applicants are required to submit with the application form a full official academic transcript reflecting the detailed results, including percentage marks, of all previous qualifications and the award of degree(s). Copies of degree certificates do NOT constitute an academic transcript.

Applicants who at the time of application are completing a degree requisite for admission, should submit all available academic results on application, with submission of the full/final academic transcript as soon as this is available. Rhodes students do not need to submit Rhodes transcripts. Married women: where your previous qualifications are in your maiden name, please supply a copy of your marriage certificate for record purposes.

## DECLARATION AGREEMENT

I/We, the undersigned, hereby declare that:

To the best of my/our knowledge and belief the information furnished in this application is true and correct and that if it be found to be false, and misleading in any respect, this application may be invalidated and the applicant's registration terminated; and further agree:

That I/We accept liability for damage to University property howsoever caused by the Applicant and indemnify the University against and loss or damage howsoever caused in respect of property left at the University by the Applicant. I/We also indemnify the University against any claim whatsoever for damages howsoever caused or arising which the Applicant may sustain whilst registered as a student at the University, acknowledging that the Applicant's participation in any sporting or other activity at the University or conveyance of the Applicant in any University vehicle, shall be at the Applicant's sole and absolute risk. This indemnity shall be binding on the Applicant's Executors and Heirs.

That I/We acknowledge that a registration fee is required by mid-January each year, including the first year of study, unless satisfactory arrangements have been made with the University. Details of the fee will be included in future correspondence with the applicant.

That a statement signed by the Registrar (Finance) shall represent the amount owing to the University by me/us, and further that in the event of such amount being handed over for collection I/we shall pay all legal charges incurred on the attorney and client scale.

That I/we will pay interest on all overdue fees, and disbursements at a rate published in the annual fees booklet and on the website and calculated from the first day of each month following the date by which final payment of all fees and disbursements must be made.

That I/we shall abide by all regulations of the University - and further that the applicant shall, if accepted, be under the disciplinary control of the University as from the date on which he/she takes up residence at the University or the day on which he/she commences studies or attends an orientation week or summer school or similar function or registers as a student, whichever is earliest, until the University accepts a notice of withdrawal from me/us or the applicant fails to renew his/her registration on the due date, whichever is the later.

That I/we accept and understand that the University keeps documents, including this Declaration and Agreement, electronically and distributes them as such. The University shall at all times be entitled to utilise such documents in electronic format for whatever purpose required and I/we agree that the electronically generated documents shall replace the originals signed by me.

That although the University does not take any responsibility for informing parents or guardian or major fee contributor of disciplinary action against a student (whether pending or finalised), academic performance or any other matters relating to the student, the University may in its discretion report to the parents or guardian or major fee contributor such breaches of the rules by the applicant as the University deems necessary and further to report on any matter concerning progress, conduct, well-being or health of the applicant, and further that the University may take all such steps as it considers reasonable in the event of the applicant becoming ill or requiring medical attention without the University undertaking any legal obligation to do so.

### DECLARATION AGREEMENT

I/We, the undersigned, hereby declare that:

To the best of my knowledge and belief the information furnished in this application is true and correct and that if it be found to be false, and misleading in any respect, this application may be invalidated and my registration terminated; and further agree:

That I accept liability for damage to University property howsoever caused by me and indemnify the University against and loss or damage howsoever caused in respect of property left at the University by me. I also indemnify the University against any claim whatsoever for damages howsoever caused or arising which I may sustain whilst registered as a student at the University, acknowledging that the my participation in any sporting or other activity at the University or my conveyance, in any University vehicle, shall be at my sole and absolute risk. This indemnity shall be binding on my Executors and Heirs.

That a statement signed by the Director (Finance) shall represent the amount owing to the University by me, and further that in the event of such amount being handed over for collection I shall pay all legal charges incurred on the attorney and client scale.

That I will pay interest on all overdue fees, and disbursements at a rate published in the annual fees booklet and on the website and calculated from the first day of each month following the date by which final payment of all fees and disbursements must be made.

That I shall abide by all regulations of the University - and further that I shall be under the disciplinary control of the University as from the date on which I take up residence at the University or the day on which I commence studies or attend an orientation week or summer school or similar function or register as a student, whichever some first.

That I accept and understand that the University keeps documents, including this Declaration and Agreement, electronically and distributes them as such. The University shall at all times be entitled to utilise such documents in electronic format for whatever purpose required and I agree that the electronically generated documents shall replace the originals signed by me.

I undertake to pay all fees and other charges levied by the University and I accept that the Registrar may decline to accept a thesis for examination if fees are outstanding. I note that annual fees will not be charged if I formally withdraw before 15 February of any year and that thereafter a pro rata rate will be charged upon withdrawal until end of June. I acknowledge and accept the requests for the reduction of outstanding fees on the basis of a de facto withdrawal before a formal withdrawal notice is accepted will not be entertained. Should I withdraw, I undertake to retain the withdrawal acknowledgement from the Registrar as proof of withdrawal and if such acknowledgement is not received within two working days from submission of the withdrawal notice I will follow up.

## Policy on Supervision in Higher Degree by Research

**RHODES UNIVERSITY**

*Where leaders learn*

**POLICY ON SUPERVISION IN HIGHER DEGREE BY RESEARCH**  
Please type or write clearly in BLOCK LETTERS

Responsible Committee/Unit/Division/Faculty:	Research Office & Centre for Postgraduate Studies
Responsible Chairperson/Director/Manager:	DVC: Research:
Dates of First & Subsequent Council Approvals:	
Revision History:	
Review Cycle (e.g. every 2/5/7 years):	
Next Review Date:	

POLICY VOLUME

POLICY CHAPTER

POLICY PARTICULARS

Policy Title	Rhodes University Policy on Supervision in Higher Degree by Research
Policy Statement <i>(State in a single paragraph the policy mandate and how this relates to the University Mission and Vision)</i>	As a research intensive university, with a significant proportion of postgraduate students. Rhodes University recognises the importance of providing high quality Higher Degree by Research (HDR) pedagogy and offering a supportive, engaging research environment, including ensuring the support of supervisors.
Reason for Policy <i>(What this policy aims to achieve)</i>	HDR is where teaching and research come together, as is acknowledged in the national funding formula whereby HDR students are funded in the 'teaching input' section. The practices and processes of HDR education are thus complex and cannot be fully attended to in one document. However, this policy aims to provide the broad principles and structures within which such education takes place.
People affected by this Policy <i>(e.g. units of the University)</i>	This policy refers to all supervisors and students involved in Higher Degrees by Research, all Heads of Department, all Deans, the DVC: Research and the Director of the Centre for Postgraduate Studies.

Who should read this Policy <i>(People who need to heed this policy to fulfil their duties)</i>	All those whose work relates to postgraduate studies in any way.
Website address or link for this Policy	-

#### POLICY DEFINITIONS

(Technical or Conceptual terms used in the policy)

TERM	DEFINITION
HDR	Higher Degrees by Research are postgraduate studies that include a significant portion of supervised research.
Supervisor	A supervisor is the person responsible for mentoring the HDR student, for overseeing the research design, and for stewarding the project through the necessary processes.
Co-Supervisor / Collaborative supervision	The co-supervisor works with the supervisor to ensure all supervision roles and responsibilities are fulfilled. The co-supervisor might have responsibility for a specific aspect of the study or bring expertise in a particular area. The co-supervisor might be a novice supervisor who is being mentored by the main supervisor in HDR pedagogy. The co-supervisor might be part of a collective of supervisors. Regardless of the reason for the appointment of a co-supervisor, all supervisors are expected to play an active role in the HDR process and to work in a collegial manner that recognises the inputs of all. Co-supervisors may come from different departments or be external to the university.  Where there is more than one supervisor attached to an HDR study, there must be a clear articulation of each person's roles and responsibilities.
One-on-One Supervision	In this model, an HDR student is allocated a supervisor or a main and co-supervisor and undertakes an individual study on their own research problem. Communication about the research is primarily between the student and supervisor/s only (Grant 2008, Manathunga and Goozee 2007)

TERM	DEFINITION
Project Supervision	<p>In this model, a team of HDR students undertake research into various aspects of one project. They might be supervised by one supervisor or by a collective of supervisors. Each person's role and responsibilities in the project should be clearly articulated and each HDR student needs to understand what their part in the project is. This model is common in the Natural Sciences but is increasingly being used in Humanities and Social Sciences too. Project supervision can include HDR students registered for different levels of qualification. The members of the project team have responsibility to the team as well as to their own project, including preparing for seminars, attending workshops, and providing peer feedback. Project supervision often includes preparatory coursework, even at PhD level where such coursework is not for credit.</p> <p>Specific progress deadlines might be negotiated for the team as a whole.</p>
Programme Supervision	<p>Typically programme supervision includes a hybrid with other models such that those in the programme also have a traditional one-on-one supervisor or are part of a project team. Programme supervision provides HDR students with additional support through membership in a departmental or interdepartmental programme which includes circulated support events (such as an online forum, seminar series, 'Doc Weeks') (McKenna 2014, 2016, Lotz-Sisitka et al 2010). The programme is intended to nurture collegiality and to prevent a sense of isolation, while fostering a strong research culture. A version of this model is known as the 'cohort model' (Samuel and Vithal 2011).</p>
Panel Supervision	<p>The HDR scholar has a panel of three, four or five supervisors, but works most closely with one of the supervisors who is designated the main supervisor. The panel meets three times a year and prepares by reading the most recent work and attending the HDR student's progress seminar. There are fixed and clearly articulated progress deadlines. This model is sometimes known as the 'Scandinavian model of supervision'.</p>
CPGS	<p>The Centre for Postgraduate Studies offers a number of initiatives and events to support HDR supervisors, HDR students and to foster a strong research culture on campus.</p>
HEQSF	<p>The Higher Education Qualifications Sub-Framework (DHET 2012) specifies the definition of each postgraduate qualification and its aims and outcomes, and it specifies the credits and thereby the notional hours candidates are expected to dedicate to each postgraduate qualification.</p>

PRINCIPLES GOVERNING THIS POLICY

<b>OVERVIEW</b>	
Rhodes University strives to carry out the following, as far as is reasonably practicable:	
1.	The roles played by supervisor/s and student should be articulated as clearly as possible and should preferably be arrived at through a process of mutual consensus. Agreement as to the supervisory process should be documented so that a clear record of responsibilities is created. (See roles below).
2.	Supervisors need to be committed to the HDR scholars that they supervise and to their projects. This includes taking responsibility for guiding the scholar and providing such support as may be necessary and reasonable.
3.	The university acknowledges that the Higher Degree by Research is examined primarily in written form and the supervision of academic writing (whether it be discipline specific, inter-disciplinary or transdisciplinary) is thus an important responsibility. While various initiatives may be put in place to support the acquisition of the relevant writing practices, it is largely through formative feedback on student writing by the discipline expert that such practices are developed.
4.	The model of supervision is dependent on a number of variables including disciplinary norms and the requirements of the specific research project. There is therefore no requirement that a particular model be used. However, the university notes concerns about the dominance of the individual one-on-one model of supervision, which has been found to be associated with poor retention and throughput (ASSAf 2010, Cloete, Mouton and Sheppard 2015) and to exacerbate power imbalances and isolation where these problems are evident (Backhouse 2010, Harrison 2012). In cases where this model is deemed to be the most appropriate, the university endeavours to ensure that the candidate has access to a community of scholars and to a number of support initiatives beyond those provided by the supervisor, and that the supervisor too has various support structures in place.
5.	All supervisors, especially novice supervisors, are encouraged to participate in such supervision development opportunities as may be made available, such as the national Strengthening Postgraduate Supervision course.
6.	The evidence that the most effective supervisors are those who are research active (ASSAf 2010, Cloete, Mouton and Sheppard 2015) is taken seriously. It is understood that novice supervisors will not initially have strong research profiles but all supervisors are expected to actively contribute to the relevant discipline or field or research area and to seek opportunities for their own development in this regard.
7.	The criteria for appointment as supervisor vary from faculty to faculty. However, supervisors are ideally expected to hold a qualification one level higher than that at which they supervise (CHE 2004), except in the case of the doctorate which specifies the ability to supervise doctorates as an outcome (DHET 2012).
8.	There are numerous issues that pertain to the number of HDR students any particular academic can supervise at one time. These include the nature of the discipline, the level of study, the model of supervision being used, the varied other responsibilities held by the supervisor, and the needs of the particular student. No specific limits are therefore set, however HoDs need to monitor the number of HDR scholars allocated to individual supervisors and to take into account their other responsibilities and their track record of supervising students to graduation before recommending each new HDR supervision to Faculty Board.
9.	Supervisors are expected to continue with their HDR responsibilities while on sabbatical leave. In cases where there is a co-supervisor or supervisory team, such responsibilities might be re-allocated for the duration of the sabbatical and the HoD and HDR candidate must be fully informed of such arrangements.

PRINCIPLES GOVERNING THIS POLICY

10.	Additional supervisors might be added to the team at various points in the research process to attend to requirements for particular expertise as may arise. Such additions should be approved by Faculty Board in the same way that supervisor allocations are approved at the time of research proposal approval. If roles change considerably during the postgraduate process, for example, where a co-supervisor becomes the main supervisor, this should be reported to Faculty Board. Where supervisors leave a project, this should similarly be recorded at Faculty Board with a clear explanation. Where candidates are left without a supervisor (for example, through relocation of supervisor), the HoD shall be responsible for making arrangements with the candidate for a replacement supervisor as a matter of urgency.
11.	Co-supervisors who are external to the university can be appointed but it is normally required that there be a supervisor internal to the institution responsible for amongst other usual supervision responsibilities, overseeing procedural aspects such as the approval of the proposal by the Higher Degrees Committee and the submission of the thesis for examination. External co-supervisors are expected to be made aware of this HDR supervision policy and the Higher Degrees Guide. They are expected to play an active role in the supervision process alongside the internal co-supervisor. Payment to external co-supervisors is dependent on arrangements made by individual departments.
12.	Disputes between any members of the supervision team, including the supervisor and candidate, should be managed by the HoD or his or her designated representative, or in the case where the HoD is on the supervision team, by the Dean of the Faculty. Both the DVC: Research and the Director of the CPGS might be asked to assist with resolving the dispute. Where it is believed to be in the best interests of the research project and members of the team for a new supervisor to be allocated, the HoD shall be responsible for making arrangements with the candidate for a replacement supervisor as a matter of urgency.
13.	Supervisors and HDR candidates are expected to complete progress reports on an annual basis. Where progress is not as desired, the Dean of the Faculty may write a letter to the HDR candidate noting the slow progress and enquiring if an intervention is required to ensure that the candidate makes better progress. Each faculty might set their own expected milestones and deadlines and determine how best to ensure that the progress by HDR candidates is appropriately tracked and encouraged.
14.	The HEQSF (2013) specifies that up to PhD level 'candidates may also present peer-reviewed academic articles and papers, and, in certain fields, creative work such as artefacts, compositions, public performances and public exhibitions in partial fulfilment of the research requirements.' Combining academic publications and creative outputs with thesis submission has implications for supervision and for examination. Each faculty might develop its own requirements and processes in this regard.
15.	Collaborative offerings such as joint degrees with other institutions need to be approved by the DVC: Research and the relevant Dean before any candidate is registered into such an offering.

**ROLES AND RESPONSIBILITIES**

(Roles and responsibilities of Key personnel/Divisions/Faculties/Departments)

ROLE	RESPONSIBILITY
<b>ROLE 1</b>	<b>Supervisor, Co-supervisor, Supervisory Team</b>
1.	The supervisor is expected to be familiar with this HDR supervision policy and with the Higher Degrees Guide, along with the administrative regulations pertaining to Higher Degrees by Research, and any Faculty specific rules and processes;
2.	The supervisor's responsibilities before the project begins, during the course of the project, and at the conclusion of the project are set out in detail in the Higher Degrees Guide, and these include overseeing ethical considerations and ensuring that ethical clearance for the project is attained as necessary;
3.	<p>The supervisor/supervisory team is expected to discuss with the candidate the roles of supervisor and candidate as set out in the Higher Degrees Guide and to explicitly discuss how they will work together for the duration of the project. A record of this agreement should be kept in whatever form is considered most appropriate. The candidate and supervisor/s should have access to this document. The discussion and subsequent agreement should, depending on relevance, include an articulation of:</p> <ul style="list-style-type: none"> <li>• The roles of the various supervisors, co-supervisors or project team members, depending on the model of HDR being used; in the case where there are co-supervisors, supervisory teams or project supervision, there needs to be agreement as to the roles each member plays, including such aspects as who attends meetings, who coordinates and attends seminars and workshops, who provides feedback on laboratory or field work, who provides feedback on written work, and so on;</li> <li>• How often the HDR candidate and supervisor/supervision team will meet, who sets the meetings, what form such meetings will take;</li> <li>• Notional hours for the qualification and thereby the expectations on the candidate, including expectations regarding the development of academic writing norms;</li> <li>• The form of feedback that will be given on the candidate's work, by whom, and how long they should be expected to wait for such feedback;</li> <li>• Publication possibilities and expectations and what the arrangements will be regarding authorship, co- authorship and the order of authors named on any publications emerging from the research;</li> <li>• Most importantly, the discussion and subsequent agreement should specify the planned progress with clear progress targets.</li> </ul>
4.	The supervisor has a responsibility to provide opportunities for and information about events (for example seminars, workshops and short courses) that would enable the collective development of the HDR scholar and strengthen the research culture in the institution.
5.	The supervisor has a responsibility to inform the Head of Department of any conflict of interest that might arise in their relationship with the candidate. The supervision relationship is also guided by the "Protocol on Managing of Close Relationships between Staff and Students and between Staff" .

ROLE 2	Higher Degree by Research Candidate
1.	The candidate is expected to be familiar with the Higher Degrees Guide;
2.	The candidate's responsibilities before the project begins, during the course of the project, and at the conclusion of the project are set out in detail in the Higher Degrees Guide;
3.	The candidate should consider the roles of supervisor and candidate as set out in the Higher Degrees Guide and explicitly discuss how they will work with their supervisor/supervisory team for the duration of the project. A record of this agreement should be kept in whatever form is considered most appropriate. The candidate and supervisor/s should have access to this document. A few of the key issues to be deliberated and included in such a document are outlined under the role of the supervisor above.
4.	The supervisor has a responsibility to provide opportunities for and information about events (for example seminars, workshops and short courses) that would enable the collective development of the HDR scholar and strengthen the research culture in the institution.
5.	The supervisor has a responsibility to inform the Head of Department of any conflict of interest that might arise in their relationship with the candidate. The supervision relationship is also guided by the "Protocol on Managing of Close Relationships between Staff and Students and between Staff" .

ROLE 3	Centre for Postgraduate Studies (CPGS)
1.	The role of the Centre for Postgraduate Studies is to provide support to both supervisors and HDR candidates through the offering of seminars, workshops, short courses and collaborative initiatives;
2.	Where necessary, the Centre for Postgraduate Studies might be asked to assist in mediation where disputes related to postgraduate studies have arisen.

ROLE 4	Head of Department (HoD)
1.	The Head of Department approves the registration of HDR students and their allocation to supervisors;
2.	The HoD should oversee supervision workloads and progress of HDR students in the department;
3.	The HoD is expected to ensure that supervisors are aware of this HDR supervision policy, the Higher Degrees Guide, any administrative regulations pertaining to Higher Degrees by Research, and any Faculty specific rules and processes;
4.	The HoD mediates in any disputes as may be required;
5.	The HoD should encourage the development of a supportive research culture in the department to foster HDR success.

ROLE 5	Dean
1.	The Dean approves the HoD's recommendation for registration of HDR students and their allocation to supervisors;
2.	The Dean should work with the Director of the CPGS to encourage the development of a supportive research culture in the faculty to foster HDR success;
3.	The Dean should oversee the tracking of HDR students' progress on an annual basis and take what steps as may be deemed necessary according the faculty's approved practices;
4.	The Dean acts as mediator in the case of disputes.

ROLE 6	DVC: Research
1.	The DVC: Research has responsibility for strategic guidance for and the overseeing of HDR education in the institution;
2.	The DVC undertakes institutional level tracking, works with the Deans and the Director of the CPGS to ensure that HDR students are well supported and that a strong research culture is nurtured across the university;
3.	In the case of disputes, the DVC: Research has responsibility for intervening where necessary and to appoint any other person or committee to address such disputes as the DVC may deem necessary.

ROLE 7	HDC
1.	The Higher Degrees Committee provides an academically rigorous engagement with proposed HDR research prior to such research being undertaken. This should be done in a manner that is collegial and developmental for both supervisor/s and HDR students;
2.	This complex process of assuring the quality of HDR studies is through the provision of supportive and useful feedback which safeguards our HDR students and colleagues by ensuring that the committee believes that the proposed study is do-able, meaningful and ethically sound and that the HDR candidate has the necessary expertise to implement the proposed study;
3.	It is imperative that the record keeping is rigorous and specifies the basis of HDC decisions.

## APPENDIX

Guidelines for examiners  
of Master's degrees

The following requirements for the degree of Master are quoted for the information of examiners, except for the Master's in Fine Arts:

### 1. The Rule G.50 of the Rhodes University Calendar

Subject to the provisions of Rule G.49 candidates shall not be admitted to the degree of Master in the Faculty of Humanities (except the degree of Master of Music and Master of Fine Art), or of Science, or of Commerce, until at least two years after admission to the degree of Bachelor or one year after admission to the degree of Bachelor with Honours in such Faculty, or, in the case of the degrees of Master of Education by thesis, Master of Fine Art, Master of Laws and Master of Music, until at least one year after admission to the degree of Bachelor. Special entry criteria for the degree of Master of Education by coursework and thesis are listed in the Faculty of Education Rules. Except with the permission of Senate a candidate for the degree of Master of Education by coursework and thesis will be allowed a maximum of three years' registration in which to fulfil all requirements for the degree.

*NB. Rule 50.5 of the Rhodes University Calendar states that a candidate who has obtained the BPharm degree may not present their thesis for a Master's degree until at least 18 months after the date of registration for the MSc or MPharm degree.*

### 2. Regulations

#### G.53

The Faculty shall appoint a supervisor, or supervisors, to advise a candidate. At least one of the supervisors so appointed must be a member of staff. For the purposes of this Rule, members of associated institutions who are also members of a Faculty of the University are regarded as members of staff. Candidates may be permitted to register in an associated Research Institute without requiring a co-supervisor in a related academic department, but the research proposal must be approved by the Dean after considering a recommendation from a member of a cognate department. At least one of the supervisors for such candidates must be a member of the relevant Faculty Board.

#### G.60

Degree may be awarded with distinction.

### 3. Guidelines for Candidates

#### G.53

*These Guidelines are additional to the Rules governing the degree of Master as laid down in Rhodes University Calendar.*

A thesis for the degree of Master must show that the candidate:

- a) is sufficiently acquainted with the appropriate methods and techniques of research.
- b) is sufficiently acquainted with the relevant literature.

- c) has both satisfactorily understood the nature of the problem or topic and assessed the significance of the findings; and
- d) has satisfactorily presented the results of independent research for the award of the degree in a manner which is satisfactory as to literary style and presentation, and free from grammatical and typographical errors.

Except in exceptional circumstances approved by Senate, the upper limit for Master's degrees and the Master of Education degree by research is 50 000 words of text (approximately 150 A4 pages of one-and-a-half spaced typing excluding footnotes, illustrative material and appendices). Master of Education thesis in a coursework degree should not under any circumstances exceed 30 000 words.

## 4. Reports

The examiners appointed are each required to complete the report form independently and write a report on the thesis. The report should clearly state whether in the view of the examiner, the thesis/mini-thesis/dissertation:

1. The candidate should be awarded the degree and that NO corrections need to be made to the thesis.
2. The candidate should be awarded the degree, but minor corrections, usually of a stylistic, linguistic or bibliographic nature which are clearly documented by the examiner, and are to be implemented at the discretion of the supervisor and/or Head of Department.
3. The candidate should be awarded the degree after identified changes have been made to the satisfaction of the supervisor and/or Head of Department.
4. The thesis does not meet the required standard, the candidate should be invite to do further work if necessary, revise and resubmit the thesis for re-examination by the examiners.
5. The candidate should submit to an oral or written examination on the subject of his or her thesis and/or on the whole field of study which it covers.
6. The degree should not be awarded to the candidate.

The report form and report are to be returned directly to the Academic Administration Office as soon as possible, preferably scanned (legible quality) and emailed to [academicadmin@ru.ac.za](mailto:academicadmin@ru.ac.za).

On receipt of all the examiner's reports, the Academic Administration Office will transmit the relevant documentation to the Head of Department, who will collate all the reports and return them with his/her recommendation to the Academic Administration office.

In the event of a significant disagreement between the reports, the Dean will in the first instance attempt to gain consensus by giving each examiner sight of the other examiner's report. Should no consensus be reached, the Dean shall, on the recommendation of the Head of Department, appoint an arbiter who shall be given sight of the thesis, the initial examiners' reports, any further correspondence from the examiners, and the Head of Department's collaboration and recommendation. Upon receipt of the arbiter's report, the Dean will make a decision on behalf of Faculty.

## 5. Confidentiality

From the outset examiners are asked on the report form whether they are prepared to be identified to a successful candidate and to indicate which section(s) of their report, if any, may be revealed to the candidate. Normally information permitted to be disclosed will be communicated to the candidate, but with the approval of the Dean. The Heads of Departments may, at their discretion, withhold part of the information sanctioned by the examiners.

(Please be aware that it is normally the practice for the examiner's reports, and the identity of the examiner, to be made known to the candidate at the end of the examination process. If an external

examiner, or the Dean, has a reason for not complying with this practice, this must specifically be requested of the Vice-Chancellor to act on behalf of Senate).

## 6. Award of the Degree with Distinction

### a) *Specified criteria for the award of a distinction:*

The University reserves the award of a distinction for work of outstanding merit, while recognizing that the Master's degree represents not more than one or two years' full-time research, and is in many instances, the first research experience of a candidate. Examiners are asked to look for evidence of real methodological and conceptual skills, clarity in exposition and development of argument, sound judgement, originality of approach and some contribution to knowledge, but not necessarily to expect total coverage of a major problem or a substantial breakthrough in a new area. The thesis must also reflect literary skills appropriate to the subject.

### b) *Award of a distinction for degree by thesis only:*

If all examiners agree that the degree be awarded with distinction, the Head of Department shall normally recommend accordingly. If after consultation, referred to in 4 above, one examiner should still remain opposed to a distinction, the Head of Department may, after consultation with the Dean, recommend the award of the degree with distinction. The Dean may accept such recommendation or may refer the issue to an arbiter.

L

# APPENDIX

## External examiner's report forms Master's degree (by Full Thesis)

**RHODES UNIVERSITY**  
*Where leaders learn*

EXTERNAL EXAMINER'S REPORT FORM  
MASTER'S DEGREE  
(By Full Thesis) Science

Report By: ..... On the Thesis presented by  
the Candidate: .....  
For the Degree of Master of: .....

Each examiner is required to complete and sign this form and to return it, together with a more detailed report, the Academic Administration Office.

*It should be stressed that Rhodes University regards such detailed reports as crucial to the examination process, and it is normal (but not obligatory) practice to supply them to students as good examples of "peer review", from which they can learn and draw benefit as they embark on their research careers. Although it is common that these reports draw attention to typographical errors and other editorial blemishes, examiners are urged not to confine themselves to simply listing these, but should report on the main features of the thesis, its merits and weaknesses, and draw attention to any aspects of particular interest or importance (suggestions of how the thesis or parts of it could be revised in article form for a reputable journal would be welcome). While no stipulation can be made as regards the length of the report, it is suggested that it might run to between three and five pages.*

CRITERIA

1. Has the candidate adequately identified and described the research problem/question and goal?  
.....
2. Does the thesis show that the candidate is sufficiently acquainted with the appropriate methods and techniques of research for the award of the degree?  
.....

3 Does the thesis show that the candidate has sufficient acquaintance with the current and other relevant literature? (Bibliography)

4. Does the thesis show that the candidate has both satisfactorily understood the nature of the problem or topic and assessed the significance of the findings?

5. Has the thesis satisfactorily presented the results of independent research for the award of the degree in a manner which is satisfactory as to literary style and presentation?

RECOMMENDATION

1. Do you recommend that: *Please choose ONE only*

1.1 the candidate be awarded the degree and that no corrections need be made to the thesis  
OR

1.2 the candidate be awarded the degree, but minor corrections (e.g. spelling, typing, references) should be made to the satisfaction of the supervisor and/or Head of Department  
OR

1.3 the candidate should be awarded the degree after identified changes have been made to the satisfaction of the supervisor and/or Head of Department  
OR

1.4 although the thesis does not meet the required standard, the candidate should be invited to do further work if necessary, revise and resubmit the thesis for re-examination by the examiners  
OR

1.5 the candidate should submit to an oral or written examination on the subject of his or her thesis and/or on the whole field of study which it covers  
OR

1.6 the degree should not be awarded to the candidate

2. Do you recommend that the degree be awarded with/without distinction?

*When the award of the degree with distinction is under consideration, examiners are asked to look for evidence of real methodological and conceptual skills, clarity of exposition and development of argument, sound judgement, originality of approach, and some contribution to knowledge, and require that the thesis should reflect literary skills appropriate to the subject.*

3. In the event of your not recommending that the degree be awarded with a distinction, would you object if, in light of other examiners' reports, a distinction is awarded?

Are you prepared to be identified to the candidate, if the degree is awarded and are you prepared to allow the candidate to read your report in whole or part?

*(Please be aware that it is normally the practice for examiner's reports, and the identity of the examiner, to be made known to the candidate at the end of the examination process. If an external examiner, or the Dean, has reason for not complying with this practice, this must specifically be requested of the Vice-Chancellor to act on behalf of Senate.)*

**INTERNAL & EXTERNAL EXAMINER'S REPORT  
 MASTER'S DEGREE  
 (By Half Thesis/Research Projects)  
 Except Master's in Business Administration or Education**

Candidate: .....

 HALF THESIS

 RESEARCH PROJECTS

Examiners are required to complete and sign this form and return it, together with a more detailed report, to the Academic Administration Office (Registrar's Division). The examiner should report on the main features of the research product, merits and weaknesses, and draw attention to any particular areas of interest or importance.

While length is not itself a criterion, examiners may find it useful to think of a half thesis as a small-scale study of about 20 - 30 000 words, and "projects" as (at least) 3 items totalling about 20 - 30 000 words, excluding appendices and reference lists. (By contrast, a Master's degree by full thesis would probably involve a substantive study of about 40 - 50 000 words.)

When the award of the degree with distinction is under consideration, examiners are asked to look for evidence of exceptional methodological and conceptual skills, clarity of exposition and argument, sound judgement, originality of approach, and some contribution to knowledge.

The following criteria may prove useful in assessing the research product. In situations where multiple small projects are assessed it is unlikely that all of these criteria will apply to each individually, but they would apply to the product as a whole. The projects therefore need to be assessed globally, rather than individually. Candidates should produce a rationale providing links among projects.

CRITERIA	YES	NO	N/A
1. Has the candidate adequately identified and described the research problem/question and goal within a clearly identified field?			
2. Is the candidate sufficiently acquainted with the relevant literature?			
3. Is the candidate sufficiently skilled at using appropriate research methods and techniques, as revealed in the analysis and interpretation of data and findings?			
4. Has the candidate presented the material in a logical, clear and systematic way?			
5. Has the candidate presented the material in a linguistically and stylistically accepted way?			

CRITERIA	YES	NO	N/A
6. Has the candidate provided evidence of critical reflection on the research process?			
7. (For research projects only) Is there evidence that learning has taken place through the research process? The rationale accompanying the projects should draw attention to this aspect.			
8. Do you recommend the candidate be awarded the degree?			
9. In the event of your recommending the candidate be awarded the degree do you recommend: <ul style="list-style-type: none"> <li>• No corrections</li> <li>• Editorial corrections</li> <li>• Revisions (improvements)</li> <li>• Extensions (additions)</li> </ul>			
If any of these are required, should they be to the satisfaction of the (choose one):			
<ul style="list-style-type: none"> <li>• The supervisor</li> <li>• The Head of Department</li> <li>• The external examiner</li> <li>• The internal examiner</li> </ul>			
10. Do you recommend a distinction?			
11. In the event of your not awarding a distinction, would you object if, in light of other examiners' reports, a distinction is awarded?			
12. Are you prepared to be identified to the candidate if the degree is awarded?			
13. Are you prepared to allow the candidate to read your report in whole or part? (Please be aware that it is normally the practice for examiner's reports, and the identity of the examiner, to be made known to the candidate at the end of the examination process. If an external examiner, or the Dean, has reason for not complying with this practice, this must specifically be requested of the Vice-Chancellor to act on behalf of Senate.)			
14. (For reports only) Please indicate a percentage.			
15. Please provide any additional comments.			

Suggested guidelines for mark allocation to be used at the discretion of the examiner in respect of degree by coursework and thesis. Marks are allocated for a half thesis and not a full thesis.

% MARK	These guidelines may be used in all areas of consideration
86 - 100	This candidate's work is in the top 10% of all Master's theses / mini-theses / dissertations that I have encountered, and is publishable in its present form
75 - 85	This candidate has met all the criteria extremely effectively and shows remarkable potential. There are large sections of the work that are publishable. This is a distinction candidate.
65 - 74	This is a highly competent effort. This candidate has a solid understanding of all that is required of him/her in the area under consideration.
55 - 64	This candidate has met the criteria, but has not progressed much beyond that position.
50 - 54	This is borderline work.
40 - 49	This thesis / mini-thesis / dissertation requires extensive reworking.
30 - 39	This candidate has misconstrued the requirements completely, but has made an effort.
Less than 30%	Less than 30% - this thesis / mini-thesis / dissertation is completely below standard.

While not binding, the weighting of marks reflected in the table below may be useful for structuring the evaluation of the thesis / dissertation / mini thesis. This may assist the examiner in justifying the mark allocated for the work.

Areas of Consideration	WEIGHTING	MARK GIVEN
Contextualisation, problem definition, planning	10	
Methodological considerations and procedures	10	
Knowledge of the field, the discipline and subject being researched (literature study)	20	
Ability to develop and sustain an argument; strategic follow-through; focus etc	30	
Validity and formulation of conclusions	15	
Style and Presentation	15	
<b>TOTAL</b>	<b>100</b>

## MASTER'S OF BUSINESS ADMINISTRATION (MBA) INTERNAL & EXTERNAL EXAMINER'S LETTER & REPORT

---

Dear Examiner

On behalf of the Rhodes Business School we would like to thank you for making yourself available to examine a Master of Business Administration (MBA) research paper.

The MBA is a Master's-level degree by coursework and dissertation. As such the dissertation needs to be examined at the Master's level, but significantly less work is required compared to that of a Master's degree by full thesis. The MBA dissertation counts for 30% of the total MBA mark, with the course work component making up the balance. As a coursework degree, a mark needs to be awarded to the dissertation. An examiner's report is enclosed for this purpose, and should supplement a more detailed narrative report.

Excluding preliminary pages, references and appendices, the body of the research report should be approximately 15 000 words (+70 pages) in length.

It is recognised that the length and format restrictions could affect the candidate's ability to make a substantial contribution to the field. Furthermore, the nature of the MBA degree often encourages research that is more applied in nature rather than theoretical, and typically candidates conduct the research in their own organisation, addressing organisationally relevant problems. In the light of these unique conditions, the following guidelines are offered in examining:

- Is the candidate sufficiently acquainted with the relevant literature to use it as a theoretical basis for the study? In other words, whilst a comprehensive review of the literature is beyond the scope of study, the candidate should be familiar with seminal, current and relevant theoretical contributions that inform the study.
- Is the candidate sufficiently acquainted with the appropriate methods and techniques of conducting the research and analysing the results? That is, the research has been conducted with sufficient rigour to place confidence in the results, while also recognising the limitations of the scope of the study and its contribution.
- Taking the scale of the research into account, its applied nature and limited scope, has the research made some contribution to practice or theory?
- Is the research presented in a satisfactory way? That is, the report should adopt a formal style, be appropriately structured, free of spelling, typographical and grammatical errors, and properly referenced, with a consistent referencing style applied.

I trust that these guidelines assist in clarifying your role as an examiner and we look forward to receiving your assessment and report in due course.

Professor Owen Skae  
Director

**RHODES UNIVERSITY**  
*Where leaders learn*

**INTERNAL & EXTERNAL EXAMINER'S REPORT  
 OF THE MBA DISSERTATION**

Report by:..... on the Dissertation presented by  
 the candidate: .....

for the Degree of Master of Business Administration.

Each examiner is required to complete and sign this form and return it, together with a more detailed report, to the Registrar's Office. The examiner should report on the main features of the Dissertation, its merits and weaknesses, and draw attention to any aspects of particular interest or importance. The report should clearly set out the corrections and/or revisions that the student is expected to make. As this is a Master's Degree by coursework and dissertation, a mark has to be awarded.

Suggested guidelines for mark allocation to be used at the discretion of the examiner.

% MARK	These guidelines may be used in all areas of consideration
86 - 100	This candidate's work is in the top 10% of all MBA dissertations that I have encountered, and is publishable
75 - 85	This candidate has met all the criteria extremely effectively and shows remarkable potential. This is a distinction candidate.
65 - 74	This is a highly competent effort. This candidate has a solid understanding of all that is required of him/her in the area under consideration.
55 - 64	This candidate has met the criteria, but has not progressed much beyond that position.
50 - 54	This is borderline work.
40 - 49	This dissertation requires extensive reworking.
30 - 39	This candidate has misconstrued the requirements completely, but has made an effort.
Less than 30%	This dissertation is completely below standard.

While not binding, the weighting of marks reflected in the table below may be useful for structuring the evaluation of the dissertation. This may assist the examiner in justifying the mark allocated for the work.

Areas of Consideration	WEIGHTING	MARK GIVEN
Contextualisation, problem definition, planning	10	
Methodological considerations and procedures	10	
Knowledge of the field, the discipline and subject being researched (literature study)	20	
Ability to develop and sustain an argument; strategic follow-through; focus etc	30	
Validity and formulation of conclusions	15	
Style and Presentation	15	
<b>TOTAL</b>	<b>100</b>	

Please indicate which one of the following you recommend:

	YES/NO
No corrections need to be made to the Dissertation	
Minor corrections should be made	
Further work should be done to revise and then resubmit for a re-examination	
Further work should be done to extend the research and then resubmit for a re-examination	

Should corrections, revisions or extensions be required, please indicate if they should be done to the satisfaction of the:

	YES/NO
Supervisor	
Head of Department	
Examiner	

Would you recommend that a distinction be awarded to the Dissertation? (Yes/No)

In the event of you not recommending that a distinction be awarded to the Dissertation, would you object if, in the light of other examiner's reports, a distinction is awarded? (Yes/No)

Are you prepared to be identified to the candidate, if the degree is awarded? (Yes/No)

---

MASTER'S IN FINE ARTS (MFA)  
GUIDELINES FOR EXAMINERS OF MASTER'S OF FINE ART DEGREES

---

## 1. Regulations

### G.53

The Faculty shall appoint a supervisor, or supervisors, to advise the candidate. At least one of the supervisors so appointed must be a member of staff. For the purposes of this Rule, members of associated institutions who are also members of a Faculty of the University are regarded as members of staff.

### G.60

Degree may be awarded with distinction.

## 2. Guidelines for Candidates

*These Guidelines are additional to the Rules governing the degree of Master as laid down in Rhodes University Calendar.*

The exhibition of artwork submitted for the degree of Master of Fine Art must show that the candidate:

- a) Has explored a coherent set of issues or ideas.
- b) Has produced works which are in essence original even though they may be to some degree influenced by the art of others.
- c) Has produced works which have contemporary relevance, i.e. which show alertness to some aspect of contemporary art discourse.
- d) Has acquired sufficient technical skills to realise his or her ideas satisfactorily.
- e) Has presented his/her work satisfactorily.

The mini-thesis submitted for the degree of Master of Fine Art must show that the candidate:

- a) Has been able to elucidate the artwork he or she has produced by discussing theories and works by other artists which have guided his or her thinking.
- b) Is sufficiently acquainted with the appropriate methods and techniques of research.
- c) Is sufficiently acquainted with the relevant literature.
- d) Has both satisfactorily understood the nature of the topic and assessed the significance of the findings.
- e) Has used a satisfactory literary style, and that his or her study is free from grammatical and typographical errors.
- f) Has included appropriate and complete references
- g) Has included satisfactory illustrations of art discussed as well as his or her work.

The thesis should be between 12 000 and 15 000 words of text, excluding footnotes, illustrative material and appendixes.

### 3. Reports

The external examiner is required to write a report which focuses on both the professional art submission and the mini thesis, and should offer a single recommendation for both. The second report, written by the supervisor of the professional art practice, must have attached a short commentary (normally a page) on the mini dissertation that is written the supervisor of that component of the study. Each examiner must indicate whether, in his or her view, the submission:

- 1) should be accepted in its present form
- 2) should be accepted in its present form with minor changes to the mini-thesis, usually of a stylistic, linguistic or bibliographic nature. (These must be clearly documented by the examiner, and are to be implemented at the discretion of the supervisor of the mini-dissertation.)
- 3) should not be rejected but referred back to the candidate for revision and reworking before resubmission; or
- 4) should be rejected.

Examiners should assume a research process in which candidates devoted 65% of their time to the production of the exhibition and 35% to the mini-thesis.

On receipt of both examiners' reports, the Academic Administration Office will transmit the relevant documentation to the Head of Department, who will collate all the reports and return them with his/her recommendation to the Academic Administration office. In the event of a significant disagreement between the reports, the Dean will in the first instance attempt to gain consensus by giving each examiner sight of the other examiner's report. Should no consensus be reached, the Dean shall, on the recommendation of the Head of Department, appoint an arbiter who shall be given sight of the mini-thesis, documentation of the exhibition, the initial examiners' reports, any further correspondence from the examiners, and the Head of Department's collation and recommendation. Upon receipt of the arbiter's report, the Dean will make a decision on behalf of the Faculty.

### 4. Confidentiality

From the outset the external examiner is asked:

- a) Whether he/she is prepared to be identified to a successful candidate.
- b) To indicate which section(s) of his/her report, if any, may be revealed to the candidate. Normally information permitted to be disclosed will be communicated to the candidate, but with the approval of the Dean. The Head of Department may, at his/her discretion, withhold part of the information sanctioned by the examiners.

### 5. Award of the Degree with Distinction

- a) *Specified criteria for the award of distinction*

The University reserves the award of a distinction for work of outstanding merit. Examiners are asked to look for evidence of real creative, methodological and conceptual skills. The art exhibition should be of a highly professional standard, and should demonstrate excellence in terms of its concept and realisation. The mini-thesis will also provide an outstanding elucidation of theories and ideas that have underpinned the making of the art exhibition.

- b) *Processes of making the award*

If both examiners agree that the degree be awarded with distinction, the Head of Department shall normally recommend accordingly. If after consultation referred to in 3 above, one examiner should still remain opposed to the distinction, the Head of Department may, after consultation with the Dean, recommend the award of the degree with distinction. The Dean may accept such recommendation or may refer the issue to an arbiter.

**INTERNAL & EXTERNAL EXAMINER'S  
LETTER & REPORT**

---

Template for letter to examiners of MFA degrees - to the external examiner

Name and address:.....

.....

Dear [Name of examiner] .....

Examination of MFA submission by [name of candidate] .....

I understand you have indicated a willingness to examine the MFA submission by the above candidate. I have pleasure in confirming that Senate has appointed you as an examiner. Thank you very much for agreeing to act as examiner.

The mini-thesis which forms part of the candidate's submission has been given to you by the Head of Department before you have undertaken your examination of the candidate's art exhibition. Also enclosed is a copy of the candidate's declaration, notes for the guidance of examiners of MFA degrees as well as a form for claiming payment of your fees in due course. Examiners retain their copy of the thesis with the compliments of the University.

I would appreciate your endeavouring to let me have your report as soon as possible. If you are not able to complete your report within four weeks of your visit to Rhodes to do this external evaluation, I would be grateful if you would inform me of this.

Your report may be submitted to me in hard copy (see above address) or it may be e-mailed to [academicadmin@ru.ac.za](mailto:academicadmin@ru.ac.za)

With kind regards,

**RHODES UNIVERSITY**

## GUIDELINES FOR EXAMINERS OF MASTER'S OF MUSIC DEGREES (COMPOSITION PORTFOLIO)

---

### 1. Regulations

#### G.56

The Faculty shall appoint a supervisor, or supervisors, to advise the candidate. At least one of the supervisors so appointed must be a member of staff. For the purposes of this Rule, members of associated institutions who are also members of a Faculty of the University are regarded as members of staff.

#### G.63

Degree may be awarded with distinction.

### 2. Guidelines for Candidates

*These Guidelines are additional to the Rules governing the degree of Master as laid down in Rhodes University Calendar.*

The composition portfolio submitted for the degree of Master of Music (either a full portfolio, or constituting 40% or 33% of the degree as defined in the Rhodes University Calendar) must show that the candidate has:

- a) explored a coherent set of musical ideas
- b) produced works which are in essence original even though they may to some degree be influenced by the compositional style or expressive idiom of others
- c) produced works which have contemporary relevance, i.e. which show alertness to some aspect(s) of contemporary compositional musical discourse and expression
- d) acquired sufficient technical skills to realise his or her ideas satisfactorily
- e) presented his/her work satisfactorily in a professional format.

The accompanying reflexive document should show awareness of:

- a) theories and works by other composers which have guided his or her thinking
- b) appropriate methods and techniques of research and academic writing
- c) literary style, and that his or her reflexive commentary is free from grammatical and typographical errors
- d) Has included appropriate and complete references
- e) Has included satisfactory notational illustrations from the literature and the portfolio to showcase important points within the portfolio.

### 3. Reports

The external examiner is required to write a report which focuses on both the submission as an entity: compositions and reflexive commentary, and should offer a single recommendation for the portfolio.

Each examiner must indicate whether, in his or her view, the portfolio:

- 1) should be accepted in its present form
- 2) should be accepted in its present form with minor changes (These must be clearly documented by the examiner, and are to be implemented at the discretion of the supervisor.)
- 3) should not be rejected but referred back to the candidate for revision and reworking before resubmission; or
- 4) should be rejected.

On receipt of both examiners' reports, the Academic Administration Office will forward the relevant documentation to the Head of Department, who will collate all the reports and return them with his/her recommendation to the Academic Administration office. In the event of a significant disagreement between the reports, the Dean will in the first instance attempt to gain consensus by giving each examiner sight of the other examiner's report. Should no consensus be reached, the Dean shall, on the recommendation of the Head of Department, appoint an arbiter who shall be given sight of the initial examiners' reports of the portfolio, any further correspondence from the examiners, and the Head of Department's collation and recommendation. Upon receipt of the arbiter's report, the Dean will make a decision on behalf of the Faculty.

#### 4. Confidentiality

From the outset the external examiner is asked:

- a) Whether he/she is prepared to be identified to a successful candidate.
- b) To indicate which section(s) of his/her report, if any, may be revealed to the candidate. Normally information permitted to be disclosed will be communicated to the candidate, but with the approval of the Dean. The Head of Department may, at his/her discretion, withhold part of the information sanctioned by the examiners.

#### 5. Award of the Degree with Distinction

- a) *Specified criteria for the award of distinction*

The University reserves the award of a distinction for work of outstanding merit. Examiners are asked to look for evidence of real creative, musically imaginative and conceptual skills. The portfolio should be of a highly professional standard, and should demonstrate excellence in terms of its concept and realisation.

- b) *Processes of making the award*

If both examiners agree that the degree be awarded with distinction, the Head of Department shall normally recommend accordingly. If after consultation referred to in 3 above, one examiner should still remain opposed to the distinction, the Head of Department may, after consultation with the Dean, recommend the award of the degree with distinction. The Dean may accept such recommendation or may refer the issue to an arbiter.

**EXAMINER'S LETTER & GUIDELINES  
FOR MMUS COMPOSITION PORTFOLIO**

---

Name and address:.....  
.....

Dear [Name of examiner].....

Examination of MMUS submission portfolio by [name of candidate]

I understand you have indicated a willingness to examine the MMus submission by the above mentioned candidate. I have pleasure in confirming that Senate has appointed you as an examiner. Thank you very much for agreeing to act as examiner.

The portfolio comprises a set of compositions with an accompanying reflexive commentary. Also enclosed is a copy of the candidate's declaration, notes for the guidance of examiners of composition portfolios at the Master's level, a short supervisor's report, as well as a form for claiming payment of your fees. Examiners retain their copy of the thesis with the compliments of the University.

I would appreciate your endeavouring to let me have your report as soon as possible. If you are not able to complete your report within six weeks I would be grateful if you would inform me of this delay.

Your report may be submitted to me in hard copy (see above address) or it may be e-mailed to [academicadmin@ru.ac.za](mailto:academicadmin@ru.ac.za)

With kind regards,

**RHODES UNIVERSITY**

## GUIDELINES FOR EXAMINERS OF MASTER OF MUSIC DEGREE (COMPOSITION PORTFOLIO)

---

Submitted in partial fulfilment for the degree MMus

The following guidelines apply to the composition portfolio component of the degree Master of Music awarded on completion of two public recitals (60%) and the submission of a short composition portfolio (40%), as specified under 'Degree of Master of Music', subsection iv, in the Rhodes University Calendar 2014, page 229.

### **I) Length**

**Western art music:** In the case of portfolios of work composed in the Western Art Music idiom, the portfolio must be at least 40 minutes long.

**Popular music and jazz:** In the case of portfolios drawing on popular and/or jazz styles that feature improvisation, are typically not through-composed, and feature cyclical musical structures, the portfolio will consist of:

- a) FIVE original pieces, presented in the form of lead sheets
- b) for TWO of the original pieces, an arrangement for small ensemble of four to nine players
- c) TWO arrangements of popular and/or jazz 'standards' for small ensemble of four to nine players
- d) TWO extended arrangements of original pieces or 'standards' for a large ensemble of ten or more players, OR THREE shorter arrangements of original pieces or 'standards' for ten or more players.

### **II) Structure**

**Western art music:** In the case of portfolios of work composed in the Western Art Music idiom, the portfolio must include no less than three and no more than seven separate pieces.

**Popular music and jazz:** In the case of portfolios drawing on popular and/or jazz styles that feature improvisation, are typically not through-composed, and feature cyclical musical structures, the portfolio will consist of:

- a) FIVE original pieces, presented in the form of lead sheets
- b) for TWO of the original pieces, an arrangement for small ensemble of four to nine players
- c) TWO arrangements of popular and/or jazz 'standards' for small ensemble of four to nine players
- d) TWO extended arrangements of original pieces or 'standards' for a large ensemble of ten or more players, OR THREE shorter arrangements of original pieces or 'standards' for ten or more players.

### **III) Content**

The portfolio must include works for a variety of instruments and instrument combinations. It is recommended that works for solo instruments, small ensemble as well as larger ensemble (sextet and larger) should be included.

### **IV) Submission**

In addition to the score, all pieces should either be recorded or be submitted in midi sound files.

**MASTER'S DEGREE IN CLINICAL OR COUNSELLING PSYCHOLOGY  
EXTERNAL EXAMINER'S LETTER AND REPORT**

---

Dear External Examiner,

Thank you for agreeing to act as external examiner for the enclosed research report. This research report is submitted in **partial fulfilment** of a Master's degree in Clinical or Counselling Psychology.

Examination for this degree is by coursework and a research report of approximately 50 pages. Candidates are expected to complete this report by the end of their second year of Master's with their first year devoted to completing their coursework, and their second year devoted to completing an internship. It is therefore incumbent on the student and supervisor to conceptualise and conduct a research project that is of a limited scope (certainly a smaller project than what is expected of a Master's by thesis only) and we would like you to bear this in mind when assessing the candidate's work. Nevertheless, while the scope of the project is expected to be circumscribed, students are expected to produce work that fulfils the technical requirements of a Master's level research report. This includes an adequate literature review, a sound understanding of methodology and a cogent and plausible analysis of research findings. Originality is not expected at Master's level, but this should be taken into account in the decision to award a distinction.

Yours sincerely

Department of Psychology, Rhodes University.

## M

## APPENDIX

# Guidelines for examiners for the degree of Doctor of Philosophy

1. The following requirements for the degree of Doctor of Philosophy are quoted for the information of Examiners:

## Rules

### G.62

Subject to the provisions of Rule G.49, a candidate shall not be admitted to the degree of Doctor of Philosophy until at least three years after admission to the degree or status of Bachelor with Honours (in any Faculty), or of Bachelor of Laws, or of Bachelor of Education, or of Bachelor of Music, or until at least two years after admission to the degree of Master.

### G.63

Candidates for the degree of Doctor of Philosophy in any Faculty shall be registered for and attend an approved course of special study or research at the University for the period prescribed in Rule G.62; provided that the Senate may exempt candidates from such attendance or part thereof, and may instead require them to perform such work as it may prescribe during that period.

### G.65

The Senate shall appoint a supervisor or supervisors to advise a candidate. At least one of the supervisors so appointed must be a member of staff. For the purposes of the Rule, members of associated institutes who are also members of a Faculty of the University are regarded as members of staff. Candidates may be permitted to register in an associated Research Institute without requiring a co-supervisor in a related academic department, but the research proposal must be approved by the Dean after considering a recommendation from a member of a cognate department. At least one of the supervisors for such candidates must be a member of the relevant Faculty Board.

65.1 The candidate shall work in such association with the supervisor as the Senate may direct.

### G.66

Candidates shall submit a thesis on the results of their study which shows evidence of originality and independent research.

### G.70

Candidates shall submit a declaration, satisfactory to the Senate, stating to what extent the thesis is their original work, and certifying that it has not been submitted for a degree at any other university.

*(Note: the declaration is to be sent to the external examiners with the thesis)*

### G.72

Candidates may be required by the Senate, if the examiners so recommend, to submit to a written or oral examination on the subject of their thesis and on the whole field of study which it covers.

### G.73

An application to re-submit a thesis which has been rejected shall not be entertained, but the Senate may, on the advice of the examiners, invite a candidate to re-submit a thesis in a revised or extended form.

## 2. Guidelines for Candidates

*These Guidelines are additional to the Rules governing the degree of Doctor of Philosophy as laid down in the University Calendar.*

A thesis for the degree of Doctor of Philosophy must show that the candidate:

- 2.1 demonstrates high-level research capability;
- 2.2 is sufficiently acquainted with the appropriate methods of research;
- 2.3 is sufficiently acquainted with the relevant literature;
- 2.4 has satisfactorily presented the results of independent research for the award of the degree;
- 2.5 has made a substantial and original contribution to knowledge in the discipline, the substance of which is worthy of publication in a scholarly journal or book.

In addition, such thesis must be satisfactory as to literacy style and presentation. A PhD thesis cannot be merely a collection of published papers, nor may such published papers be included as annexures or inserts.

The PhD degree is normally obtained by means of research work and the subsequent presentation of the thesis. Senior Doctorates are awarded scholars of international stature whose published works constitute a distinguished contribution of the advancement of knowledge in their field. Variations of the PhD are indicated below:

A PhD in **Psychotherapy** is a course-work programme in two parts. The first part consists of four written papers and a case study, the second of a thesis.

A PhD candidate in **Music and Musicology** is required to submit either a thesis or set of compositions and the candidate must also submit an explanatory statement referring to any important aspects of the scores including, in particular, a description of the form or forms employed and of any contrapuntal, harmonic and orchestration devices used.

PhD candidates in **Science** must, in addition show that they understand the purpose of the Investigation and that they have developed, or adapted, and used the appropriate methods and techniques.

## 3. Reports

- a) The external examiners are each required *independently* to complete a report form, and to write a report on the thesis. The report form and detailed report can be sent to Academic Administration by email [academicadmin@ru.ac.za](mailto:academicadmin@ru.ac.za) as soon as possible. Examiner's reports should be received two weeks prior to the published deadline of when the final electronic Library copy is required for the student to graduate in that year. Should examiner's reports arrive after this deadline, they would be held by the Registrar's Division until after Graduation.
- b) The supervisors may, if they so wish or at the request of the external examiner, render a *factual report* to the external examiners, containing any facts about the preparation of the thesis which is deemed advisable to communicate to the external examiners. This should be returned by the external examiner together with the examiner's report to the Registrar.

- c) On receipt of the examiners' reports, Academic Administration shall collate the forms and report to the relevant Dean, who will consult the Committee of Assessors who are required to make a recommendation. The Dean will make a recommendation directly to the Vice-Chancellor for action on behalf of Senate. If the examiners agree that a revision and re-submission is required, the Dean may so recommend without consulting Faculty.

#### 4. Confidentiality

From the outset external examiners should be asked:

1. whether or not they are prepared to be identified to a successful candidate for the degree of Doctor of Philosophy; and/or
2. to indicate which section(s) of their reports, if any, may be revealed to a candidate.

Please be aware that it is normally the practice for examiner's reports, and the identity of the examiner, to be made known to the candidate at the end of the examination process. If an external examiner, or the Dean, has reason for not complying with this practice, this must specifically be requested of the Vice Chancellor to act on behalf of Senate (examiners can indicate this on the report form).

#### 5. Thesis referred back for revision and re-examination

If any examiner insists that the thesis be referred back to the candidate for correction as a condition for the award of the degree, the examiner shall be required to indicate clearly, to the satisfaction of the Dean, what has to be done by the candidate; and in the case of major revision, or correction, or extension, the examiners may be required to re-examine the thesis once this has been done

**RHODES UNIVERSITY**  
*Where leaders learn*

**EXTERNAL EXAMINER'S REPORT FORM  
DEGREE OF DOCTOR OF PHILOSOPHY**

Report by: ..... on the Thesis presented by  
the candidate: .....  
for the Degree of Doctor of Philosophy.

Each examiner is required to complete and sign this form and to return it, together with a more detailed report, to the Academic Administration Office.

*It should be stressed that Rhodes University regards such detailed reports as crucial to the examination process, and it is normal (but not obligatory) practice to supply them to students as good examples of "peer review", from which they can learn and draw benefit as they embark on their research careers. Although it is common that these reports draw attention to typographical errors and other editorial blemishes, examiners are urged not to confine themselves to simply listing these, but should report on the main features of the thesis, its merits and weaknesses, and draw attention to any aspects of particular interest or importance (suggestions of how the thesis or parts of it could be revised in article form for a reputable journal would be welcome). While no stipulation can be made as regards the length of the report, it is suggested that it might run to between three and five pages.*

**CRITERIA**

1. Has the candidate adequately identified and described the research problem / question and goal?  
.....
2. Does the thesis show that the candidate is sufficiently acquainted with the appropriate methods and techniques of research for the award of the degree?  
.....
3. Does the thesis show that the candidate has sufficient acquaintance with the current and other relevant literature? (Bibliography)  
.....
4. Is the thesis satisfactory as regards literary presentation? (Systematic, documented, etc  
.....
5. Does it constitute an original contribution?  
.....
6. Is the substance of the thesis worthy of publication?  
.....

RECOMMENDATION

1. Do you recommend that: *Please choose ONE only*
- 1.1 the candidate be awarded the degree and that no corrections need be made to the thesis  
OR
  - 1.2 the candidate be awarded the degree, but minor corrections (e.g. spelling, typing, references) should be made to the satisfaction of the supervisor and/or Head of Department  
OR
  - 1.3 the candidate should be awarded the degree after identified changes have been made to the satisfaction of the supervisor and/or Head of Department  
OR
  - 1.4 although the thesis does not meet the required standard, the candidate should be invited to do further work if necessary, revise and resubmit the thesis for re-examination by the examiners  
OR
  - 1.5 the candidate should submit to an oral or written examination on the subject of his or her thesis and/or on the whole field of study which it covers  
OR
  - 1.6 the degree should not be awarded to the candidate

Are you prepared to be identified to the candidate, if the degree is awarded and are you prepared to allow the candidate to read your report in whole or part?

*(Please be aware that it is normally the practice for examiner's reports, and the identity of the examiner, to be made known to the candidate at the end of the examination process. If an external examiner, or the Dean, has reason for not complying with this practice, this must specifically be requested of the Vice-Chancellor to act on behalf of Senate.)*

## DOCTOR OF PHILOSOPHY (PhD) MUSIC COMPOSITION

---

### Requirements

"A set of compositions must consist of at least three substantial original compositions (not less than 70 minutes in duration), the character and form of which must receive the prior approval of the Senate on the recommendation of the Head of Department and the Departmental Postgraduate Research Committee.

Where compositions are submitted, the candidate must also submit an explanatory statement (not less than 25 000 words) referring to important aspects of the scores, including in particular a description of the form or forms employed and of any contrapuntal, harmonic and orchestration devices used. This document should detail the portfolio's theme or contextualizing thread. Recordings of compositions are required." (Rhodes University Calendar 2015, 216).

### Guidelines for Assessment

The reflexive document (explanatory statement) and compositions are to be considered as a single entity. Attention should be given to how the reflexive document informs understanding of the works, and engenders appreciation of each work as an artistic creation. Particular focus on how the works relate to, and bolster, the portfolio's underlying context is necessary; with the thread between context (reflexive document) and the works forming an inter-related whole.

Importantly, while the reflexive document should conform to acceptable academic style and norms, this should not be considered as a thesis, its aim being to outline the most important features of each composition and supply the reader with the portfolio's contextualizing thread. Further, the portfolio should be considered as a creative endeavour and not as a thesis.

Assessment commentary should include evidence of the following:

- emergence of an individualized style/voice, especially within the context of the portfolio's contextualization
- technical finesse matched with artistic expressivity
- advanced musicianship coupled with resourceful ingenuity and creative probity

As with all doctoral submissions that ultimately either succeed or do not, it is not necessary to award a grading (percentage). Motivation for the final decision should be contained in the assessment commentary.
