E-mail address: melissa.govender@nrf.ac.za

Mr Walter Baloyi
Liaison Officer: GMSA
Telephone: (012) 481 4353
E-mail address: walter.baloyi@nrf.ac.za

The Grants Management and Systems Administration (GMSA) Directorate of the National Research Foundation (NRF) processes all grant applications. Application guidelines are explained in this document. Please read this document together with the call or framework document of the programme that highlights the programme eligibility criteria and requirements.
For technical online enquiries, please contact the NRF Support Desk during office hours (08:00 –16:30). Tel: (012) 481-4202; E-mail: Supportdesk@nrf.ac.za

1. Introduction

This Manual provides an overview of the DST-NRF Collaborative Postgraduate Training (CPT), application funding guidelines and processes. It should be read in conjunction with the programme call or framework document, which can be accessed at https://nrfsubmission.nrf.ac.za. It does not, however, constitute a complete set of the policies, procedures or systems used by the NRF.

2. Application Process

The NRF issues a call for CPT applications which is published on the NRF website and is accessible online at https://nrfsubmission.nrf.ac.za.

All applications must be duly authorised and approved by the Designated Authority (DA) of the research administration at the institution that submits the application. Applications must be submitted electronically to the institutional Designated Authority (DA) of the submitting institution for validation at the deadline date determined per institution. Please query with your institution around their closing dates.

The processing of a successful grant application takes approximately five (5) months from the time of submission until the commencement of funding.

3. How to Submit Applications

Applications can be completed on the NRF Online Submission System at https://nrfsubmission.nrf.ac.za from Thursday, 16 March 2017. Applicants are advised to complete their applications as soon as possible to prevent IT system overload near the closing date.

Note: SARChI and CoE grant holders are not eligible to apply to this call.
Step 1: This is an electronic submission system and applicants need to be registered on the system in order to create and complete an application. If you previously registered on the NRF Online System (http://nrfonline.nrf.ac.za) before February 2012, your details would have been migrated to the new NRF Online Submission System (https://nrfsubmission.nrf.ac.za). If you experience problems accessing the system with your NRF Online password, use the Reset Password button. If you are not yet registered on the NRF Online Submission System, you should register to access the application form.
Step 2: Once you have logged in to the NRF Online Submission System, on the landing page, go to the left hand side black menu (tab indicated with blue arrow) to create a new application, go to My Applications - Create Application.

![NRF Online Submission System](image)

- **Quick Links**
  - Grant-holder Tools
  - Institution Facilities
  - Panel Meetings
  - Application and Output History (NRF Online)
  - Application History (NRF Interim)
  - SKA SA Grants

**Information**

- **PLEASE NOTE:** The summary below only lists output records that were migrated from the previous NRF Online system. New records that are added on this system will not form part of this summary.
- Applicants must ensure that their CV is updated/updated before creating an application.
- In order for your migrated research outputs to show on the CV, they must be accessible for selection on applications that require your publication record, you must verify (review) the outputs listed in the Research Outputs Summary table below. In order to do this, click on the output type that still has outputs to be verified (see the To be Reviewed column). Scroll to the bottom of the screen and a heading saying cleaned-up research output records from NRF Online will be displayed. Click on the little black arrow. This will display the output(s) that needs to be verified. Then click on the View icon, it will open a screen with the data for the output. Please fill in the missing information and save the page. If you have more than one output per output type, click on View for the next output. Do this for all the outputs, the output type on the landing page should now say 0. Move on to the next output type and repeat the process. Should you wish to delete an output, then click on the Feedback box, fill in the Feedback to the NRF box (e.g., output duplicated, please delete) and in the Status field, please select Delete.
- In some cases, researchers’ outputs don’t show at all. The reason for this is:
  1. The ID/passport number which the cleaned data was linked to when the clean-up exercise was undertaken differs from the ID/passport number you have just used to login to the NRF Online Submission System.
  2. No outputs were added on the old NRF Online system so there was nothing to migrate. If there were outputs on the old NRF Online system but they do not show in the summary below, you need to ensure that the ID/passport numbers used on both the old NRF Online and this system (NRF Online Submission System) are the same. Please contact the NRF should your outputs not show so that this can be rectified.
Step 3: Select the funding programme for which you are applying on the Create Application screen, this will open up a new application for you to complete. Please note this should only be selected once and you’ll be provided with a reference number. To continue working on an application, go to My Applications-List of Applications and click on the relevant reference number.
Step 4: Applicants are urged to complete or update ALL screens of the CV, including the Research Profile and Research Outputs (if applicable), as this information is referred to in the review process.
Step 5: All sections marked with a red asterisks are compulsory sections in the application. These sections need to be completed in order for the final submit button to appear. The sections without asterisks are non-compulsory sections. You may enter information in these sections, if you have information to enter, such as research outputs. Completed sections will be indicated by a green tick on the main menu, while incomplete sections have a yellow cross.

All compulsory sections will guide you with error messages. Please follow these messages to help you complete the section correctly.
Step 6: Most application screens have screen and application specific instructions to help you work through the section. Please read the instructions carefully before completing the section.

Step 7: Project Information section will require you to select your proposed institution from a drop down list. You will also have to provide summarised information on the project including the required funding period. *The normal funding period is 3 years. Only choose 5 years if you will be hosting part-time doctoral students.
Step 8: The *Details of Research* section is one of the most important sections in the application. Please provide an overview of your research projects in these sections. The section has specific instructions related to each screen. Please follow the instructions to complete the section. It is important that you enter detailed information into this section as the input is taken into consideration during the assessment process.

*Please note: If, for example, three (3) projects are entered under the *Project Details* sub-section, then all three projects need to have *Research Collaborations* and *Postgraduate Supervisors* linked to them in order for all sub-sections to mark as complete.*

*Project Details* sub-section:

- **Project Description:** Provide background of the research project as well as clear aims and objectives for your current research.
- **Alignment with national priority/scarse skill area and/or vulnerable disciplines:** How will the Honours, Masters and Doctoral training align with national priorities, scarce skill area(s) and/or a vulnerable discipline?
- **Projected Outputs:** Provide details on envisaged measurable outputs, e.g. publications, patents, conference presentations and proceedings, etc.
- **Available research grants or funding:** Indicate any available research grant or funding to support the research to be undertaken by Honours, Masters and Doctoral students.
Step 9: The Research Collaboration sub-section requests the applicant to enter any participating members/collaborators involved in each of the research projects that have been listed under the Project Details sub-section.
Choose the relevant project from the dropdown list and complete the remaining sections.

*Note: Please include at least two Historically Disadvantaged Higher Education Institutions, one of which may be the lead institution in the application. For a list of these historically disadvantaged HEIs, please refer to the Call Document.
Step 10: The sub-section Postgraduate Supervisors is very important and requires the applicant to indicate the supervisors as well as the number of students (Honours, Masters and Doctoral) required for the funding period.
You will have to search for the postgraduate supervisor. If the person is not registered on the NRF Online System, you will not be able to find them. Therefore please ensure that the relevant supervisors are registered prior to completing the application.

*The supervisor’s online CV is generated as an attachment to the application.

Once you have selected the supervisor, you will then be able to add the number and level of students required per year. This will then pull through as a summary on the Postgraduate Supervisors sub-section.
Step 11: The *Preferred Panel* section is where you select the relevant panels under which the projects listed in your application should be reviewed.

The Scorecard used in the review process can be found in Section 5 (Page 22) of this document.
**Step 12:** The *Attachments* section will automatically pull through the CVs of the postgraduate supervisors you have listed.

**Step 13:** The Financials: Operating Costs section is an important section where you will list the operating costs under the specific sub-sections that you will need. Sub-sections include Research Equipment and Specialised Computer Software, Research Materials and Supplies, Visiting Scientist/Mentor and lastly, Science Communication and Outreach Activities.
You will be able to add items under each of the sub-sections. Once complete, you will be able to view a summary of the operating costs.
Please keep in mind that 60% of the total budget should be allocated to student support and 40% of the total requested number of students towards operating costs. The capped total budget per annum is R1 500 000.

**Step 14:** Applicants need to complete the *Declaration* section by ticking the box indicated below:

![Declaration](image)

**Step 15:** Applicants must ensure that they adhere to their institution’s internal closing date for submission of their application to allow for internal institutional screening and review. The internal closing date will be determined by the respective research offices and is usually at least two (2) weeks prior to the NRF’s closing date.

It is important that all proposals are screened and approved through internal institutional processes **before** being submitted to the NRF. The NRF assumes that the respective DAs are satisfied with the standard of all proposals validated and submitted, and that the institution approves and supports the proposed research.
Step 16: The final submit button will appear only if all compulsory sections are complete. Please remember to submit your application for consideration. If all the compulsory sections are complete and the final submit button does not appear, please select any section, and resave to refresh the application. You will then see the final submit button. When an application has been submitted by the applicant, it is automatically routed to the Designated Authority (DA) in the Research Office of the institution that you have selected, for internal review and validation. Late applications, additional supporting documentation or information received after the closing date will not be accepted or considered.

The NRF will not process applications that are incomplete, contain insufficient or incorrect details, or fail to comply with instructions. Such applications will be rejected. The application must be completed in sufficient detail to allow for a comprehensive review and evaluation by internal and external reviewers. In addition to the electronic application and required attachments, the NRF may request additional information or documentation to support an application if required. Failure to supply such information or documentation upon request may result in the rejection of the application.

4. Screening and Review Processes

4.1 Overview of the Screening Process
All applications validated by institutions and submitted to the NRF are screened by the NRF for compliance with the eligibility criteria as stipulated in the Call for applications, as well as the requirements for completing the online application. Applications that fail to meet the stipulated requirements will be rejected.

4.2 Overview of the Review Process
The NRF’s peer review policy requires that all applications be subjected to a review process. Applications submitted to this programme will go through a panel review process.

Panel members are selected from the NRF database and other sources, which is updated on a continuous basis. In making the selection of the panel, the expertise and experience of individuals in application adjudication are taken into account. In assessing the application, agreed assessment criteria are applied in the form of a scorecard.

The Panel provides recommendations to the NRF although the final funding decision is made by the NRF. The NRF takes into account the recommendations of the peer review panels, the objectives and targets of the programme, and the available funds when awarding grants under this programme.
5. Ranking of Applications
The purpose of the scoring system is to evaluate applications, based on programme criteria, in order to determine applicants that are most deserving of the limited funds available. All research proposals submitted to the NRF for funding are evaluated according to a number of predetermined criteria. Applications are assessed and ranked on the basis of criteria as listed in the table below. Each area may be given a weight to indicate its relative importance. Kindly consult the table below for details on the criteria used.

Table 1: Scorecard for the evaluation of applications for Collaborative Postgraduate Training

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Sub-Criteria</th>
<th>Weight (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Track Record of Applicant</td>
<td>Past research outputs (Journal articles, conference presentations and proceedings, book chapters, patents and awards), the candidate's research experience, postgraduate supervision experience, and experience to host a cohort of postgraduate students.</td>
<td>15%</td>
</tr>
<tr>
<td>2. Human Capital Development</td>
<td>Student involvement/training outlined, Expected outputs and outcomes in advancing HCD, alignment with national research priority/scarce skill area and/or vulnerable discipline.</td>
<td>40%</td>
</tr>
<tr>
<td>3. Potential Research Outputs</td>
<td>Details of envisaged realistic outputs of the research such as publications, conference proceedings, toolkits, policy documents.</td>
<td>20%</td>
</tr>
<tr>
<td>4. Collaboration on Research Project</td>
<td>Collaboration between institutions include historically disadvantaged higher education institutions. Existing research collaborations with national and international research institutions and universities demonstrated.</td>
<td>20%</td>
</tr>
<tr>
<td>5. Running Cost and Requested Budget</td>
<td>Access to research grant or funding to support the research to be undertaken by the Postgraduate students and feasibility of the requested budget. Must indicate the value of available or previous funds and source of funding. Sixty percent (60%) of the total budget should be allocated towards human capital development (HCD) and forty percent (40%) towards operating costs. The forty percent is inclusive of Small to medium-sized equipment costing no more than R200 000 (two hundred thousand rand); Specialised computer software required for postgraduate training; Postgraduate training workshops; Travel and Subsistence for International guest lecturers. The total requested budget (Human Capital Development, Infrastructure and Operational cost) under this programme cannot exceed R1 500 000 per annum.</td>
<td>5%</td>
</tr>

<td>100%</td>
</tr>
</tbody>
</table>
6. Applications Feedback and Disputes
Once the review and assessment processes have been completed and the recommended funding decision has been approved by the NRF, the NRF will send award letters to institutions and successful applicants. Should an unsuccessful applicant require feedback they are requested to follow the process and query via their institutional office.

Unsuccessful applicants that wish to appeal the funding decision taken must follow the appropriate Appeals Process of the NRF. Appeals will only be considered for this programme within a one-month period after the official publication of results on the NRF website.

Grant holders need to nominate the candidate/s under the provided UID and upload correct and relevant documents so that the NRF can process the nomination and release funds.

All unused funds will be cancelled and/or re-distributed under the programme. In addition, no carry forwards will be considered under the DST-NRF Collaborative Postgraduate Training.

7. Awardee Responsibilities

7.1 Reporting
Continued funding beyond the first year is dependent on the submission of an APR to the NRF by the students nominated under the award, during a call for APR’s in October/ November of each grant year. Continued funding will be considered based on satisfactory progress and host support.

An Annual Progress Report (APR) must be submitted by the nominee in a format provided by the NRF, documenting progress made against set objectives and research outputs. The grant holder needs to re-nominate the candidate and upload proof of registration for that particular year. The NRF may in consultation with the Research Office, request interim progress reports for the purpose of implementing corrective measures timeously to ensure that stated objectives are met within stipulated timeframes.

7.2 Managing changes during the project life cycle
Changes may occur during the project life cycle due to unforeseen and extenuating circumstances. Please note the following on how to manage the award and subsequent changes (planned or unanticipated) should they arise during the project life cycle.
7.2.1 Change Requests

7.2.1.1 Prior Approval Requests
Applicants must submit all change requests in writing to the NRF for approval before effecting any changes. The request must have institutional DA endorsement and be submitted to the NRF via the Research Office for approval prior to the change.

7.2.1.2 Changes in supervisor/mentor
Changes may occur where a supervisor/mentor needs to be changed from the original research proposal. The request must have institutional DA endorsement and be submitted to the NRF via the Research Office. The grant holder should notify the NRF in writing of the proposed changes as soon as possible.

8. Scientific Compliance

8.1 Methodology
The grant holder takes scientific responsibility for the research to be undertaken, including its objectives and the methodology outlined in the project proposal. The grant holder is required to devote the necessary time to the research project in compliance with the workplan for the research proposal approved by the NRF so as to achieve the project’s stated aims and objectives.

8.2 Intellectual Property Rights
The intellectual capital generated by NRF funded research must be appropriately protected and exploited for the benefit of South Africa. This condition should not interfere with the Intellectual Property Rights arrangements already made, on condition that the majority of the benefits arising from the intellectual capital accrue to South Africa and its citizens. This condition is aligned with the Intellectual Property Rights Act,1 which will override this condition of grant.

8.3 Ethics
The candidate is required to maintain the highest ethical and safety standards in conducting the research, particularly when human and animal subjects are involved. It remains the
responsibility of the project leader to comply with all relevant regulations in this regard, including those of the institution at which the research is carried out. An ethical clearance certificate (where applicable) must be submitted to the NRF in respect of successful applications before funding can be released.

9. List of References
