PREFACE

The main tasks of a University are teaching, research and community service and I am pleased to report that research at Rhodes University continues to flourish. This research report for 2001 indicates that the research outputs of Rhodes staff and students remain excellent in terms of both volume and quality.

In comparing research outputs of Universities it is important that comparisons are made relative to the size of the University. Perhaps the best way of doing this is to compare the research outputs in terms of the Government Subsidy which is based on audited figures of the size of a University and is also an expression of the value that the tax payer is getting for his/her contribution. It is very gratifying that for the most recent years for which the data is available to make the comparison, that Rhodes' research output relative to the size of the University is the best in South Africa.

The research contributions mentioned in this report have been made amidst many other demands such as increased student numbers, a very competitive funding environment and Institutional restructuring. I would therefore like to congratulate every member of staff who has contributed to the research effort of the University.

DR. D.R. WOODS
VICE-CHANCELLOR

INTRODUCTION

This is the first formal research report published by Rhodes University. The reason research reports have not been published previously is that the annual Council and Senate report was largely a research report and it was unnecessary to duplicate this report. However, the required format of the University's Annual Report has changed considerably from 2001 and no longer includes detailed information on the research outputs.

I would like to add my congratulations to that of the Vice-Chancellor to all the staff and postgraduate students for their research efforts in 2001. Rhodes continues to be the leading Institution in South Africa in terms of research outputs relative to its size (determined by Government subsidy income). This is very significant and it is critical that this prominence be maintained, particularly in view of the recent restructuring of Higher Education in South Africa and the greater emphasis likely to be placed on research productivity by the revised funding formula.

Research at Rhodes is actively supported by the University's Management and a variety of internal support services including, amongst others, the Library, Information Technology, laboratory and equipment support services and the entire academic, administrative and financial infrastructure. Without this support it would be impossible to conduct research.

Special thanks must go to the staff in the Research Office for all their efforts in promoting research and in particular to Moira Pogrand who compiled the majority of this report.

PROFESSOR J.R. DUNCAN
DEAN OF RESEARCH

HIGHLIGHTS

FUNDING

In 2001 Rhodes researchers continued to receive significant funding from a wide variety of sources for research programmes varying from research on Drug Delivery, Distributed Multimedia, Biotechnology, Novel Anticancer Drugs, Natural Products, Environmental Science, Marine and Fisheries Science to Crime Prevention, Indigenous Knowledge Systems, Public Service Monitoring, Social and Economic Development, Visual and Performing Arts, Resettlement and Land Reform amongst many others.

Exciting new developments have included a major National collaborative programme led by the South African Institute for Aquatic Biodiversity (formerly the JLB Smith Institute) and the Department of Biochemistry, Microbiology and Biotechnology to conduct research on Conservation of the Coelacanth and its Genomics. Significant funding for this project will be provided by the Department of Arts, Culture Science and Technology and International organisations.

Another new development for the University has been the formation of a partnership between the University, members of the Department of Ichthyology and Fisheries Sciences and private consultants resulting in the establishment of an independent campus company known as Enviro Fish Africa (Pty) Ltd. This is in line with a trend of increased funding of research at the University from Private Sources.

In the past four years funding for research at Rhodes has more than doubled and the proportion contributed by Private funders has increased from 45% to nearly 60%.

AWARDS AND HONOURS

Significant research achievements by staff at Rhodes in the past year have been the award of an Honorary Fellowship of the Microscopy Society of SA to Mr. Robin Cross (EM Unit), a Gold Medal from the Wildlife and Environmental of SA to Professor Pat Irwin (Education) and the Meiring Naude Gold Medal of the Royal Society of SA to Dr. William Froneman (Zoology and Entomology). Professor Tebello Nyokong (Chemistry) has been elected as a Fellow of the Royal Society of SA and Professor Izzy Kanfer (Pharmacy) was appointed Associate Editor of the *Journal of Pharmacy and Pharmaceutical Sciences* and Chairperson of the Expert Committee for Pharmaceutical Sciences (Analytical) of the Medicines Control Board. Professor Colin Lewis (Geography) was elected President of the SA Society for Quaternary Research.

Two Vice-Chancellor's Research awards were made in 2001. The Distinguished Research Awardee was Dr. Riekie Meintjes (Law) and two Senior Distinguished Awards were made to Professor Tom Hecht (Ichthyology and Fisheries Science) and Professor Perry Kaye (Chemistry). Dr. Desire Vencatachellum (Canada) was awarded the Hobart Houghton Fellowship to carry out research in the Department of Economics and Economic History.

A number of staff also received prestigious research grants and travel awards to overseas institutions. These included a place on a Fulbright American Studies-Summer Programme worth US\$10 000 to Dr. Gareth Cornwell (English), Ernest Oppenheimer Overseas Sabbatical Support Grants to Professors Laurence Wright (ISEA), Chris De Wet and Robin Palmer (both Anthropology), a Fulbright Scholarship to study a MA at New York University to Mr. Simon

Calder (Economics and Economic History) and a Spencer Foundation Fellowship to Ms. Arona Dison (Academic Development Centre) to pursue doctoral studies into Education Policy.

BOOKS

There have been a number of book launches in 2001: *Development Theory, Policy and Practice* edited by Professors Jan Coetzee and Fred Hendricks (Sociology); *Popular Geosciences Series No:2* by Professor Hugh Eales (Emeritus Professor Geology); *Transforming Settlement in Southern Africa* by Professors Chris De Wet (Anthropology) and Roddy Fox (Geography). Shelley Anguel-Carter (Education) had her Med thesis published as a book entitled *Stolen language? Plagiarism in Writing* by Longman UK in the prestigious Real Language Series.

CONFERENCES

Numerous highly successful research conferences were held at Rhodes during the year. These included the South African Association of Botanists (organised by Department of Botany), Highway Africa 2001 (organised by the Department of Journalism and Media Studies), First National Conference of SA Association for Psychotherapy (organised by the Department of Psychology), Colonial and Post-colonial Cultures of the Book (organised by the Department of English). Plasmodesma 2001 (organised by Department of Botany in conjunction with UCT) was held in Cape Town.

TRAVEL

Through its Joint Research Committee grants, the University was able to give approximately 70 staff and 45 postgraduates the opportunity to present their research at local conferences. Sixty researchers were assisted with funding to attend at international conferences.

Funding from other agencies and private organisations enabled many more staff and students to present papers and posters at numerous local and international conferences.

FELLOWSHIPS AND SCHOLARSHIPS

A very encouraging trend has been the high quality of applicants for prestigious research fellowships and scholarships at Rhodes.

Professor John Thornes, Research Professor, Kings College, University of London was the successful recipient of the Hugh Kelly Fellowship for 2001 and was hosted by the Department of Geography.

Two new Rhodes University Postdoctoral Fellows were appointed: Drs Avula Bharathi (Pharmacy) and Johan Erlandsson (Zoology and Entomology). Drs Andrew Gleeson and David Ryan (Philosophy) had their Fellowships renewed.

There were approximately 300 applicants for the Rhodes University, Henderson, Mellon and Allan Gray Scholarships for Honours, Masters and Doctoral study. In all a total of 50 scholarships were awarded

Rhodes postgraduates in general also excelled at various National and International conferences with numerous students receiving awards for papers and poster presentations at these conferences.

Several Rhodes postgraduates were also the recipients of many prestigious local and overseas scholarships. Eusebius McKaiser (Philosophy, Mellon Scholarship recipient) was awarded the Abe Bailey Trust Travel Bursary to England and Scotland. Zosa De Sas Kropinwincki (Political Studies/ISU) was awarded the Commonwealth UK Scholarship to study a Master's in International Resources and Social Development at Leeds University. She has also been awarded a Patrick and Margaret Scholarship for PhD studies at Oxford University.

Bronwyn-Law Viljoen (English) received two Molberger Fellowships from the Department of English at New York University to complete her PhD.

Morgenie Pillay (Political Studies/ISU, Mellon Scholarship recipient) was selected for the Japanese Exchange and Teaching Programme.
